Mangano, 2008-08 The objective of this review by the Dept of Health and Human Services HHS Office of Inspector General was to estimate the extent of FY 2000 fee for service Medicare payments that did not comply with Medicare laws and regulations. Based on HHS's statistical sample, HHS estimates that improper Medicare benefit payments made during FY 2000 totaled 11.9 billion or about 6.8% of the 173.6 billion in processed fee for service payments reported by the Health Care Financing Admin HCFA. As in past years, these improper payments could range from inadvertent mistakes to outright fraud and abuse. HHS recommendations address the need for HCFA to sustain its efforts in reducing improper payments. This concise book provides a candid assessment of the US healthcare system as it ramps up its use of electronic health records, EHRs, and other forms of IT to comply with the government's Meaningful Use requirements. It's a tremendous opportunity for tens of thousands of IT professionals, but it's also a huge challenge: the program requires a complete makeover of archaic records systems, workflows, and other practices now in place. This book points out how hospitals and doctors' offices differ from other organizations that use IT and explains what's necessary to bridge the gap between clinicians and IT staff. Get an overview of EHRs and the differences among medical settings. Learn the variety of ways institutions deal with patients and medical staff and how workflows vary. Discover healthcare's dependence on paper records and the problems involved in migrating them to digital documents. Understand how providers charge for care and how they get paid. Explore how patients can use EHRs to participate in their own care. Examine healthcare's most pressing problem: avoidable errors and how EHRs can both help and exacerbate it.
