

THE SIMPLE LIGHTING LED BUYING GUIDE

WHAT IS AN LED?

An LED (light emitting diode) is a modern, efficient lighting. The latest LEDs rival halogen bulbs for light quality but with loads of added benefits. LED bulbs are eco friendly, containing efficient, have an average lifespan of 25,000 hours and can save up to 90% in your energy costs!

ALL ABOUT THE BASE?

Generally, most people are surprised to find that there are quite so many different bulb fittings around. But this is a good thing. The most important bit is the current size and shape to choose your new bulb.

The ones below are the most common household bulbs, take a look at your current bulb and compare to the pic to see what you need.

Now you know your fitting, either click on the relevant link below, or read on to find out more about choosing the perfect bulb...

AREN'T THE SHAPES ALL THE SAME?

Actually no, they aren't. Although a lot about bulb shape does come down to the current size and shape to choose your new bulb.

Each of the different shapes provides a slightly different spread and angle of light. Spotlights will cast a narrow, direct beam of light, whereas a golf bulb

it's also worth considering how the fitting will look even when off, some lamps benefit from a more active design. For example, a golf bulb might work best in a multiple fittings, smaller bulbs such as a golf might work best in a

WHAT'S A LUMEN?

The unfamiliar lumen can be off putting when deciding to switch to LED, but as legislation changes and more bulbs become the only option, it's

Back when we all had incandescent, the most important factor was the wattage. Higher wattage meant brighter light. But a 60W incandescent bulb is not a 60W LED bulb. The chart below shows how many bulbs you would want when switching. For example, if you want a 60W LED for the same brightness,

So, that's not too hard, but let's not forget the watts completely! Watts are still important when it comes to energy use. The lower the wattage, the less energy it takes to run. Hint: The lower the watts the cheaper it is to run.

DO I NEED TO KNOW ABOUT COLOUR TEMPERATURE?

Yes, you do! Colour temperature is another thing that is, for the most part, new to your home. It's a way of measuring the light that a bulb gives off. It's measured in Kelvin (K) and is a way of measuring the light that a bulb gives off. It's measured in Kelvin (K) and is a way of measuring the light that a bulb gives off.

A lot of people prefer the soft, artificial glow of incandescents. It's what we've used to and what we associate with feeling like home. A colour temperature of 2700K is a warm, soft, yellowish light. A 4000K is a bright, white light. A 6000K is a very bright, white light. A 7000K is a very bright, white light.

"Daylight" refers to a light that is similar to a sunny day outside, most people still find this a bit bright for in the home. Especially if you're a fan of cozy evenings in.

WHICH ROOM?

Now you've cracked the lumen, it's time to figure out what that means for you and how to use it. For example, a 25W LED bulb is a good choice for a bedroom or a bathroom. A 40W LED bulb is a good choice for a living room or a kitchen. A 60W LED bulb is a good choice for a dining room or a kitchen.

Cool white bulbs are fab for functional rooms, such as the kitchen or bathroom, as the clear, bright light works better for task lighting and beauty.

If you're using multiple bulbs in one fitting, then we recommend a lumen rating of around 4000lm per bulb if you have just the one bulb in a hanging fixture, or for something a bit brighter, around the 5000lm mark should do it.

WARM WHITE

COOL WHITE

Now you know everything you need to know

and more info on how to buy the right LED bulb for you. <http://www.lighting.co.uk>
