Evaluating Early Learning in Museums Nicole Cromartie, Kyong-Ah Kwon, Meghan Welch, 2021-04-01 Evaluating Early Learning in Museums presents developmentally appropriate and culturally relevant practices for engaging early learners and their families in informal arts settings Written by early childhood education researchers and a museum practitioner the book showcases what high quality educational programs can offer young children and their families through the case study of a program at the High Museum of Art in Atlanta Georgia Providing strategies for building strong community partnerships and audience relationships the authors also survey evaluation tools for early learning programs and offer strategies to help museums around the world to engage young children At the center of this narrative is the seminal partnership that developed between researchers and museum educators during the evaluation of a program for toddlers Illuminating key components of the partnership and the resulting evolution of family offerings at the museum the book also draws parallels to current work being done at other museums in international contexts Evaluating Early Learning in Museums illustrates how an interdisciplinary collaboration between researchers and practitioners can improve museum practices As such the book will be of interest to researchers and students engaged in the study of museums and early childhood as well as to practitioners working in museums around the world

International Thinking on Children in Museums Sharon Shaffer, 2020-10-12 International Thinking on Children in Museums introduces current research theory and practice about young learners in museums around the world The book imparts vital knowledge about the nature of childhood and children s learning that will improve understanding of the very youngest museum goers Including contributions from practitioners scholars and

consultants around the globe this volume examines museum practices and children's learning across a range of distinct cultural and geographic locales. The framework of the book is based on research and current thinking in the realm of developmental psychology, sociology, and anthropology, allowing the contributors to examine the evolution of early learning and children's programs through a sociocultural lens. This broad-based look at international museum practices for children offers a rare view of the field from an important but oft-neglected perspective: that of society and culture. *International Thinking on Children in Museums* will broaden understanding of museum practice across cultures and geographic regions and as such will be of interest to scholars and students engaged in the study of museum education, museum studies, and early learning. It should also provide a much-needed source of inspiration for museum practitioners working around the world.

The Engaging Museum Graham Black, 2012-11-12 This very practical book guides museums on how to create the highest quality experience possible for their visitors. Creating an environment that supports visitor engagement with collections means examining every stage of the visit from the initial impetus to go to a particular institution to front-of-house management, interpretive approach, and qualitative analysis afterwards. This holistic approach will be immensely helpful to museums in meeting the needs and expectations of visitors and building their audience. This book features chapters, introductions, and discussion sections supporting case studies to show how ideas are put into practice; a lavish selection of tables, figures, and plates to support and illustrate the discussion; boxes showing ideas, models, and planning suggestions to guide development; an up-to-date bibliography of landmark research. *The Engaging Museum* offers a set of principles that can be adapted to any museum in any location and will be a valuable resource for institutions of every shape and size, as well as a vital addition to the reading lists of museum studies students. *Museums, Children and Social Action* Sharon E.

Shaffer, 2023-12-15 *Museums, Children and Social Action* examines the role that museums play in reaching, teaching, and inspiring children as global citizens of the world and looking to the future. Arguing that the sustainability of museums will come from strengthening relationships with young visitors, Shaffer presents a diverse range of programs, exhibitions, and outreach from museums across five continents. Shaffer highlights how museums are already serving children and making a difference in their lives. Arguing that museums have a unique responsibility to connect this audience with relevant social issues and challenges such as social injustice, racism, climate change, and poverty, Shaffer simultaneously acknowledges that a large number of children are still on the margins of the institution and its mission. Recognizing the ways in which museums are currently serving children, the book also considers what museums could and should be doing as they plan for the future, raising critical questions about core values, community partners, and social agendas. *Museums, Children and Social Action* is essential reading for academics and students engaged in the study of museums, social justice, and childhood. It encourages museums to make it their mission to educate and serve this audience and their families for the good of children as well as museums while also considering what their institutions can do to make a lasting impact on children and their families.

Evaluating Early Learning in Museums Nicole Cromartie, Kyong-Ah Kwon, Meghan Welch, 2021-03-31 Evaluating Early Learning in Museums presents developmentally appropriate and culturally relevant practices for engaging early learners and their families in informal arts settings. Written by early childhood education researchers and a museum practitioner, the book showcases what high quality educational programs can offer young children and their families through the case study of a program at the High Museum of Art in Atlanta, Georgia. Providing strategies for building strong community partnerships and audience relationships, the authors also survey evaluation tools for early learning programs and offer strategies to help museums around the world to engage young children. At the center of this narrative is the seminal partnership that developed between researchers and museum educators during the evaluation of a program for toddlers. Illuminating key components of the partnership and the resulting evolution of family offerings at the museum, the book also draws parallels to current work being done at other museums in international contexts. Evaluating Early Learning in Museums illustrates how an interdisciplinary collaboration between researchers and practitioners can improve museum practices. As such, the book will be of interest to researchers and students engaged in the study of museums and early childhood, as well as to practitioners working in museums around the world. [Children's Museums as a New Informal Learning Environment in China](#) Xin

Gong, 2022-03-16 Based on solid theoretical and empirical analyses, this book provides a first and fresh introduction to the recent development of children's museums in China, along with their educational and social impacts as an informal learning environment for children, families, and society in general. To understand the benefits of children's museums and in providing stimulating informal education to children, the book looks into the origin and historical development of these institutions and how they have been influenced by informal learning theory, museum education, and early childhood education, while providing case studies of children's museums in China and the learning that takes place in them. This research analyses the process of informal learning and provides guidance on ways of elevating children's cognitive and noncognitive development in the informal space. Different stakeholders of children's museums, including parents and educators, practitioners and designers, researchers of informal education, early childhood education, and policy makers, will benefit from the insights provided in this book. [STEM in Early Childhood Education](#) Lynn E. Cohen, Sandra Waite-Stupiansky, 2019-07-12 Bringing together a

diverse cohort of experts, STEM in Early Childhood Education explores the ways STEM can be integrated into early childhood curricula, highlighting recent research and innovations in the field and implications for both practice and policy. Based on the argument that high quality STEM education needs to start early, this book emphasizes that early childhood education must include science, technology, engineering, and mathematics in developmentally appropriate ways based on the latest research and theories. Experienced chapter authors address the theoretical underpinnings of teaching STEM in the early years while contextualizing these ideas for the real world using illustrative examples from the classroom. This cutting edge collection also looks beyond the classroom to how STEM learning can be facilitated in museums, nature based learning outdoors, and after

school programs STEM in Early Childhood Education is an excellent resource for aspiring and veteran educators alike exploring the latest research providing inspiration and advancing best practices for teaching STEM in the early years
