The Sciences of the Soul Fernando Vidal, 2011-12-01 Fernando Vidal's trailblazing text on the origins of psychology traces the development of the discipline from its appearance in the late sixteenth century to its redefinition at the end of the seventeenth and its emergence as an institutionalized field in the eighteenth. Originally published in 2011, *The Sciences of the Soul* continues to be of wide importance in the history and philosophy of psychology, the history of the human sciences more generally, and in the social and intellectual history of eighteenth-century Europe.

Foundations of Morality, Human Rights, and the Human Sciences Anna-Teresa Tymieniecka, Calvin O. Schrag, 2012-12-06 The essays in this volume constitute a portion of the research program being carried out by the International Society for Phenomenology and the Human Sciences. Established as an affiliate society of the World Institute for Advanced Phenomenological Research and Learning in 1976 in Arezzo, Italy, by the president of the Institute, Dr. Anna Teresa Tymieniecka, this particular society is devoted to an exploration of the relevance of phenomenological methods and insights for an understanding of the origins and goals of the specialized human sciences. The essays printed in the first part of the book were originally presented at the Second Congress of this society held at Purdue University, West Lafayette, Indiana, 12-14 July 1979. The second part of the volume consists of selected essays from the third convention, the Eleventh International Congress of Phenomenology of the World Phenomenology Institute held in Cambridge, Massachusetts, in 1981. With the third part of this book, we pass into the Human Rights issue as treated by the World Phenomenology Institute at the Interamerican Philosophy Congress held in Tallahassee, Florida, also in 1981. The volume opens with a monograph by Anna Teresa Tymieniecka on the foundations of ethics in the moral practice within the life-world and the social world, shown as clearly distinct. The main ideas of this work had been presented by Tymieniecka as lead lectures to the three conferences, giving them a tight research project consistency.

The Sciences James Trefil, Robert M. Hazen, 2016-09-13 This text is an unbound, three-hole-punched version. *The Sciences: An Integrated Approach*, Binder Ready Version, 8th Edition, by James Trefil and Robert Hazen, uses an approach that recognizes that science forms a seamless web of knowledge about the universe. This text fully integrates physics, chemistry, astronomy, earth sciences, and biology, and emphasizes general principles and their application to real-world situations. The goal of the text is to help students achieve scientific literacy. Applauded by students and instructors for its easy-to-read style and detail appropriate for non-science majors, the eighth edition has been updated to bring the most up-to-date coverage to the students in all areas of science.

Cohen,2013-06-29 *Natural Sciences and the Social Sciences* contains a series of explorations of the different ways in which the social sciences have interacted with the natural sciences Usually such interactions are considered to go only one way from the natural to the social sciences But there are several important essays in this volume which show how developments

in the social sciences have affected the natural sciences even the hard science of physics Other essays deal with various types of interaction since the Scientific Revolution In his general introductory chapter Cohen sets some general themes concerning analogies and homologies and the use of metaphors drawing specific examples from the use of concepts of physics by marginalist economists and of developments in the life sciences by organismic sociologists The remaining chapters which explore the different ways in which the social sciences and the natural sciences have actually interacted are written by leaders in the field of history of science drawn from a wide range of countries and disciplines The book will be of great interest to all historians of science philosophers interested in questions of methodology economists and sociologists and all social scientists concerned with the history of their subject and its foundations
