What others are saying about LEED AP O M Mock Exam These are TOUGH sample tests You need this book I used this book as a review in the day or two before my exam The questions in this book could very well be found on the exam but most actual exam questions will not be as complex as they are made here Most of these questions on these mock exams have a twist or trick and many can only be answered if you know the materials backwards and forward This makes for GREAT exam preparation because it makes you acutely aware of the types of tricks and the level of detail you MIGHT see on the exam G Patton I highly recommend this book The book was extremely helpful for me passing the exam The questions really challenged me to dig deeper into the details of each category I felt this was one of several tools to help me be prepared for the exam I highly recommend this book Edwin F Sierra Such a great tool I passed the exam at the first attempt These mock exams helped me

to learn how to tackle the problems and which areas I should focus on I worked with another book of the author also It took 2 3 weeks for my preparation Chai *Building Construction* Gang Chen, 2010 Learn the Tips Become One of Those Who Know Building Construction and Architectural Practice and Thrive For architectural practice and building design and construction industry there are two kinds of people those who know and those who don't The tips of building design and construction and project management have been undercover until now Most of the existing books on building construction and architectural practice are too expensive too complicated and too long to be practical and helpful This book simplifies the process to make it easier to understand and uncovers the tips of building design and construction and project management It sets up a solid foundation and fundamental framework for this field It covers every aspect of building construction and architectural practice in plain and concise language and introduces it to all people Through practical case studies it demonstrates the efficient and proper ways to handle various issues and problems in architectural practice and building design and construction industry It is for ordinary people and aspiring young architects as well as seasoned professionals in the construction industry For ordinary people it uncovers the tips of building construction for aspiring architects it works as a construction industry survival guide and a guidebook to shorten the process in mastering architectural practice and climbing up the professional ladder for seasoned architects it has many checklists to refresh their memory It is an indispensable reference book for ordinary people architectural students interns drafters designers seasoned architects engineers construction administrators superintendents construction managers contractors and developers You will learn 1 How to develop your business and work with your client 2 The entire process of building design and construction including programming entitlement schematic design design development construction documents bidding and construction administration 3 How to coordinate with governing agencies including a county's health department and a city's planning building fire public works departments etc 4 How to coordinate with your consultants including soils civil structural electrical mechanical plumbing engineers landscape architects etc 5 How to create and use your own checklists to do quality control of your construction documents 6 How to use various logs i.e. RFI log submittal log field visit log etc and lists contact list document control list distribution list etc to organize and simplify your work 7 How to respond to RFI issue CCDs review change orders submittals etc 8 How to make your architectural practice a profitable and successful business About the author Gang Chen holds a master's degree from the School of Architecture University of Southern California USC Los Angeles and a bachelor's degree from the School of Architecture South China University of Technology He has over 20 years of professional experience Many of the projects he was in charge of or participated in have been published extensively in Architecture Architectural Record The Los Angeles Times The Orange County Register etc He has worked on a variety of unusual projects including well known large scale healthcare and hospitality projects with over one billion dollars in construction costs award winning school designs highly acclaimed urban design and streetscape projects multifamily housing
