Changing Times Martin Chick, 2019-12-05 This is a study of how and why the British economy has changed since 1951 It covers the Golden Age of 1945-1973 when unemployment was below one million when governments built millions of council houses and flats when electricity telephones and gas were supplied by nationalised monopolies when income and wealth inequality were narrowing and when the UK was not a member of the European Economic Community Moving through the inflation rising unemployment and rapid contraction of the manufacturing industry from the mid 1970s *Changing Times* examines the transfer of assets which was effected in the privatisation of public housing and nationalised industries from the early 1980s The role of the State changed as public investment fell The financing of old age care of state pensions and of the National Health Service became of increasing concern and were less politically amenable to the approach of using private finance the Private Finance Initiative and tuition fees to fund former public obligations Changes were made to the system of taxation but public expenditure changed little as a share of national income although the government now built little Difficulties emerged in ensuring adequate housing for a growing population and uncertainty grew as to where future investment in necessities like electricity supply would come from Having narrowed in the Golden Age inequality of income and wealth widened Environmental concerns also grew from

the local smogs of the 1950s through the concern with acid rain from the 1960s to the current global concern with climate change The financial crash of 2008 and the decision to Brexit in the referendum of 2016 reduced economic growth and highlighted the extent of economic change since 1951 This is a study of that change **Called to Freedom** Elise Daniel, 2017-01-09 Conservatism Republican politics and traditional Christianity are thought by some to go together like baseball and apple pie Yet for a growing number of people libertarian political thought provides an alternative to the traditional Christian right That number includes the six young authors of this book who explore and expound the case that one can be both a Christian and a libertarian Called to Freedom explores the major points of tension between the Christian faith and political liberty to demonstrate why the two can coexist in harmony Through their own personal experiences and from six different perspectives the authors offer both thoughtful arguments and encouragement to anyone navigating the space between Christianity and libertarianism It is in that space that the authors have found a home one that prioritizes the kingship of Jesus Christ and the inherent dignity of the people created in his image If you are a Christian exploring libertarian thought or if you feel caught between your Christian beliefs and libertarian political instincts this book is written for you Contributors Jacqueline Isaacs is the inaugural Fellow in Strategic Communication at the American Studies Program in Washington DC She earned her MBA in marketing at Johns Hopkins University and her BS in government at Oral Roberts University Jason Hughey is a certified personal trainer and group fitness instructor He earned his BA in government from Regent University in 2012 and worked for several liberty advancing nonprofits before switching to the fitness industry full time Taylor Barkley lives in Washington DC with his wife and works at a public policy organization and part time with Search Ministries He graduated from Taylor University with a degree in history and political science Leah Hughey is a graduate of Regent University where she studied government and history She works at a Christian ministry focused on fostering collaboration between charities and churches to solve social problems in the cities they serve Leah has been happily married to coauthor Jason since 2013 Philip Luca is an award winning marketing strategist working with tech companies and startups in the DC area He currently serves on the board of the American Marketing Association DC as the VP of Social Media He holds two graduate degrees from Liberty University in digital media and theology *Macroeconomic Measurement Versus Macroeconomic Theory* Merijn Knibbe, 2019-12-06 Ideally scientific theory and scientific measurement should develop in tandem but in recent years this has not been the case in economics There used to be a time when leading economists or their students established or led statistical offices and took care that the measurements were consistent with the theory and vice versa Not anymore Macroeconomic theorists and macroeconomic statisticians do not even speak the same language any longer They do use the same words such as consumption investments or unemployment but the meanings can often be different This book maps the differences between macroeconomic theory and measurement and explores them in some detail while also tracking their intellectual historical and in some cases ideological origins It also explores the possible policy

implications In doing so the book draws on two separate strands of literature which are seldom used in unison macro statistical manuals and theoretical macro papers By doing so the book contributes to the effort to bridge the gap between them without compromising on the idea that a meaningful science of economics should in the end be based upon individual people and households and their social and cultural embedding instead of a representative consumer or Robinson Crusoe figure This work is essential reading for students economists statisticians and professionals *Respectable Banking*

