*The Future of Liberal Education* Timothy Burns, Peter Lawler, 2016-04-14 Liberal Education once the whole of American Higher Education has been displaced by technical training and career oriented majors But it has also suffered from the decline in genuine liberal learning found in humanities disciplines owing to specialization politicization and the adoption of new literary and psychological theories The social sciences too have arguably abandoned the kind of relentless and sometimes disturbing questioning that used to constitute the core of education In this compelling volume thirteen college educators describe in sparkling prose what liberal education is its place in a liberal democracy the very serious challenges it faces in the 21st century even from some of its alleged friends and why it is important to sustain and expand liberal education's place in American colleges and universities Proponents and critics of liberal education alike will benefit from these insightful essays This book was originally published as a special issue of Perspectives on Political Science

Martins,2024-11-15 This text offers a comprehensive analysis of the concept of the modern creative and imaginative child in Western education Drawing on archived sources and historical works it reframes childhood creativity as a social cultural and scientific construction asking how our thinking and acting toward the creative child have been produced historically The text dissects the discursive construction of creativity as a natural and developmental attribute of the child It argues that the idea of the White creative child constructed through comparative reasoning shaped by primitivism and illustrated through botanical metaphors as close to nature and the senses is a notion embedded with colonialities forming part of a Western civilizing project and entrenched power knowledge relations A compelling and original account of childhood creativity this text will appeal to researchers in arts education early childhood education curriculum studies and the history of education

*Vanishing Fish* Daniel Pauly,2019-05-28 Daniel Pauly is a friend whose work has inspired me for years Ted Danson actor ocean activist and co author of *Oceana* This wonderfully personal and accessible book by the world s greatest living fisheries biologist summarizes and expands on the causes of collapse and the essential actions that will be required to rebuild fish stocks for future generations Dr Jeremy Jackson ocean scientist and author of *Breakpoint* The world s fisheries are in crisis Their catches are declining and the stocks of key species such as cod and bluefin tuna are but a small fraction of their previous abundance while others have been overfished almost to extinction The oceans are depleted and the commercial fishing industry increasingly depends on subsidies to remain afloat In these essays award winning biologist Dr Daniel Pauly offers a thought provoking look at the state of today s global fisheries and a radical way to turn it around Starting with the rapid expansion that followed World War II he traces the arc of the fishing industry s ensuing demise offering insights into how and why it has failed With clear convincing prose Dr Pauly draws on decades of research to provide an up to date assessment of ocean health and an analysis of the issues that have contributed to the current crisis including globalization massive underreporting of catch and the phenomenon of shifting baselines in which over time important knowledge is lost about the state of the natural world Finally *Vanishing Fish* provides practical recommendations for a way forward a vision of

a vibrant future where small scale fisheries can supply the majority of the world's fish Published in Partnership with the David Suzuki Institute

**Everything for Sale? The Marketisation of UK Higher Education** Roger Brown, Helen Carasso, 2013-02-11 The marketisation of higher education is a growing worldwide trend Increasingly market steering is replacing or supplementing government steering Tuition fees are being introduced or increased usually at the expense of state grants to institutions Grants for student support are being replaced or supplemented by loans Commercial rankings and league tables to guide student choice are proliferating with institutions devoting increasing resources to marketing branding and customer service The UK is a particularly good example of this not only because it is a country where marketisation has arguably proceeded furthest but also because of the variations that exist as Scotland Wales and Northern Ireland increasingly diverge from England In *Everything for Sale* Roger Brown argues that the competitive regime that is now applicable to our Higher Education system was the logical and possibly inevitable outcome of a process that began with the introduction of full cost fees for overseas students in 1980 Through chapters including Markets and Non Markets The Institutional Pattern of Provision The Funding of Research The Funding of Student Education Quality Assurance The Impact of Marketisation Efficiency diversity and equity He shows how the evaluation and funding of research the funding of student education quality assurance and the structure of the system have increasingly been organised on market or quasi market lines As well as helping to explain the evolution of British higher education over the past thirty years the book contains some important messages about the consequences of introducing or extending market competition in universities core activities of teaching and research This timely and comprehensive book is essential reading for all academics at University level and anyone involved in Higher Education policy

