Sustainable Development - The Roles Of Carbon And Bio-carbon: An Introduction To Molecular Sciences Pierre Vogel, 2022-06-21 Due to overconsumption of fossil carbon humanity faces four major problems global warming decrease of biodiversity pollution of the biosphere and the degradation of agriculture soils It is not enough to reduce our greenhouse gas emissions by stopping the consumption of fossil carbon it is also urgent to remove carbon dioxide from the atmosphere In order to understand the challenges outlined above a minimal knowledge of the most important carbon compounds and their transformations is an asset This textbook is therefore an introduction to the molecular sciences and shows how we depend on carbon compounds what they are and how they are transformed Plant biomass including agricultural forestry and urban wastes is the source of bio carbon that can replace fossil carbon In addition we will always need carbon containing substances for our comfort and health These important topics are covered in this textbook Life begins with water carbon dioxide and the sun Carbon dioxide is not a waste but a starting material for a better life Biomass and carbon dioxide are our best allies in sustainable development circular economy This textbook explains why This book contains 100 problems and solutions more than 180 colour pages and bibliographical sketches of most important scientists and inventors

The Statistical Mechanics of Irreversible Phenomena Pierre Gaspard, 2022-07-28 This book provides a comprehensive and self contained overview of recent progress in nonequilibrium statistical mechanics in particular the discovery of fluctuation relations and other time reversal symmetry relations The significance of these advances is that nonequilibrium statistical physics is no longer restricted to the linear regimes close to equilibrium but extends to fully nonlinear regimes These

important new results have inspired the development of a unifying framework for describing both the microscopic dynamics of collections of particles and the macroscopic hydrodynamics and thermodynamics of matter itself The book discusses the significance of this theoretical framework in relation to a broad range of nonequilibrium processes from the nanoscale to the macroscale and is essential reading for researchers and graduate students in statistical physics theoretical chemistry and biological physics

Biochemistry for Anesthesiologists and Intensivists Fernando Alemanno, 2019-10-22 This book discusses and explains the importance of biochemistry knowledge in understanding what happens to patients during anesthesia and or to those being in intensive care It covers a wide range of topics such as Cerebral Edema Shock Blood Brain Barrier The Pulmonary surfactant The Acid Base equilibrium Local anaesthetics Perineural adjuvants Normobaric Oxygen Therapy Theories of Narcosis Hyperventilation effects and consequences are also presented For instance by hyperventilating a patient with a PaCO₂ significantly below 25 mmHg we risk blocking pyruvic acid carboxylation and transforming it into oxalacetic acid which in turn knocks out the Krebs cycle possibly leading to a complication i e to metabolic acidosis and not to compensation for respiratory alkalosis It is also worth remembering that vitamins are actually molecules of pretty considerable potency and should not be simply intended as integrators If we inject a patient under intensive care with vitamin C this not only plays a capillary protective role but facilitates the conversion of dopamine to noradrenaline As far as vitamin B6 goes not only is it the most natural of antiemetics but the coenzyme responsible for transforming glutamate as one of the most powerful excitatory mediators into GABA one of the fiercest inhibitors Anesthesiological and intensive care practice require a detailed biochemistry knowledge to avoid onset of complications and or to deal with unexpected events promptly and appropriately The book is intended for anesthesiologists intensivists anesthesia teachers anesthesia trainees and residents
