**Nanyang** Wang Gungwu, 2018-05-03 This volume is a book of reflections and encounters about the region that the Chinese knew as Nanyang. The essays in it look back at the years of uncertainty after the end of World War II and explore the period largely through images of mixed heritages in Malaysia and Singapore. They also look at the trends towards social and political divisiveness following the years of decolonization in Southeast Asia. Never far in the background is the struggle to build new nations during four decades of an ideological Cold War and the Chinese determination to move from near collapse in the 1940s and out of the traumatic changes of the Maoist revolution to become the powerhouse that it now is.

**Chinese Theatre Troupes in Southeast Asia** Beiyu Zhang, 2021-05-27 A detailed account of the cultural history of the Chinese diaspora with a focus on the performers and audiences who were involved in the making of Chinese performing cultures in Southeast Asia. Focusing on five different kinds of theatre troupes from China and their respective travels in Singapore, Bangkok, Malaya, and Hong Kong, Zhang examines their different travelling experiences and divergent cultural practices. She thus sheds light on how transnational mobility was embodied, practised, and circumscribed in the course of troupes travelling, sojourning, and interacting with diasporic communities. These troupes communicated diverse discourses and ideologies influenced by different social and political movements in China, and these meanings were further altered by transmission. By unpacking multiple ways of performing Chineseness that was determined by changing time-space constructions, this volume provides valuable insight for scholars of the Chinese Diaspora.

*Transnational History and Performing Arts in Asia* **Diaspora's Homeland** Shelly Chan, 2018-03-15 In *Diaspora's Homeland*, Shelly Chan provides a broad historical study of how the mass migration of more than twenty million Chinese overseas influenced China's politics, economics, and culture. Chan develops the concept of diaspora moments, a series of recurring disjunctions in which migrant temporalities come into tension with local, national, and global ones to map the multiple historical geographies in which the Chinese homeland and diaspora emerge. Chan describes several distinct moments, including the lifting of the Qing emigration ban in 1893, intellectual debates in the 1920s and 1930s about whether Chinese emigration constituted colonization, and whether Confucianism should be the basis for a modern Chinese identity, as well as the intersection of gender, returns, and Communist campaigns in the 1950s and 1960s. Adopting a transnational frame, Chan

narrates Chinese history through a reconceptualization of diaspora to show how mass migration helped establish China as a nation state within a global system *Translating China as Cross-Identity Performance* James St. André, 2018-05-31 James St Andr applies the perspective of cross identity performance to the translation of a wide variety of Chinese texts into English and French from the eighteenth to the twentieth centuries Drawing on scholarship in cultural studies queer studies and anthropology the author argues that many cross identity performance techniques including blackface passing drag mimicry and masquerade provide insights into the history of translation practice He makes a strong case for situating translation in its historical social and cultural milieu reading translated texts alongside a wide variety of other materials that helped shape the image of John Chinaman A reading of the life and works of George Psalmanazar whose cross identity performance as a native of Formosa enlivened early eighteenth century salons opens the volume and provides a bridge between the book s theoretical framework and its examination of Chinese European interactions The core of the book consists of a chronological series of cases each of which illustrates the use of a different type of cross identity performance to better understand translation practice St Andr provides close readings of early pseudotranslations including Marana s Turkish Spy 1691 and Goldsmith s Citizen of the World 1762 as well as adaptations of Hatchett s The Chinese Orphan 1741 and Voltaire s Orphelin de la Chine 1756 Later chapters explore Davis s translation of Sorrows of Han 1829 and genuine translations of nonfictional material mainly by employees of the East India Company The focus then shifts to oral aural aspects of early translation practice in the nineteenth century using the concept of mimicry to examine interactions between Pidgin English and translation in the popular press Finally the work of two early modern Chinese translators Gu Hongming and Lin Yutang is examined as masquerade Offering an original and innovative study of genres of writing that are traditionally examined in isolation St Andr s work provides a fascinating examination of the way three cultures interacted through the shifting encounters of fiction translation and nonfiction and in the process helped establish and shape the way Chinese were represented The book represents a major contribution to translation studies Chinese cultural studies postcolonial studies and gender criticism *Ethnicities, Personalities And Politics In The Ethnic Chinese Worlds* Ching-hwang Yen, 2016-08-18 The rise of the economic power of the ethnic Chinese known also as overseas Chinese Chinese overseas or Chinese diaspora was a late 20th century phenomenon It was partly the result of the rise of the Four Little Asian Dragons in the 1970s and was speeded up by the tempo of globalization towards the end of that century This book explores the ethnic identity and boundary of the Chinese as minority groups in foreign lands and as sub groups among the Chinese themselves It examines prominent personalities that had wielded considerable influence in the ethnic Chinese communities in the economic social and educational arenas It also discusses the type of politics that had impacted their relationship with their mother country China Containing 16 papers presented at various international conferences in Singapore Malaysia Hong Kong China and Taiwan as keynote speeches and research findings which are predominantly unpublished in English this book provides fresh

