The multivolume set *A Student Guide to Energy* does just that with an accessible introduction to the basic concepts and key topics concerning nonrenewable energy sources, future renewable energy programs, and the importance of achieving a sustainable energy program for future generations. *A Student Guide to Energy* is divided into five separate volumes. Volume 1 highlights our present dependence on nonrenewable energy sources: oil, gas, coal, and nuclear power. Volumes 2, 3, and 4 look at the renewable energy sources that will play a vital role in our future, including solar energy, hydrogen fuel cells, wind, and water power, and geothermal energy. The concluding volume focuses on efforts to develop a global sustainable energy system that encompasses energy efficiency, conservation, and a healthy, cleaner environment. **LEED Professional Accreditation**
