Mutations

A mutation may be defined as a permanent change in the DNA.

Mutations that affect the germ cells are transmittable to the progeny and may give rise to inherited diseases.

Mutations that arise in somatic cells are important in the genesis of cancers and some congenital malformations.

Mutations may be classified into three categories:

Genome mutations — involve loss or gain of whole chromosomes (giving rise to monosomy or trisomy)

The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and suspenseful novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
