Introduction

Each [branch of government](#) produces a different type of law. **Case law** is the body of law developed from judicial opinions or decisions over time (whereas statutory law comes from legislative bodies and administrative law comes from executive bodies). This guide introduces beginner legal researchers to resources for finding judicial decisions in case law resources. Coverage includes brief explanations of the court systems in the United States; federal and state case law reporters; basic [Bluebook citation style](#) for court decisions; digests; and online access to court decisions.

COURT SYSTEMS AND DECISIONS

The United States has parallel court systems, one at the federal level, and another at the state level. Both systems are divided into trial courts and appellate courts. Generally, trial courts determine the relevant facts of a dispute and apply law to these facts, while appellate courts review trial court decisions to ensure the law was applied correctly.