Anthony C. Hotson, 2017-06-15 The financial collapse of 2007-8 has questioned our assumptions about the underlying basis for stability in the financial system and Anthony Hotson here offers an important reassessment of the development of London's money and credit markets since the great currency crisis of 1695 He shows how this period has seen a series of intermittent financial crises interspersed with successive attempts to find ways and means of stabilizing the system He emphasises in particular the importance of various principles of sound banking practice developed in the late nineteenth century that helped to stabilize London's money and credit markets He shows how these principles informed a range of market practices that limited aggressive forms of funding and discouraged speculative lending A tendency to downplay the importance of these regulatory practices encouraged a degree of complacency about their removal with consequences right through to the present day *Girt by Sea* Rebecca Strating, Joanne Wallis, 2024-04-03 A clear eyed examination of how

Australia should approach the complex security challenges at play in its maritime domain Security starts at home Australia has drawn closer to many of its Asia Pacific neighbours in recent years but when push comes to shove it continues to look well beyond the oceans and regions that surround it to the distant horizons of Europe and North America for its ultimate security guarantee In *Girt by Sea* international relations experts Rebecca Strating and Joanne Wallis instead turn their gazes to Australia's near region focusing on the six maritime domains central to its national interests the north seas the Timor Arafura and Coral Seas and the Torres Strait the Western Pacific the South China Sea the South Pacific the Indian Ocean and the Southern Ocean In so doing they reimagine how Australia should understand its strategic challenges and find lasting security **Money Creation in Fiat and Digital Currency Systems** Mr. Marco Gross, Christoph

Siebenbrunner, 2019-12-20 To support the understanding that banks' debt issuance means money creation while centralized nonbank financial institutions and decentralized bond market intermediary lending does not the paper aims to convey two related points First the notion of money creation as a result of banks' loan creation is compatible with the notion of liquid funding needs in a multi bank system in which liquid fund reserve transfers across banks happen naturally Second interest rate based monetary policy has a bearing on macroeconomic dynamics precisely due to that multi bank structure It would lose its impact in the hypothetical case that only one singular commercial bank would exist We link our discussion to the emergence and design of central bank digital currencies CBDC with a special focus on how loans would be granted in a CBDC world *Transfer State* Peter Sloman, 2019 This book provides the first detailed history of guaranteed income

schemes in modern Britain It examines past and present British social policy debate to argue that the case for recasting the UK's transfer state to incorporate a Universal Basic Income is increasingly powerful

proton beams were more effective than less costly alternatives But developers expected insurance to cover their centers staggeringly high costs and debts Was speculation like this new to health care Cancer Radiation Therapy and the Market shows how the radiation therapy specialty in the United States later called radiation oncology coevolved with its device industry throughout the twentieth century Academic engineers and physicians acquired financing to develop increasingly powerful radiation devices initiated companies to manufacture the devices competitively and designed hospital and freestanding procedure units to utilize them In the process they incorporated market strategies into medical organization and practice Although palliative benefits and striking tumor reductions fueled hopes of curing cancer scientific research all too often found serious patient harm and disappointing beneficial impact on cancer survival This thoroughly documented and provocative inquiry concludes that public health policy needs to re evaluate market driven high tech medicine and build evidence based health care systems

India after Naxalbari Bernard D'Mello, 2018-07-23 How the 1967 uprising at Naxalbari inspired a generation of resistance across India and the South Asian subcontinent Although the 1967 revolutionary armed peasant uprising in Naxalbari at the foot of the Indian Himalayas was brutally crushed the insurgency gained new life elsewhere in India In fact this revolt has turned out to be the world's longest running people's war and Naxalbari has come to stand for the road to revolution in India What has gone into the making of this protracted Maoist resistance Bernard D Mello's fascinating narrative answers this question by tracing the circumstances that gave rise to India's 1968 decade of revolutionary humanism and those that led to the triumph of the 1989 era of appallingly unequal growth condoned by Hindutva nationalism the Indian variant of Nazism Will what remain of India's continuing 1968 bring twenty first century New Democracy to the collective agenda Or will the ongoing regression of 1989 lead the way to full blown semi fascism and sub imperialism India after Naxalbari is far more than a simple history of the ongoing Naxalite Maoist resistance it is a deeply passionate and informed work that not only captures the essence of modern Indian history but also tries to comprehend the present in the context of that history so that the oppressed can exercise their power to influence its shape and outcome
