Environmental Politics In Japan Networks Of Power And Protest:

Environmental Politics in Japan Jeffrey Broadbent, 1999-07-28 After World War Two Japan attained economic growth but suffered environmental disaster In response to massive protest in the 1960s and 1970s the Japanese government rapidly reduced the worst air and water pollution Jeffrey Broadbent's case study of industrial growth and pollution in a rural Japanese prefecture explains this response while testing political social movement and environmental theory The state conservative political party and big business pushed rampant growth until movements posed a political and disruptive challenge Then the elites passed some pollution control but also demobilized local protest quashed discontent and prevented the formation of national environmental groups Without the protest threat business stymied other government pollution control plans The interaction of material institutional and cultural factors especially informal institutions explained the dominance of actors and the pattern of outcomes Through this syncretic lens in a non Western setting this study refines our theories of the state protest movements political process and environmental problems Japan's Environmental Politics and Governance Yasuo Takao, 2016-11-03 Environmental issues stretch across scales of geographic space and require action at multiple levels of jurisdiction including the individual level community level national level and global level Much of the scholarly work surrounding new approaches to environmental governance tends to overlook the role of sub national governments but this study examines the potential of sub national participation to make policy choices which are congruent with global strategies and national mandates This book investigates the emerging actors and new channels of Japan's environmental governance which has been taking shape within an increasingly globalized international system By analysing this important new phenomenon it sheds light on the changing nature of Japan's environmental policy and politics and shows how the links between global strategies national mandates and local action serve as an influential factor in Japan's changing structures of environmental governance Further it demonstrates that decision making competencies are shared between actors operating at different levels and in new spheres of authority resulting from collaboration between state and non state actors It highlights a number of the problems challenges and critiques of the actors in environmental governance as well as raising new empirical and theoretical puzzles for the future study of governance over environmental and global issues Finally it concludes that changes in the tiers and new spheres of authority are leading the nation towards an environmentally stable future positioned within socio economic and political constraints Demonstrating that bridging policy gaps between local action national policy and global strategies is potentially a way of reinventing environmental policy this book will be of interest to students and scholars of Environmental Studies Environmental Politics and Japanese Politics **Environmental Politics in Japan, Germany, and the United States** Miranda A. Schreurs, 2003-03-13 A decade of climate change negotiations almost ended in failure because of the different policy approaches of the industrialized states Japan Germany and the United States exemplify the deep divisions that exist among states in their approaches to environmental protection

Germany is following what could be called the green social welfare state approach to environmental protection which is increasingly guided by what is known as the precautionary principle In contrast the US is increasingly leaning away from the use of environmental regulations towards the use of market based mechanisms to control pollution and cost benefit analysis to determine when environmental protection should take precedence over economic activities Internal political divisions mean that Japan sits uneasily between these two approaches Miranda A Schreurs uses a variety of case studies to explore why these different policy approaches emerged and what their implications are examining the differing ideas actors and institutions in each state *Environmental Politics and Policy in Industrialized Countries* Uday Desai, 2002 Comparative analyses of environmental policy and politics in seven major industrialized nations **International Encyclopedia of Environmental Politics** John Barry, E. Local Political Participation in Japan Dani Daigle Kida, 2018-08-06 How Do Japanese Citizens Participate Politically Most Japanese citizens perhaps with a bit of a chuckle would answer that average Japanese do not participate in politics While political attitudes in other countries have fluctuated corresponding to social political and economic climates of the times in Japan a consistently negative view of politics has persisted since the late 1960s Japanese citizens perceive their government much more critically than citizens of neighboring countries While many Japanese citizens participate in specific political acts such as signing candidate support cards attending political rallies or directly contacting politicians they largely do not view these activities as political participation Kida examines why this is the case whether there is a connection between negative views of politics and how Japanese people self identify their political participation how Japanese citizens attempt to exact change or influence policy how the government engages citizens in political participation and the relationship between citizens attitudes towards government and levels of political participation Kida explores political participation on the local level to better understand the sources of political attitudes While participation studies have been conducted in Japan most are centered in large urban areas focusing on either extreme forms of participation such as protests or concentrated on single issue participation such as the environmental or women s movements This book in contrast explores what every day regular in the system political participation looks like in a small traditional Japanese city using Oita a small city in Kyushu as a case study It focuses especially on the role local institutions and politicians play in influencing the kinds of participation available and subsequently the attitudes created about participation

Immigration and Citizenship in Japan Erin Aeran Chung, 2010-03-31 Japan is currently the only advanced industrial democracy with a fourth generation immigrant problem As other industrialized countries face the challenges of incorporating post war immigrants Japan continues to struggle with the incorporation of pre war immigrants and their descendants Whereas others have focused on international norms domestic institutions and recent immigration this book argues that contemporary immigration and citizenship politics in Japan reflect the strategic interaction between state efforts to control immigration and grassroots movements by multi generational Korean resident activists to gain rights and recognition specifically as permanently settled foreign residents of Japan Based on in depth interviews and fieldwork conducted in Tokyo Kawasaki and Osaka this book aims to further our understanding of democratic inclusion in Japan by analyzing how those who are formally excluded from the political process voice their interests and what factors contribute to the effective representation of those interests in public debate and policy

Japan's Financial Crisis Jennifer Amyx, 2013-10-31 At the beginning of the 1990s a massive speculative asset bubble burst in Japan leaving the nation's banks with an enormous burden of nonperforming loans Banking crises have become increasingly common across the globe but what was distinctive about the Japanese case was the unusually long delay before the government intervened to aggressively address the bad debt problem The postponed response by Japanese authorities to the nation's banking crisis has had enormous political and economic consequences for Japan as well as for the rest of the world This book helps us understand the nature of the Japanese government's response while also providing important insights into why Japan seems unable to get its financial system back on track 13 years later The book focuses on the role of policy networks in Japanese finance showing with nuance and detail how Japan's Finance Ministry was embedded within the political and financial worlds how

that structure was similar to and different from that of its counterparts in other countries and how the distinctive nature of Japan's institutional arrangements affected the capacity of the government to manage change. The book focuses in particular on two intervening variables that bring about a functional shift in the Finance Ministry's policy networks: domestic political change under coalition government and a dramatic rise in information requirements for effective regulation. As a result of change in these variables, networks that once enhanced policymaking capacity in Japanese finance became paralyzing networks with disastrous results. *Climate Action in a Globalizing World* Carl Cassegard, Linda Soneryd, Hakan Thorn, Asa Wettergren, 2017-05-18. The existence and urgency of global climate change is a matter of scientific consensus. Yet the global politics of climate change have been anything but consensual. In this context, a wave of global climate activism has emerged in the last decade in response to the perceived failure of the political negotiations. This book provides a unique comparative study of environmental movements in USA, Japan, Denmark, and Sweden, analyzing their interaction with the international climate institutions of the United Nations, with national governments, and with currents in the global climate movement. It documents how and why the movement evolved between the Copenhagen Summit of 2009 and the Paris Summit of 2015, altering its strategies and tactics while attracting new actors to the issue area. Further, it demonstrates how the development of global environmental networks has increased contact between environmental movements in the Global North and those from the Global South, resulting in the establishment of climate justice as a political cause and unifying frame for global climate activism.
