Provided by publisher     **Translating Promotional and Advertising Texts** Ira Torresi, 2014-07-16 Promotional and advertising texts come in different forms and account for a considerable share of the translation market. Advertisements, company brochures, websites, tourist guides, institutional information campaigns, and even personal CVs all share a common primary purpose: that of persuading the reader to buy something, be it a product or a lifestyle, or to act in a particular way. From taking preventive measures against health risks to employing one candidate in preference to another. Consequently, their translation requires the application of techniques which, although they vary depending on the specific text type, are all aimed at preserving that persuasive purpose. This often requires in-depth cultural adaptation and, on occasion, thorough rewriting. *Translating Promotional and Advertising Texts* covers different areas of personal promotion, business to business promotion, institutional and business to consumer promotion, including advertising. Numerous examples from a wide variety of languages and media, taken from the author's own professional experience and from real-life observation, are provided throughout. The volume is designed for use as a coursebook for classroom practice or as a handbook for self-learning. It will be of interest to undergraduate and postgraduate students, but also freelance and in-house translators, as well as other professionals working in sales, public relations, or similar departments whose responsibilities include involvement in the management of multilingual advertising and promotion activities.     *Handbook of Automotive Powertrain and Chassis Design* John Fenton, 1998-02-27 John Fenton provides an in-depth study for specialists concerned with chassis and powertrain systems. This text also includes reviews and up-to-date applications, offering a comprehensive reference source.

Up to now, we have relied on and used only fossil fuels to power our industrial and domestic activities. The byproducts of fossil fuels include irreversible pollution and contamination of our Earth, climate change, global warming, and increase in pathogenic and medication-resistant diseases. Exhaustible fossil fuels are expensive to produce and distribute, and not everybody can afford them. Why not switch to natural, non-polluting, inexpensive, inexhaustible fuels such as solar, wind, water, etc. fuels? This is the timely message contained in **TWENTY-FIRST CENTURY'S FUEL SUFFICIENCY ROADMAP**. You can make this message realisable. Go on reading.
