Frontiers in Civil and Hydraulic Engineering, Volume 2 Mohamed A. Ismail, Hazem Samih Mohamed, 2023-03-23 Frontiers in Civil and Hydraulic Engineering focuses on the research of architecture and hydraulic engineering in civil engineering. The proceedings feature the most cutting edge research directions and achievements related to civil and hydraulic engineering. Subjects in the proceedings include Engineering Structure Intelligent Building Structural Seismic Resistance Monitoring and Testing Hydraulic Engineering Engineering Facility. The works of this proceedings can promote development of civil and hydraulic engineering resource sharing flexibility and high efficiency. Thereby promote scientific information interchange between scholars from the top universities research centers and high tech enterprises working all around the world.

Assessing the Use of Agent-Based Models for Tobacco Regulation Institute of Medicine, Board on Population Health and Public Health Practice, Committee on the Assessment of Agent-Based Models to Inform Tobacco Product Regulation, 2015-07-17 Tobacco consumption continues to be the leading cause of preventable disease and death in the United States. The Food and Drug Administration (FDA) regulates the manufacture, distribution, and marketing of tobacco products, specifically cigarettes, cigarette tobacco, roll your own tobacco, and smokeless tobacco, to protect public health and reduce tobacco use in the United States. Given the strong social component inherent to tobacco use, onset, cessation, and relapse, and given the heterogeneity of those social interactions, agent-based models have the potential to be an essential tool in assessing the effects of policies to control tobacco. *Assessing the Use of Agent-Based Models for Tobacco Regulation* describes the complex tobacco environment, discusses the usefulness of agent-based models to inform tobacco policy and regulation, presents an evaluation framework for policy-relevant agent-based models, examines the role and type of data needed to develop agent-based models for tobacco regulation, provides an assessment of the agent-based model developed for FDA, and offers strategies for using agent-based models to inform decision making in the future. **Discourses, Agency and Identity in Malaysia** Zawawi Ibrahim, Gareth Richards, Victor T. King, 2021-10-23 This book seeks to break new ground both empirically and conceptually in examining discourses of identity formation and the agency of critical social practices in Malaysia. Taking an inclusive cultural studies perspective, it questions the ideological narrative of race and ethnicity that dominates explanations of conflicts and cleavages in the Malaysian context. The contributions are organized in three broad themes: Identities in Contestation, Borders, Complexities, and Hybridities; takes a range of empirical studies, literary translation, religion, gender, ethnicity, indigeneity, and sexual orientation to break down preconceived notions of fixed identities. This then opens up an examination of Identities and Movements, Agency and Alternative Discourses, in which contributors deal with counter-hegemonic social movements of anti-racism, young people, environmentalism, and independent publishing that explicitly seek to open up greater critical democratic space within the Malaysian polity. The third section, Identities and Narratives, Culture and the Media, then provides a close textual reading of some exemplars of new cultural and media

practices found in oral testimonies popular music film radio programming and storytelling who have consciously created bodies of work that question the dominant national narrative This book is a valuable interdisciplinary work for advanced students and researchers interested in representations of identity and nationhood in Malaysia and for those with wider interests in the fields of critical cultural studies and discourse analysis Here is a fresh startling book to aid the task of unbinding the straitjackets of Malay Chinese and Indian with which colonialism bound Malaysia's plural inheritance and on which the postcolonial state continues to rely In it a panoply of unlikely identities Bajau liminality Kelabit philosophy Islamic feminism refugee hybridity and more finds expression and offers hope for liberation Rachel Leow University of Cambridge This book shakes the foundations of race thinking in Malaysian studies by expanding the range of cases perspectives and outcomes of identity It offers students of Malaysia an examination of identity and agency that is expansive critical and engaging and its interdisciplinary depth brings Malaysian studies into conversation with scholarship across the world Sumit Mandal University of Nottingham Malaysia This is a much needed work that helps us to take apart the colonial inherited categories of race which informed the notion of the plural society the idea of plurality without multiculturalism It complicates the picture of identity by bringing in religion gender indigeneity and sexual orientation and helps us to imagine what a truly multiculturalist Malaysia might look like Syed Farid Alatas National University of Singapore

