Essential Joseph Beuys Alain Borer:

The Essential Joseph Beuys Alain Borer, Lothar Schirmer, 1996 Celebrates the forty year oeuvre of one of the most important and influential visual artists of the postwar era **Werkübersicht 1945-1985** Joseph Beuys, 2015-10 *Joseph Beuys* Claudia Mesch, 2017-04-15 Joseph Beuys is one of the most important and controversial German artists of the late twentieth century an artist whose persona and art is so tightly interwoven with Germany's fascist past Beuys was after all a former soldier in the Third Reich that he has been a problematic figure for postwar and post reunification Germany In illuminating the centrality of trauma and the sustained investigation of the notion of art as the two defining threads in Beuys's life and art this book offers a critical biography that deepens our understanding of his many works and their contribution Claudia Mesch analyzes the aspects of Beuys's works that have most offended audiences especially the self woven legend of redemption that many have felt was a dubious and inappropriate fantasy for a former Nazi soldier to engage As she argues however Beuys's self mythology confronted post traumatic life head on foregrounding a struggle for psychic recovery Following Beuys's exhibitions in the 1970s she traces how he both expanded the art world beyond the established regional centers and paved the way for future artists interested in activism as art Exploring Beuys's expansive conceptions of what art is and following him into the realms of science politics and spirituality Mesch ultimately demonstrates the ways that his own myth making acted as a positive force in the Germany's postwar reckoning with its past *Natural Materials of the Holy Land and the Visual Translation of Place, 500-1500* Renana Bartal, Neta Bodner, Bianca Kuhnel, 2017-04-21 *Natural Materials of the Holy Land and the Visual Translation of Place 500-1500* focuses on the unique ways that natural materials carry the spirit of place Since early Christianity wood earth water and stone were taken from *loca sancta* to signify them elsewhere Academic discourse has indiscriminately grouped material tokens from holy places and their containers with architectural and topographical emulations two dimensional images and bodily relics However unlike textual or visual representations natural materials do not describe or interpret the Holy Land they are part of it Tangible and timeless they realize the meaning of their place of origin in new locations What makes earth stones or bottled water transported from holy sites sacred How do they become *pars pro toto* signifying the whole from which they were taken This book will examine natural media used for translating *loca sancta* the processes of their sanctification and how although inherently abstract they become charged with meaning It will address their metamorphosis natural or induced how they change the environment to which they are transported their capacity to translate a static and distant site elsewhere the effect of their relocation on users viewers and how their containers and staging are used to communicate their substance **To Life!** Linda Weintraub, 2012-09-01 *To Life Eco Art in Pursuit of a Sustainable Planet* documents the burgeoning eco art movement from A to Z presenting a panorama of artistic responses to environmental concerns from Ant Farm's anti consumer antics in the 1970s to Marina Zurkow's 2007 animation that anticipates the havoc wreaked upon the planet by global warming This text is

the first international survey of twentieth and twenty first century artists who are transforming the global challenges facing humanity and the Earth s diverse living systems Their pioneering explorations are situated at today s cultural scientific economic spiritual and ethical frontiers The text guides students of art design environmental studies and interdisciplinary studies to integrate environmental awareness responsibility and activism into their professional and personal lives The Utopian Globalists Jonathan Harris,2013-02-25 THE UTOPIAN GLOBALISTS Crossing continents historical periods and cultural genres Jonathan Harris skilfully traces the evolution of utopian ideals from early modernism to the spectacularised and biennialised or banalised as some would say contemporary art world of today Michael Asbury University of the Arts London The Utopian Globalists is the second in a trilogy of books by Jonathan Harris examining the contours forces materials and meanings of the global art world along with its contexts of emergence since the early twentieth century The first of the three studies Globalization and Contemporary Art Wiley Blackwell 2011 anatomized the global art system through an extensive anthology of over 30 essays contextualized through multiple thematic introductions The final book in the series Contemporary Art in a Globalized World forthcoming Wiley Blackwell combines the historical and contemporary perspectives of the first and second books in an account focused on the mediatizations shaping and representing contemporary art and its circuits of global production dissemination and consumption This innovative and revealing history examines artists whose work embodies notions of revolution and human social transformation The clearly structured historical narrative takes the reader on a cultural odyssey that begins with Vladimir Tatlin s constructivist model for a Monument to the Third International 1919 a statement of utopian globalist intent via Picasso s 1940s commitment to Soviet communism and John and Yoko s Montreal Bedin to what the author calls the late globalism of the Unilever Series at London s Tate Modern The book maps the ways artists and their work engaged with and offered commentary on modern spectacle in both capitalist and socialist modernism throughout the eras of the Russian Revolution the Cold War and the increasingly globalized world of the past 20 years In doing so Harris explores the idea that the utopian globalist lineage in art remains torn between its yearning for freedom and a deepening identification with spectacle as a media commodity to be traded and consumed *The German Genius* Peter Watson,2010-09-16 From the end of the Baroque age and the death of Bach in 1750 to the rise of Hitler in 1933 Germany was transformed from a poor relation among western nations into a dominant intellectual and cultural force more influential than France Britain Italy Holland and the United States In the early decades of the 20th century German artists writers philosophers scientists and engineers were leading their freshly unified country to new and undreamed of heights and by 1933 they had won more Nobel prizes than anyone else and more than the British and Americans combined But this genius was cut down in its prime with the rise and subsequent fall of Adolf Hitler and his fascist Third Reich a legacy of evil that has overshadowed the nation s contributions ever since Yet how did the Germans achieve their pre eminence beginning in the mid 18th century In this fascinating cultural history Peter Watson goes back through time to explore the origins of the

