Public Health and Disasters Emily Ying Yang Chan, Rajib Shaw, 2020-02-24 This book presents the health emergency and disaster risk management H EDRM research landscape with examples from Asia In recent years the intersection of health and disaster risk reduction DRR has emerged as an important interdisciplinary field In several landmark UN agreements adopted in 2015 2016 including the Sendai Framework for Disaster Risk Reduction 2015 2030 the 2030 Sustainable Development Goals SDGs the Paris climate agreement and the New Urban Agenda Habitat III health is acknowledged as an inevitable outcome and a natural goal of disaster risk reduction and the cross over of the two fields is essential for the successful implementation of the Sendai Framework H EDRM has emerged as an umbrella field that encompasses emergency and disaster medicine DRR humanitarian response community health resilience and health system resilience However this fragmented nascent field has yet to be developed into a coherent discipline Key challenges include redundant research lack of a strategic research agenda limited development of multisectoral and interdisciplinary approaches deficiencies in the science policy practice nexus absence of standardized terminology and insufficient coordination among stakeholders This book provides a timely and invaluable resource for undergraduate and postgraduate students researchers scholars and frontline practitioners as well as policymakers from across the component domains of H EDRM **Gatekeeping in**

Transition Timothy Vos, François Heinderyckx, 2015-06-08 Much of what journalism scholars thought they knew about

gatekeeping about how it is that news turns out the way it does has been called into question by the recent seismic economic and technological shifts in journalism. These shifts come with new kinds of gatekeepers, new routines of news production, new types of news organizations, new means for shaping the news, and new channels of news distribution. Given these changing realities, some might ask: does gatekeeping still matter? In this internationally minded anthology of new gatekeeping research, contributors attempt to answer that question. *Gatekeeping in Transition* examines the role of gatekeeping in the twenty-first century from organizational, institutional, and social perspectives across digital and traditional media and argues for its place in contemporary scholarship about news and journalism.

Climate Security Matti Goldberg, 2023-12-01. This book presents an empirical study of the role of knowledge in the making of the climate security nexus. Climate change might give the Soviet Union a competitive advantage in the Cold War. Extreme droughts contributed to wars in Darfur, Syria, or Yemen. Melting sea ice creates geopolitical risks. Russia's climate-destroying hydrocarbons enabled its invasion of Ukraine. These are just some of the many ways in which climate change and conflicts have been linked into a climate security nexus. In this innovative book, Matti Goldberg considers how such connections are constructed and asks to what extent they are driven by evidence and science. Goldberg describes the tools used to present the wars of Darfur and Syria as climate wars and considers the fragmented role of the sciences in those presentations, as well as the resulting patterns of influence and marginalization of impacted populations. The author also highlights how the international community can better integrate the situations of people at the frontlines of climate change into policymaking and, based on an analysis of the dynamic nature of power, identifies potential entry points for positive change. This book is a must-read for researchers interested in climate security links in science-policy interfaces and in the formation of nexuses of issues in international politics. It is also of interest to practitioners working on the climate security nexus and science-policy interfaces.