The Oxford Handbook of the Malawi Economy Hopestone Chavula, Thomas Chataghalala Munthali, Harold P. E. Ngalawa, Boniface Dulani, 2024-09-12 The Oxford Handbook of the Malawi Economy is an essential reference material with new research contributions and insights across the different areas of economic development to shape the country's future growth and development trajectory The volume is the first publication that tries to assess the performance of the Malawi economy since independence by examining how the underpinning political and economic history and the associated policies and strategies have affected the country's long term socio economic development It captures a broad range of opinions approaches and conclusions which serve to underline both the complexity of the issues and challenges facing Malawi and the immense difficulties in tackling them Common themes emerge as many authors agree that the country needs to learn from its past experiences in terms of policy design and implementation and the need to implement dynamic policies that could spur productive and sustained growth and development by tackling challenges associated with the continuously evolving global economic environment

in enhancing per unit area production and productivity cropping intensity enhancing thereby the farmers income especially that of small and marginal farmers and providing job opportunities The genetic improvement of vegetable crops facilitate continued breeding of varieties with greater resilience to stresses and productivity is mainly dependent on overall genetic variation found in individuals belonging to the cultivated species and or ancestral species related to cultivated species of vegetable crops Since genes of interest can be tapped from plant sources for their introduction through controlled breeding processes for genetic improvement and incorporating of desirable external and internal quality traits therefore accessibility to the information about these plant genetic resources is key to the success of the breeding efforts Since there is a need of comprehensive information about the genetic resources therefore it is important to facilitate their conservation and long term sustainable use in research and improvement The comprehensive information on the availability of genetic diversity in each vegetable crop species in this volume would facilitate priority conservation in gene banks research and use in vegetable crop improvement Realizing the importance of genetic variability in the improvement of vegetable crops from the point of view of biotic and abiotic stress resistance enhanced micronutrient climate change enhanced shelf life nutraceuticals bioactive compounds especially national and international efforts further need to be stepped up for collection characterization evaluation and conservation of vegetable crops genetic resources to facilitate search for new genes research and their use in vegetable crops improvement During 21st century genomics and marker assisted tools have gained importance for hastening the crop improvement programmes by enhancing breeding efficiency Realizing that population in South Asia and Southeast Asia is facing acute problem of under and malnutrition the emphasis on dietary diversification with vegetables is therefore being stressed Besides to enhance farmers income much emphasis is being laid on development of varieties having diverse maturity growth habit resistance to diseases and insect pest to reduce the use pesticides enhanced nutrients and shelf life For these traits we have to look into landraces and wild relatives for the traits of interest Therefore it has been felt to bring out a vegetable volume with additional accessory and supplemental information analyses and specifically filtered information which can go a long way in promoting research search for new genes alleles revealing the opportunities available for exploitation of PGR in generation of cultivars to meet upcoming challenges of vegetable crop improvement and diversification and requirement of cultivars for processing nutraceutical and pharmaceutical industry which will promote contract farming This will also help identification of geographical and genetic diversity gaps for future search of new genes collections Plant Genetic Resources PGR serve as treasures of genes of interest for developing improved future vegetable varieties hybrids besides being key to scientific efforts of developing gene pyramided varieties they are important for mitigating various challenges posed by increasing population climate change and health conscious society looking for nutraceuticals The proposed vegetable volume on agro biodiversity conservation and use of plant genetic resources with information on available genetic diversity among various groups of vegetable crops and component cultivated

species with in a group of food and agriculture in all possible perspectives would be able to reflect the opportunity available for genetic engineering of vegetable crop species It will also go a long way in facilitating more predictive and productive genetic engineering programme to breed futuristic vegetable crops varieties hybrids Biology and Management of the German Cockroach Changlu Wang,Chow-Yang Lee,Michael K. Rust,2021-05-03 As a species the German cockroach is one of the most widespread indoor urban pests worldwide While numerous products have been developed to control their spread German cockroaches continue to contaminate food transmit disease and cause significant long term economic expense to homes restaurants hospitals and more Biology and Management of the German Cockroach summarises the many advances in management technology products delivery systems and basic and applied research over the past 25 years Leading researchers explain why the German cockroach is a medically important pest and how its microbiome can provide new insights on cockroach physiology and potential novel targets for control The authors also address the research from a practical standpoint detailing why baits have replaced sprays as the primary method of control and how population genetic studies allow for better understanding of cockroach dispersal and population structure Leading experts on integrated pest management IPM explore how studies on German cockroach control programs demonstrate the value and feasibility of IPM in urban environments This book provides the reader with a comprehensive understanding of the German cockroach and will be a valuable reference for researchers graduate students pest management professionals health workers and government agencies dealing with urban pests and pesticides **Directory of Corporate Counsel, 2025 Edition** In house,
