7-9X

Some psychologists focus their study on how humans and other animals learn and how some experiences can lead to changes in behavior and mental processes. Because the process of learning requires both physiological and psychological processes to work together, the two preceding units provide the foundation for this unit. Many psychologists who study learning focus on observable behavior and how those behaviors can be changed or reinforced. Other learning psychologists study how the individual's observations of other people's behaviors influence changes in that individual's mental processes and resulting behaviors.

ESSENTIAL QUESTIONS

- How do we learn?
- How do our experiences influence our behaviors and mental processes?

TOPICS

- 4.1 Introduction to Learning
- 4.2 Classical Conditioning
- 4.3 Operant Conditioning
- 4.4 Social and Cognitive Factors in Learning
