After the Education Wars Andrea Gabor, 2018-06-12 The education wars have been demoralizing for teachers After the Education Wars helps us to see a better way forward Cathy N Davidson The New York Times Book Review After the Education Wars is an important book that points the way to genuine reform Diane Ravitch author of Reign of Error and The Death and Life of the Great American School System A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler more democratic entrepreneurialism In an entirely fresh take on school reform business journalist and bestselling author Andrea Gabor argues that Bill Gates Eli Broad and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world After the Education Wars explains how the market based measures and carrot and stick incentives informing today s reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well These rich detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up lessons also learned from both the open source software and quality movements The good news is that solutions born of this philosophy are all around us from Brockton Massachusetts where the state s once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life A welcome exception to the doom and gloom canon of education reform After the Education Wars makes clear that what s needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools

Sold Out Michelle Malkin, John Miano, 2015-11-10 The 1 New York Times bestselling author and firebrand syndicated columnist Michelle Malkin sets her sights on the corrupt businessmen politicians and lobbyists flooding our borders and selling out America s best and brightest workers In *Sold Out* Michelle Malkin and John Miano name names and expose the lies of those who pretend to champion the middle class while aiding and abetting massive layoffs of highly skilled American workers in favor of cheap foreign labor Malkin and Miano will explode some of the most commonly told myths spread in the media like these Lie 1 America is suffering from an apocalyptic shortage of science technology engineering and math workers Lie 2 US

companies cannot function without an unlimited injection of the highly skilled and highly educated foreign workers who offer capital and energy that American workers can't match. Lie 3 America's best and brightest talents are protected because employers are required to demonstrate that they've made every effort to hire American citizens before resorting to foreign labor. For too long open borders tech billionaires and their political enablers have escaped tough public scrutiny of their means and motives. It's time to trade the whitewash for solvent. American workers deserve better and the public deserves the unvarnished truth.

Brexit and After Kumiko Haba, Martin Holland, 2020-12-12 This book makes a new departure from others on the subject. Not only does it analyze Brexit from the domestic point of view in the UK democracy social analysis and construction of new institutionalization with the EU it extends the analysis externally and reconsiders the EU and UK relationship with Asia and the implications for international relations and a new world order. From this foundation this book presents a broad and diverse spectrum of views concerning Brexit and the EU. For these reasons it serves as an original and excellent textbook for undergraduate and graduate students as well as for researchers of the EU and international relations. Contributions to this volume are from the European Union Studies Association EUSA Asia Pacific Tokyo Conference and affiliated conferences at the following universities between 2017-19: Aoyama Gakuin University Tokyo Taiwan National University Taipei and Fudan University Shanghai. Almost all of the authors have engaged in interdisciplinary research on the EU, are members of the EUSA Asia Pacific and have made public presentations on Brexit and how it relates to the EU Asia international relations economics and institutions. Therefore this book presents various aspects of Brexit and its aftermath from the perspectives of the disciplines of political science economics and international relations in its analysis of the UK the EU Asia and the future world order. The EUSA Presidents and executive committee members participated in the Asia Pacific Conference postgraduate student workshops were organized and their presentations moderated thereby guaranteeing both the quality of the contributions to this book as well as encouraging young talented scholars to write about Brexit and the EU. While many books on Brexit have been published this book offers many new and perspectives that provide suggestions for possible solutions to the problems facing the UK and the EU after Brexit.

The Tumultuous Politics of Scale Donald M. Nonini, Ida Susser, 2020-01-23 Contemporary politics this book contends depend upon the turbulent struggles and strategies around scale. Conflicts over scale can be seen as opaque class struggles. Political projects whether from the ground up or representing corporate or state interests continually contest the scale at which authority is vested. This volume looks at the way global corporations redefine the scale of power and how working class and other movements build alliances and cross scales to develop political blocs. What injustices are perpetrated or more hopefully redressed in this process. The book consisting of contributions from anthropologists geographers and cultural studies scholars explores theoretical issues around contested temporal and spatial scales and around variations in scale from the body to the global. Part I focuses on bodies in motion entangled in battles over new boundaries and political coalitions and the ways in which migrants and refugees are

disrupted by intersecting time scales Part II on the nation state addresses the shifting responsibilities assigned by law at different historical moments and the impact of global energy trade on national austerity policies Part III on rescaling sovereignty discusses the misleading media discourse on Brexit and reconstructs the class bases of the move to the Right in Eastern Europe that threaten the EU Part IV on the histories of changing scales of movements revisits historical debates on uneven and combined development and sets out the transnational labor movements of the eighteenth and nineteenth century Atlantic which prefigure contemporary struggles of labor in a world which is still one of uneven and combined capitalist development Finally Part V considers ways in which some social movements are constrained by scale while others reshape parties and traverse nations in their efforts to build class alliances and political blocs

