A World of Work Ilana M. Gershon, 2015-11-25 Ever wondered what it would be like to be a street magician in Paris A fish farmer in Norway A costume designer in Bollywood This playful and accessible look at different types of work around the world delivers a wealth of information and advice about

a wide array of jobs and professions The value of this book is twofold For young people or middle aged people who are undecided about their career paths and feel constrained in their choices A World of Work offers an expansive vision For ethnographers this book offers an excellent example of using the practical details of everyday life to shed light on larger structural issues Each chapter in this collection of ethnographic fiction could be considered a job manual Yet not any typical job manual to do justice to the ways details about jobs are conveyed in culturally specific ways the authors adopt a range of voices and perspectives One chapter is written as though it was a letter from an older sister counseling her brother on how to be a doctor in Malawi Another is framed as a eulogy for a well loved village magistrate in Papua New Guinea who may have been killed by sorcery Beneath the novelty of the examples are some serious messages that Ilana Gershon highlights in her introduction These ethnographies reveal the connection between work and culture the impact of societal values on the conditions of employment Readers will be surprised at how much they can learn about an entire culture by being given the chance to understand just one occupation

The Market Loves You Jeffrey A. Tucker, 2019-05-13 The marketplace is commonly described as brutish greed based cutthroat or unrelentingly exploitative The Market Loves You Jeffrey Tucker's latest collection of evocative observations of everyday products services and life in the market rejects this characterization He argues that benevolence characterizes trading relationships entrepreneurship work contracts and the effects of decisions by market players These are a civilizing evenly lovely institutions that embed complex human relationships that extend all over the world involving potentially billions of people Every unforced decision to trade represents a spark of insight a hope for a better future and the instantiation of a human relationship that affirms the dignity of everyone involved he writes Sometimes that relationship is personal it is even more awesome to consider the enormously complex impersonal relationships that make up the vast global networks of exchange that make our lives wonderful We take the results for granted because they are so much part of our daily experience If they suddenly went missing any aspect of what we depend on to live a better life we would experience demoralization and even devastation The lights go out The gas stations close The shelves are empty The doctors run out of medicine There is no one to fix the plumbing no one to repair the heater no one to do the surgery on my heart This is a world that is less lovely than the world of plenty we've come to expect The institutional setting in which human relationships become real in our lives is the market This does not entail reducing human life to dollars and cents It is about the recognition that our value as human beings is bound up with our associations with others our trading relationships and the opportunities

we have to value and be valued by others Looked at this way the moral aesthetic of the market is lovely It fosters love It needs love Economics love and life these are all the same topic in the creative intelligence of Jeffrey Tucker His writing sweeps you into a world of beautiful stories about the material world infused with his gift for seeing the underlying human element in every exchange as well as the brutality of the political means of social control His new hymn to market forces brings what economics too often lacks a vivid celebration of life and love as real human beings experience it To see the world as Tucker does is a gift that few writers in economics have ever possessed Helio Beltr o President Mises Institute Brazil If you want to understand the plain sense of real economics as against the fairy tales of fake economics Tucker is your main man In scores of charming little essays free of pomp or pretense he brings you to understand how a free people can live without coercion He s a liberal 2 0 a sweet egalitarian a generous open hearted spirit yet realistic and tough minded too Deirdre McCloskey University of Illinois at Chicago Jeffrey Tucker is always a delight to read because he understands and appreciates the market s invisible heart as well as its invisible hand Art Carden Samford University Jeffrey Tucker writes with a rare mix of economic understanding historical awareness philosophical depth and unaffected humanity And oh also on display in these pages is a fearlessness in going to wherever the logic of his reasoning brings him I learned something important from each of the 91 essays collected here Donald Boudreaux George Mason University The American Institute for Economic Research in Great Barrington Massachusetts was founded in 1933 as the first independent voice for sound economics in the United States Today it publishes ongoing research hosts educational programs publishes books sponsors interns and scholars and is home to the world renowned Bastiat Society and the highly respected Sound Money Project The American Institute for Economic Research is a 501c3 public charity *Machinery* Lester Gray French,1919 **The One Device** Brian Merchant,2017-06-20 The secret history of the invention that changed everything and became the most profitable product in the world The One Device is a tour de force with a fast paced edge and heaps of analytical insight Ashlee Vance New York Times bestselling author of *Elon Musk* A stunning book You will never look at your iPhone the same way again Dan Lyons New York Times bestselling author of *Disrupted* Odds are that as you read this an iPhone is within reach But before Steve Jobs introduced us to the one device as he called it a cell phone was merely what you used to make calls on the go How did the iPhone transform our world and turn Apple into the most valuable company ever Veteran technology journalist Brian Merchant reveals the inside story you won t hear from Cupertino based on his exclusive interviews with the engineers inventors and developers who guided every stage of the iPhone s creation This deep dive takes you from inside One Infinite Loop to 19th century France to WWII America from the driest place on earth to a Kenyan pit of toxic e waste and even deep inside Shenzhen s notorious suicide factories It s a firsthand look at how the cutting edge tech that makes the world work touch screens motion trackers and even AI made their way into our pockets The One Device is a roadmap for design and engineering genius an anthropology of the modern age and an unprecedented view into one of the

most secretive companies in history This is the untold account ten years in the making of the device that changed everything
