## **Mega Sports Camp 2013:**

Legacy, Sustainability and CSR at Mega Sport Events Pierre Lienhard, Holger Preuss, 2014-07-05 The UEFA European Football Championship 2008™ EURO 2008 was the largest sports event ever organized in Switzerland. The host nations, Austria and Switzerland, emphasized the sustainability of the event. Through their analysis, the authors argue that well-known principles of sustainability and policy were not uniformly implemented for the EURO 2008. Nonetheless, this book shows how in Switzerland a legacy was created through the implementation of corporate governance and social responsibility policies by UEFA, the Swiss Government, and the Swiss Football Association. This book offers an unprecedented resource for sports practitioners and researchers. It provides a wealth of data based on the study of existing scholarly literature, key strategic and conceptual documents, as well as exclusive interviews with high-level executives involved in the organization of EURO 2008.

The Sport Mega-Events of the 2020s Jan Andre Lee, Ludvigsen, Joel Rookwood, Daniel Parnell, 2023-10-31 This book explores various social, cultural, political, and economic issues through the lenses of various sport mega-events in the twenty-first century, including the Olympic Games and the World Cup and European Championships in football. In a time where sport mega-events are closely followed by controversies, legacy discourses, and questions of their governance, the chapters within this book showcase why sport mega-events continue to ignite important questions for scholars, commentators, fans, and sport and political authorities. By covering various topics emerging around sport mega-events such as physical activity, legacies, rhetoric, media coverage, environmental impacts, diplomacy, and spectators' experiences, this book breaks new ground as it considers a range of longstanding and emerging socio-political issues relating broadly to the staging of spectacular sport mega-events in the present day. This is a fascinating reading for students and researchers situated in sociology, sport management, event management, political science, sport studies, sport business, urban studies, and leisure studies. The chapters in this book were originally published as a special issue of *Sport in Society*.

It presents multidisciplinary perspectives of sport tourism as structured by the geographical concepts of space, place, and environment. The volume offers a comprehensive update of the discussions presented in the two previous editions, recognising the significant growth in sub-elite participation sports and addressing spectator-based sport events, participation-based sport events, active sport, and sport heritage activities. It aims to advance theoretical thinking on the subject of sport tourism development and critical thinking on the interplay of local and global forces in sport and tourism development. It continues to be an important text for students and researchers in tourism studies, human geography, sports geography, sociology of sport, sports management, sports marketing, and history of sport.

sporting spectacle is produced and the universe in which a city is produced It adopts Bourdieu s concept of field to explore the interests and disputes involved in the production of sports mega events across different times and spaces and the role of host cities in these processes It aims to identify the bases that give these spectacles the power to produce disruptions in the social fabric of the host cities and countries and to enable the production of authoritarian forms of exercising power By observing the historical constitution of the field of production of sport spectacle as an autonomous field this book explores how sport mega events create both an arena and a context for radical expressions of authoritarianism of neoliberal planning models It will be of interest to students scholars and professionals in architecture and urban studies urban planning municipal governance sport and leisure studies and those interested in the relationship between State and capital in the production of urban space