Steffes, 2024-04-02 How inequality was forged fought over and forgotten through public policy in metropolitan Chicago As in many American metropolitan areas inequality in Chicagoland is visible in its neighborhoods These inequalities are not inevitable however They have been constructed and deepened by public policies around housing schooling taxation and local governance including hidden state government policies In Structuring Inequality historian Tracy L Steffes shows how metropolitan inequality in Chicagoland was structured contested and naturalized over time even as reformers tried to change it through school desegregation affordable housing and property tax reform While these efforts had modest successes in the city and the suburbs reformers faced significant resistance and counter mobilization from affluent suburbanites real estate developers and other defenders of the status quo who defended inequality and reshaped the policy conversation about it Grounded in comprehensive archival research and policy analysis Structuring Inequality examines the history of Chicagoland's established systems of inequality and provides perspective on the inequality we live with today

A Global Idea Mayssoun Sukarieh, 2023-08-15 A Global Idea outlines how youth as shown by the Arab Spring uprisings and subsequent state responses became a prominent social and political category during the first two

Race and Education in New Orleans Walter Stern, 2018-05-04 Surveying the two centuries that preceded Jim Crow's demise *Race and Education in New Orleans* traces the course of the city's education system from the colonial period to the start of school desegregation in 1960 This timely historical analysis reveals that public schools in New Orleans both suffered from and maintained the racial stratification that characterized urban areas for much of the twentieth century Walter C Stern begins his account with the mid eighteenth century kidnapping and enslavement of Marie Justine Sirnir who eventually secured her freedom and played a major role in the development of free black education in the Crescent City As Sirnir's story and legacy illustrate schools such as the one she envisioned were central to the black antebellum understanding of race citizenship and urban development Black communities fought tirelessly to gain better access to education which gave rise to new strategies by white civilians and officials who worked to maintain and strengthen the racial status quo even as they conceded to demands from the black community for expanded educational opportunities The friction between black and white New Orleanians continued throughout the nineteenth century and well into the twentieth when conflicts over land and resources sharply intensified Stern argues that the post Reconstruction reorganization of the city into distinct black and white enclaves marked a new phase in the evolution of racial disparity segregated schools gave rise to segregated communities which in turn created structural inequality in housing that impeded desegregation's capacity to promote racial justice By taking a long view of the interplay between education race and urban change Stern underscores the fluidity of race as a social construct and the extent to which the Jim Crow system evolved through a dynamic though often improvisational process A vital and accessible history *Race and Education in New Orleans* provides a comprehensive look at the ways the New Orleans school system shaped the city's racial and urban landscapes

Suspect Race Jack Glaser, 2014-11-07 Until now most discussion of racial profiling has given only fleeting consideration of its causes Those causes are overwhelmingly psychological In *Suspect Race* social psychologist and public policy expert Jack Glaser leverages a century's worth of social psychological research to provide a clear understanding of how stereotypes even those operating outside of conscious awareness or control can cause police to make discriminatory judgments and decisions about who to suspect stop question search use force on and arrest Glaser argues that stereotyping even nonconscious stereotyping is a completely normal human mental process but that it

leads to undesirable discriminatory outcomes Police officers are normal human beings with normal cognition They are therefore influenced by racial stereotypes that have long connected minorities with aggression and crime Efforts to merely prohibit racial profiling are inadequate Additionally Glaser finds evidence that racial profiling can actually increase crime and he considers the implications for racial profiling in counterterrorism finding some similarities and some interesting differences with drug war profiling Finally he examines the policy landscape on which racial profiling resides and calls for improved data collection and supervision reduced discretion and increased accountability Drawing on criminology history psychological science and legal and policy analysis Glaser offers a broad and deep assessment of the causes and consequence of racial profiling Suspect Race brings to bear the vast scientific literature on intergroup stereotyping to offer the first in depth and accessible understanding of the primary cause of racial profiling and to explore implications for policy

The Origins of the Urban Crisis Thomas J. Sugrue, 2014-04-27 The reasons behind Detroit's persistent racialized poverty after World War II Once America's arsenal of democracy Detroit is now the symbol of the American urban crisis In this reappraisal of America's racial and economic inequalities Thomas Sugrue asks why Detroit and other industrial cities have become the sites of persistent racialized poverty He challenges the conventional wisdom that urban decline is the product of the social programs and racial fissures of the 1960s Weaving together the history of workplaces unions civil rights groups political organizations and real estate agencies Sugrue finds the roots of today's urban poverty in a hidden history of racial violence discrimination and deindustrialization that reshaped the American urban landscape after World War II This Princeton Classics edition includes a new preface by Sugrue discussing the lasting impact of the postwar transformation on urban America and the chronic issues leading to Detroit's bankruptcy
