Giving Voice Meryl Alper, 2017-01-20 How communication technologies meant to empower people with speech disorders to give voice to the voiceless are still subject to disempowering structural inequalities. Mobile technologies are often hailed as a way to give voice to the voiceless. Behind the praise though are beliefs about technology as a gateway to opportunity and voice as a metaphor for agency and self representation. In *Giving Voice* Meryl Alper explores these assumptions by looking closely at one such case: the use of the Apple iPad and mobile app Proloquo2Go which converts icons and text into synthetic speech by children with disabilities including autism and cerebral palsy and their families. She finds that despite claims to empowerment the hardware and software are still subject to disempowering structural inequalities. Views of technology as a great equalizer she illustrates rarely account for all the ways that culture, law, policy and even technology itself can reinforce disparity particularly for those with disabilities. Alper explores among other things alternative understandings of voice, the surprising sociotechnical importance of the iPad case and convergences and divergences in the lives of parents across class. She shows that working class and low income parents understand the app and other communication technologies differently from upper and middle class parents and that the institutional ecosystem reflects a bias toward those more privileged. Handing someone a talking tablet computer does not in itself give that person a voice. Alper finds that the ability to mobilize social, economic and cultural capital shapes the extent to which individuals can not only speak but be heard.

Mobile Assisted Language Learning Across Educational Contexts Valentina Morgana, Agnes Kukulska-Hulme, 2021-02-10 This concise collection critically reflects on mobile assisted language learning research across educational stages from early childhood through to university settings. The volume traces the development of MALL practices through researchers and teachers' efforts to make sense of the impact of mobile technologies on formal and informal second language learning and development. The chapters explore a range of topics around mobile learning design, implementation and affordances across different educational and geographic contexts drawing on both qualitative and quantitative perspectives. In so doing the book creates a broader conversation around the importance of continuity in the successful integration of MALL practices into L2 learning curricula across the educational lifespan. This book will appeal to students and scholars in applied linguistics and language teaching and learning especially to those with a specific interest in mobile technologies.
