The Road to Nowhere Jacob S. Hacker, 2020-11-10 During the 1992 presidential campaign health care reform became a hot issue paving the way for one of the most important yet ill fated social policy initiatives in American history Bill Clinton's 1993 proposal for comprehensive coverage under managed competition Here Jacob Hacker not only investigates for the first time how managed competition became the president's reform framework but also illuminates how issues and policies emerge He follows Clinton's policy ideas from their initial formulation by policy experts through their endorsement by medical industry leaders and politicians to their inclusion in a new and unexpected form in the proposal itself Throughout he explores key questions Why did health reform become a national issue in the 1990s Why did Clinton choose managed competition over more familiar options during the 1992 presidential campaign What effect did this have on the fate of his proposal Drawing on records of the President's task force interviews with a wide range of key policy players and many other sources Hacker locates his analysis within the context of current political theories on agenda setting He concludes that Clinton chose managed competition partly because advocates inside and outside the campaign convinced him that it represented a unique middle road to health care reform This conviction Hacker maintains blinded the president and his allies to the political risks of the approach and hindered the development of an effective strategy for enacting it **Federally**

International Handbook of Public Procurement Khi V. Thai, 2017-09-25 Since the 1990s government at all levels is under increasing pressure to do more with less. However, despite the U.S. government spending about 15 to 20 percent of its GDP on contracts for goods and services, there is a paucity of reference books for public procurement officials and very few textbooks for courses on the subject. Filling this void, the *International Handbook of Public Procurement* provides the knowledge necessary to understand how procurement works and how to improve the cost effectiveness of procurement systems. Taking a multidisciplinary approach, the book focuses on the managerial, economic, political, and legal aspects of this topic. It begins with a conceptual framework and highlights various reforms occurring in certain countries. By examining these improvements, readers are able to apply this knowledge to their own strategies. The next section presents selected cases that illustrate the public procurement process, examining systems in various nations including Germany, China, South Africa, Cambodia, Uganda, and Estonia. The book also discusses the rise of electronic procurement systems, e-procurement, and reviews the benefits of these efficient systems. Other topics presented in this comprehensive volume include practical discussions on contract negotiations, bidding, price strategies, and cost analysis, and an insightful chapter on the market's response to contract award announcements. A virtual encyclopedia from numerous international experts, this book was assembled by Khi V. Thai, Professor at Florida Atlantic University and Editor of the *Journal of Public Procurement*. Dr. Thai has provided technical assistance in the area of public procurement to governments across the world. Empowering those on all sides of the issue, this volume dispenses advice valuable to government officials and contractors as well as providing a comprehensive text for public administration students.

The Boston Contest of 1944 Jeffry M. Diefendorf, 2015-03-05 During World War II, many European government authorities and planners believed that the damage caused by bombing constituted a great opportunity to transform their cities. Even as the fighting continued, a great many plans were drawn up, and this has been the subject of much scholarship. However, what is often overlooked is wartime planning in cities not damaged in the war. United States cities were not bombed, but in Boston, one of its leading cities, the last years of the war brought a major effort to encourage both new plans to modernize the city and also means of implementing those plans. The wartime initiative to transform Boston had several sources. Both the Great Depression and the war had led to major measures by the federal government to try to deal with fiscal challenges and the need for new housing for the many people who relocated during the war because of the creation of new industries to help the war effort. Boston hoped it could benefit from these measures. Moreover, in the late 1930s, Harvard University had become a key residence for figures important in modernist planning, including Joseph Hudnut, Walter Gropius, and Martin Wagner. These factors combined in 1944 to inspire what was called The Boston Contest. Its goal was to suggest solutions to many problems found in the metropolitan area. These issues included commercial and industrial developments, housing, transportation, education, recreation, welfare, urban finances, metropolitan government, and citizen participation in solving problems. This book, published in 1945, contains the top 3 prize-winning entries and excerpts from 9 of

the other nearly 100 entries It gives a fascinating insight into the developing ideas of urban planning in the United States at a critical juncture *LEAA reauthorization* United States. Congress. House. Committee on the Judiciary. Subcommittee on Crime,1981
