Meryl Levy, 2011 Chemistry, Student Study Guide James E. Brady, Fred Senese, 2008-01-28 The image on the front cover depicts a carbon nanotube emerging from a glowing plasma of hydrogen and carbon as it forms around particles of a metal catalyst. Carbon nanotubes are a recently discovered allotrope of carbon. Three other allotropes of carbon, buckyballs, graphite, and diamond, are illustrated at the left, as is the molecule methane, CH_4 , from which nanotubes and buckyballs can be made. The element carbon forms an amazing number of compounds with structures that follow from simple methane found in natural gas to the complex macromolecules that serve as the basis of life on our planet. The study of chemistry also follows from the simple to the more complex, and the strength of this text is that it enables students with varied backgrounds to proceed together to significant levels of achievement.

Basic Concepts of Chemistry, Study Guide Leo J. Malone, 2000 The text's three main goals are to introduce chemistry as a living, relevant science; to encourage learning and critical thinking; and to help readers overcome the math difficulties that impede their progress in chemistry. Designed to help readers master the principles of general chemistry, as a prep book it promotes active involvement with the material. There are special features throughout that reinforce concepts and help to develop strong problem-solving and study skills. Updated to include an Interactive Learning Ware problems CD containing several of the chapter-ending problems from the book in an interactive tutorial with feedback to help readers set up and solve problems.