perspectives and re interpretations on the issues of ethnicity leadership and politics in the ethnic Chinese worlds

*Sinicization and the Rise of China* Peter J. Katzenstein, 2013-03-01 China's rise and processes of Sinicization suggest that recombination of new and old elements rather than a total rupture with or return to the past is China's likely future. In both space and time, civilizational politics offers the broadest social context. It is of particular salience in China. Reification of civilizations into simple categories such as East and West is widespread in everyday politics and common in policy and academic writings. This book's emphasis on Sinicization as a specific instance of civilizational processes counters political and intellectual shortcuts and corrects the mistakes to which they often lead. Sinicization illustrates that like other civilizations, China has always been open to variegated social and political processes that have brought together many different kinds of peoples adhering to very different kinds of practices. This book tries to avoid the reifications and celebrations that mark much of the contemporary public debate about China's rise. It highlights instead complex processes and political practices bridging East and West that avoid easy shortcuts. The analytical perspectives of this book are laid out in Katzenstein's opening and concluding chapters. They are explored in six outstanding case studies written by widely known authors which cover questions of security, political economy and culture. Featuring an exceptional line up and representing a diversity of theoretical views within one integrative perspective, this work will be of interest to all scholars and students of international relations, sociology and political science. Chapter 7 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license.

*The Business of Culture* Christopher Rea, Nicolai Volland, 2014-12-15 From the late nineteenth to the mid twentieth century, changing technologies and growing transregional ties provided unprecedented opportunities for the entrepreneurially minded in China and Southeast Asia. *The Business of Culture* examines the rise of Chinese cultural entrepreneurs, people who risked financial well being and reputation by investing in multiple cultural enterprises in the late nineteenth and twentieth centuries. Rich in biographical detail, the interlinked case studies featured in this volume introduce three distinct archetypes: the cultural personality, the tycoon, and the collective enterprise. These portraits reveal how changes in social and economic conditions created the fertile soil for business success, conditions that are similar to those emerging in China today.

It details the evolution of the vernacular press and its resulting conflicts with colonial forces. It also examines the development of modern Indonesian society.

*Moral Purity and Persecution in History* Barrington Moore Jr., 2021-09-14 The intellectual scope and courage to contend with the largest puzzles of human existence and organization distinguish great social thinkers. Barrington Moore's *Social Origins of Dictatorship and Democracy* was a foundational work of historical sociology that influenced a generation of social scientists and decades later continues to be widely read and

taught Here Moore takes up the same tools of historical comparison to investigate why groups of people kill and torture each other His answer is arrestingly simple people persecute those whom they perceive as polluting due to their impure religious political or economic ideas Moore s search begins with the Old Testament s restrictions on sexual behavior idolatry diet and handling unclean objects He argues that religious authorities seeking to distinguish the ancient Hebrews from competing groups invented along with monotheism the association of impure things with moral failure and the violation of God s will This allowed people to view those holding competing ideas as contaminated and more important contaminating Moore moves next to the French Wars of Religion in which Protestants and Catholics massacred each other over the control of purity and the French Revolution which perfected terror and secularized purity He then combs the major Asian religions and finds to his surprise that violent efforts to eradicate the impure were largely absent before substantial Western influence Moore s provocative conclusion is that monotheism with its monopoly on virtue and failure to provide supernatural scapegoats is responsible for some of the most virulent forms of intolerance and is a major cause of human nastiness and suffering Moore does not say that the monotheist tradition was the primary source of Nazism Stalinism Maoism violent Hindu fundamentalism or ethnic cleansing in Rwanda and the former Yugoslavia but he does identify it as an indispensable cause because it justified encouraged and spread vindictive persecution throughout the world Once again Moore has drawn on his comprehensive understanding of history and talent for speaking directly to readers to address one of the most crucial questions about human past and future This book is for anyone who has ever heard the word genocide and asked why
