Chinese History and Literature J. Prusek, 2012-12-06 The studies contained in this volume arose over the last thirty years Originally the range of the materials I intended to include in my selection was very much wider Publishing difficulties however have obliged me to curtail them to something less than half the planned content At first I intended to include all the studies I supposed might be of interest to readers and represent contributions still of some significance for research in this domain of Oriental scholarship When the necessity arose to limit the contents I gave preference to the standpoint of thematic completeness rather than to what would be of interest to the general reader Thus in this volume I have confined myself to two thematic fields only Old Chinese literature and studies dealing with mediaeval storytellers productions hua pen I have excluded the whole complex of historical studies and all studies relating to the new literature I am now preparing on the principal historical theme on which I was engaged already in the period of my studies in Prague under Prof J Bidlo and then in 1928 till 1930 with Prof B Karlgren in Sweden and Prof G Haloun in Halle in Germany a more compendious study in which I hope to sum up the results of my research and I also intend to publish a volume of selected studies dealing with the New Chinese literature at some later date

China has become accessible to the west in the last twenty years in a way that was not possible in the previous thirty. The number of westerners travelling to China to study for business or for tourism has increased dramatically and there has been a corresponding increase in interest in Chinese culture, society and economy and increasing coverage of contemporary China in the media. Our understanding of China's history has also been evolving. The study of history in the People's Republic of China during the Mao Zedong period was strictly regulated and primary sources were rarely available to westerners or even to most Chinese historians. Now that the Chinese archives are open to researchers there is a growing body of academic expertise on history in China that is open to western analysis and historical methods. This has in many ways changed the way that Chinese history, particularly the modern period, is viewed. The Encyclopedia of Chinese History covers the entire span of Chinese history from the period known primarily through archaeology to the present day. Treating Chinese history in the broadest sense, the Encyclopedia includes coverage of the frontier regions of Manchuria, Mongolia, Xinjiang and Tibet that have played such an important role in the history of China. Proper and will also include material on Taiwan and on the Chinese diaspora. In A-Z format with entries written by experts in the field of Chinese Studies, the Encyclopedia will be an invaluable resource for students of Chinese history, politics and culture.
