taught her about living more fully honestly and ecologically **The psychology of learning** Edward Lee Thorndike,1913

professional development ensuring long term career growth   The End of Learning Thomas Festa,2013-09-13 This book shows that education constitutes the central metaphor of John Milton s political as well as his poetic writing Demonstrating how Milton s theory of education emerged from his own practices as a reader and teacher this book analyzes for the first time the relationship between Milton s own material habits as a reader and his theory of the power of books Milton s instincts for pedagogy and the habits of inculcation everywhere visible in his writings take on a larger political function in his use of education as a trope for the transmission of intellectual history The book therefore analyzes Paradise Lost in the complementary contexts of its outright educational claims and more subversive countervailing measures in order to show how Milton dramatizes the end of learning which is to say both its objective and its failure The thesis emphasizes the argumentative resourcefulness of Milton s efforts to liberate readers from the tyrannical bonds of their political innocence most immediately in the context of the failure of Cromwell s regime to establish lasting republican institutions More philosophically the book explores the ways in which Milton s works investigate the humane and intellectual yearning for justice in response to the problem of evil   *Hacking Education in a Digital Age* Bryan Smith,Nicholas Ng-A-Fook,Linda Radford,Sarah Smitherman Pratt,2018-04-01 In this collection the authors put forth different philosophical conceptions of hacking education in response to the educational societal and technological demands of the 21st century Teacher Educators are encouraged to draw on the collection to rethink how hacking education can be understood simultaneously as a praxis informed by desires for malice as well as a creative site for us to reconsider the possibilities and limitations of teaching and learning in a digital era How do we hack beyond the limits of circumscribed experiences regulated subjective encounters with knowledge and the limits imposed by an ever constrained 21st century schooling system in the hopes of imagining better and more meaningful futures How do we foster ingenuity and learning as the end itself and not learning as economic imperative in a world where technology in part positions individuals as zombie like and as an economic end in itself Can we hack education in such a way that helps to mitigate the black hat hacking that increasingly lays ruin to individual lives government agencies and places of work How can we as educators facilitate the curricular and pedagogical processes of reclaiming the term hacking so as to remember and remind ourselves that hacking s humble roots are ultimately pedagogical in its very essence As a collection of theoretical and pedagogical pieces the chapters in the collection are of value to both scholars and practitioners who share the same passion and commitment to changing challenging and reimagining the script that all too often constrains and prescribes particular visions of education Those who seek to question the nature of teaching and learning and who seek to develop a richer theoretical vocabulary will benefit from the insightful and rich collection of essays presented in this collection In this regard the collection offers something for all who might wish to rethink the fundamental dynamics of education or as Morpheus asks of Neo in The Matrix bend the rules of conventional ways of knowing and being   **Code of Guardians: Mastering the Digital Realm** Md.