**Handbook of Research on Educational Communications and Technology** J. Michael Spector, M. David Merrill, Jan Elen, M. J. Bishop, 2013-07-03 The 4th edition of the Handbook of Research on Educational Communications and Technology expands upon the previous 3 versions providing a comprehensive update on research pertaining to new and emerging educational technologies Chapters that are no longer pertinent have been eliminated in this edition with most chapters being completely rewritten expanded and updated Additionally new chapters pertaining to research methodologies in educational technology have been added due to expressed reader interest Each chapter now contains an extensive literature review documenting and explaining the most recent outstanding research including major findings and methodologies employed The Handbook authors continue to be international leaders in their respective fields the list is cross disciplinary by design and great effort was taken to invite authors outside of the traditional instructional design and technology community

**Children's Books in Print** R R Bowker Publishing, Bowker, 1999-12

Land Law and the Extractive Industries Victoria R Nalule, 2021-08-26 This book analyses the nexus between land access and the extractive industries in Africa specifically highlighting the gaps in energy land and mining laws and the practical solutions needed to settle the increasing number of land disputes in resource rich areas Access to land is essential for the

successful operation of energy and mining projects However there are often social environmental and economic issues associated with acquiring land for these projects Socially many people are relocated economically local communities are not given adequate compensation environmentally pollution negatively impacts on the agricultural and fishing industries relied on by over 80% of the local communities Against this stark background and drawing from the author's fieldwork research this book addresses the important question of whether the different land tenure systems coupled with administration and registration procedures are adequate to address the increasing land disputes in oil and mineral rich African countries

*Innovation in China* William H.A. Johnson, 2015-07-22 The word innovation is often used today regarding China as if the concept were new to the Eastern country Most people know however that China was a juggernaut in creating new technologies and at one time was the innovation king of the world but that was at least seven centuries ago Today the great oriental power is attempting once again to take the throne of innovation for its own This desire to usurp the throne which had been diligently taken by the West during the Scientific Revolution has placed an almost unrealistic emphasis on innovation In *Innovation in China The Tail of the Dragon* the author explores the issues and actors involved in making innovation the emphasis in China He uses a simple systems model of innovation and various perceptual lenses The lenses are aimed at the historical economic political legal educational and cultural elements of an innovation based society After reading the book the reader will understand more about how innovation is happening in China and by whom More importantly the reader will begin a journey of learning more about where the country is going as it relentlessly continues its drive to create an innovation based society and to become once again in terms appropriate to its history the Emperor of Innovation **Book**

**Grading With Integrity** Thomas R. Guskey, Nancy Frey, Douglas Fisher, 2024-06-20 Let evidence and integrity guide your grading practice If you want to ask a polarizing question in education ask someone their thoughts on grading Few topics have elicited more interest or opinions even though grading practices have remained relatively unchanged for years But opinions are not evidence The time has come to get it right with a fresh approach grounded in research and the principles of integrity *Grading With Integrity* introduces a measured approach to grading reform based on honesty transparency accuracy and equity with recommendations backed by clear and trustworthy evidence Addressing the many whys involved this thoughtfully organized book addresses central questions related to grading and reporting student learning covering An historical overview of grading and reporting practices A discussion of standards based and competency based grading Recommendations for reporting non academic learning goals separately from academic achievement to accurately reflect students performance Suggestions for reporting growth and improvement using specific assessments and other reporting tools An infallible argument for grading with integrity This book is a must read for K 12 classroom teachers and administrators who are looking to implement better and more defensible grading and reporting policies and practices

Let evidence and integrity be your guide to enhancing students best interests and learning success
