Unsettled Issues in Commercial Vehicle Platooning Jody Emlyn Muelaner, 2021-11-15 While platooning has the potential to reduce energy consumption of commercial vehicles while improving safety both advantages are currently difficult to quantify due to insufficient data and the wide range of variables affecting models Platooning will significantly reduce the use of energy when compared to trucks driven alone or at a safe distance for a driver without any automated assistance However drivers typically drive closer to each other than recommended to achieve drafting efficiencies which may shift the benefit of automated platooning to safety gains More data will be needed to conclusively demonstrate these gains Unsettled Issues in Commercial Vehicle Platooning discusses the technologies needed to enable close platooning including brake system condition monitoring vehicle to vehicle communication and concrete infrastructure assessment The report also looks at driver acceptance of platooning technology from a safety and job security perspective Click here to access the full SAE EDGETM Research Report portfolio <https://doi.org/10.4271/EPR2021027> **The STEAM Revolution** Armida de la Garza, Charles Travis, 2018-10-24 This volume is dedicated to collaborative research across STEM disciplines the arts and humanities It includes six sections framed from a global perspective and exhibits contributions from key experts in the field emerging scholarly voices and STEAM practitioners The added value of STEAM projects in research is highlighted in the first section of this book Ranging from the spatial medical and environmental humanities to heritage science this section discusses the course and paths STEAM projects may evolve to in the near future The second section features reflective essays by scientists and artists on the development of their research their professional growth and personal learning experiences that the art science collaborations have afforded their work and careers Sections III and IV provides practical guidance and advice on facilitating STEAM teams and describe successful collaborative projects By presenting the objectives

and outcomes of relevant research the chapters in these sections discuss the various steps taken by different teams to achieve project fruition Paying particular attention to barriers inhibiting STEAM collaboration these sections also explore the ways in which research teams were able to work effectively The fifth section presents a review of policy issues and the potential impacts of STEAM research for administrators funders and policy makers In its pursuit for balance and inclusion the volume concludes with a critical reflection on STEAM that argues a different perspective and will prove food for thought to readers

**Human Remains: Another Dimension** Tim Thompson, David Errickson, 2017-02-16 Human Remains Another Dimension The Application of 3D Imaging in the Funerary Context brings together scattered literature on the topic assimilating disparate pieces that relate to the novel use of non invasive three dimensional imaging techniques in the forensic context All chapters are written by specialists in the field who use these types of imaging techniques within their research bringing an engaging and comprehensive view that demonstrates the current use of 3D non invasive imaging techniques using case studies In addition the advantages for using such methods their current limitations and possible solutions are also reviewed Includes three dimensional imaging techniques presented from a forensics point of view Written by well renowned specialists in the field Assimilates disparate pieces that relate to the novel use of non invasive three dimensional imaging techniques

Innovative Simulation Systems Aleksander Nawrat, Karol Jędrasiak, 2015-07-20 This monograph provides comprehensive guidelines on the current and future trends of innovative simulation systems In particular their important components such as augmented reality and unmanned vehicles are presented The book consists of three parts Each part presents good practices new methods concepts of systems and new algorithms Presented challenges and solutions are the results of research and conducted by the contributing authors The book describes and evaluates the current state of knowledge in the field of innovative simulation systems Throughout the chapters there are presented current issues and concepts of systems technology equipment tools research challenges and current past and future applications of simulation systems The book is addressed to a wide audience academic staff representatives of research institutions employees of companies and government agencies as well as students and graduates of technical universities in the country and abroad The book can be a valuable source of information for constructors and developers of innovative simulation systems and their components Scientists and researchers involved in mechanics control algorithms image processing computer vision or data fusion can find many valuable suggestions and solutions

**Fishers of Fish and Fishers of Men** Tyler R. Yoder,2016-09-01 The metaphor is a hallmark of Classical Hebrew poetry Some metaphors such as Yhwh is king or Yhwh is warrior play a foundational role The same does not hold for metaphors from the fishing industry Because they had access to only two major freshwater sources archaeological research demonstrates that this industry did not play a major socioeconomic role in ancient Israel Fishing has nevertheless made a substantial contribution to prophetic and wisdom literature All metaphors manifest reality but given the physical circumstances of a largely agrarian nonmarine society what does the sustained presentation of fishing metaphors in the Hebrew Bible communicate Examining the use of fishing images in the Hebrew Bible is a formidable task that demands an open mind and a capacity to mine the gamut of contemporaneous evidence In Fishers of Fish and Fishers of Men Tyler Yoder presents the first literary study devoted to the fishing images used in the Hebrew Scriptures as well as in the Mesopotamian textual records This calls for a penetrating look into cultural contact with Israel s neighbors to the east Mesopotamia and southwest Egypt Though nearly all fishing metaphors in the Hebrew Bible carry overt royal or divine connotations that mirror uses well attested in Mesopotamian literature this comparative analysis remains a largely untapped area of research In this study of the diverse literary qualities of fishing images Yoder offers a holistic understanding of how one integral component of ancient Near Eastern society affected the whole bringing together the assemblage of disparate materials related to this field of study to enable scholars to integrate these data into related research and move the conversation forward

the most suitable cascade can be identified Therefore this research topic aims to cover the current trends and advancements in phytotherapies with an emphasis on targeted strategies in cancer precision medicine Florida CDL Handbook, 2015-2016 ,2015 *Vegetables and Herbs for the Greenhouse and Polyunnel* Klaus Laitenberger,2013-03-21 With our unpredictable weather there s never been a better time to cultivate vegetables under shelter Experienced grower Klaus Laitenberger shows how to use the heat and shelter of a greenhouse or polytunnel to maximise crop production and supply tasty healthy food throughout the year He gives full details of sowing planting spacing and harvesting for all our best loved herbs and vegetables as well as introducing exotic newcomers such as pepino and yacon **New Challenges and**

**Perspectives in Conservation Breeding Programs** Eliana Pintus, José Luis Ros-Santaella,William Holt,Pierre Comizzoli,2025-05-21 Conservation Breeding Programs CBPs remain essential tools to preserve animal biodiversity and save threatened species from extinction Despite the advances made during the last decades CBPs have been carried out only on a small number of species mostly mammals and birds There is therefore an urgent need to develop and complement in situ and ex situ strategies to also preserve other vertebrates like fish amphibians and reptiles in which the biodiversity loss because of climate change or other anthropogenic activities is even more dramatic One of the main factors that limits CBPs success is the lack of knowledge of the animal reproductive biology and behavior which is precisely known for instance in less than 4% of mammals the majority of which are terrestrial species Such knowledge is beneficial not only to enhance but also to control animal fertility that is especially warranted for the management of overabundant or invasive species which represent a further major threat for biodiversity The goal of this Research Topic is to bring together studies that deal with different aspects of animal reproduction both in captive and wild populations This includes both ex situ and in situ approaches such as the management of animal reproduction in captive populations and their reintroduction release into the wild Other approaches such as assisted reproductive technologies and biobanking greatly contribute to the success of conservation breeding This Research Topic also welcomes studies exploring the effects of biotic e g inbreeding diseases stress and abiotic e g anthropogenic activities housing and veterinary care factors on reproductive biology of all vertebrates classes with a special interest to fish amphibians and reptiles As a comprehensive knowledge of animal reproduction and behavior plays a key role for the development and success of breeding programs descriptive studies on reproductive anatomy and physiology of wild or captive species either endangered or overabundant are welcomed The Research Topic also accepts manuscripts that deal with ethical aspects of animal welfare in CBPs and population management of invasive or overabundant species