German genius how it flourished and shaped our lives and most importantly to reveal how it continues to shape our world As he convincingly demonstrates while we may hold other European cultures in higher esteem it was German thinking from Bach to Nietzsche to Freud that actually shaped modern America and Britain in ways that resonate today Visual Culture in Twentieth-century Germany Gail Finney, 2006 Visual Culture in Twentieth Century Germany explores a wide spectrum of visual media in 20th century Germany in their critical and social contexts Contributors examine film photography cabaret performances advertising architecture painting dance television and cartography Blind Memory Marcus Wood, 2000 A study of Atlantic slavery generated by the visual arts It considers in detail four sites which have generated particularly influential imagery the middle passage flight escape slave torture punishment and the popular imagery which evolved around Stowe's classic abolition text Uncle Tom's Cabin **Joseph Beuys and the Celtic World** Sean Rainbird, 2005-05-24 Published to accompany an exhibition at Tate Modern *Beneath Another Sky* Norman Davies, 2017-12-07 He writes history like nobody else He thinks like nobody else He sees the world as a whole with its limitless fund of stories Bryan Appleyard Sunday Times Where have the people in any particular place actually come from What are the historical complexities in any particular place This evocative historical journey around the world shows us Human history is a tale not just of constant change but equally of perpetual locomotion writes Norman Davies Throughout the ages men and women have endlessly sought the greener side of the hill Their migrations collisions conquests and interactions have given rise to the spectacular profusion of cultures races languages and polities that now proliferates on every continent This incessant restlessness inspired Davies's own After decades of writing about European history and like Tennyson's ageing Ulysses longing for one last adventure he embarked upon an extended journey that took him right round the world to a score of hitherto unfamiliar countries His aims were to test his powers of observation and to revel in the exotic but equally to encounter history in a new way Beneath Another Sky is partly a historian's travelogue partly a highly engaging exploration of events and personalities that have fashioned today's world and entirely sui generis Davies's circumnavigation takes him to Baku the Emirates India Malaysia Mauritius Tasmania Tahiti Texas Madeira and many places in between At every stop he not only describes the current scene but also excavates the layers of accumulated experience that underpin the present He tramps round ancient temples and weird museums summarises the complexity of Indian castes Austronesian languages and Pacific explorations delves into the fate of indigenous peoples and of a missing Malaysian airliner reflects on cultural conflict in Cornwall uncovers the Nazi origins of Frankfurt airport and lectures on imperialism in a desert oasis Everything has its history he writes including the history of finding one's way or of getting lost The personality of the author comes across strongly wry romantic occasionally grumpy but with an endless curiosity and appetite for knowledge As always Norman Davies watches the historical horizon as well as what is close at hand and brilliantly complicates our view of the past *The Art of Being Human* Deborah Ravetz, 2016-11-21 Deborah Ravetz explores the territory of our inner landscape by showing us that it is only

through embracing and working with all aspects of our selves including our vulnerability and pain that we give meaning and experience joy Through telling her own story and those of others who have faced their demons and worked through their struggles she helps us to embark on the journey that all of us need to make in order to become fully ourselves Packed with applicable strategies for spiritual development and practice this book serves to empower and cultivate holistic wellbeing

The Aesthetics of Mythmaking in German Postwar Culture André Fischer,2024-03-15 Myths are a central part of our reality But merely debunking them lets us forget why they are created in the first place and why we need them Andr Fischer draws on key examples from German postwar culture from novelists Hans Henny Jahnn and Hubert Fichte to sculptor and performance artist Joseph Beuys and filmmaker Werner Herzog to show that mythmaking is an indispensable human practice in times of crisis Against the background of mythologies based in nineteenth century romanticism and their ideological continuation in Nazism fresh forms of mythmaking in the narrative visual and performative arts emerged as an aesthetic paradigm in postwar modernism Boldly rewriting the cultural history of an era and setting in transition The Aesthetics of Mythmaking in German Postwar Culture counters the predominant narrative of an exclusively rational Vergangenheitsbewältigung coming to terms with the past Far from being merely reactionary the turn toward myth offered a dimension of existential orientation that had been neglected by other influential aesthetic paradigms of the postwar period Fischer's wide ranging transmedia account offers an inclusive perspective on myth beyond storytelling and instead develops mythopoesis as a formal strategy of modernism at large

Performing the East Amy Bryzgel,2013-05-30 Performance art in Western Europe and North America developed in part as a response to the commercialisation of the art object as artists endeavoured to create works of art that could not be bought or sold But what are the roots of performance art in Eastern Europe and Russia where there was no real art market to speak of While many artworks created in the East may resemble Western performance art practices their origins as well as their meaning and significance is decidedly different By placing specific performances from Russia Latvia and Poland from the late and post communist periods within a local and international context this book pinpoints the nuances between performance art East and West Performance art in Eastern Europe is examined for the first time as agent and chronicle of the transition from Soviet and satellite states to free market democracies Drawing upon previously unpublished sources and exclusive interviews with the artists themselves Amy Bryzgel explores the actions of the period from Miervaldis Polis's Bronze Man to Oleg Kulik's Russian Dog performances Bryzgel demonstrates that in the late 1980s and early 1990s performance art in Eastern Europe went beyond the modernist critique to express ideas outside the official discourse shocking and empowering the citizenry both effecting and mirroring the social changes taking place at the time Performing the East opens the way to an urgent reassessment of the history function and meaning of performance art practices in East Central Europe

Erik Satie: Music, Art and Literature Caroline Potter,2016-05-13 Erik Satie 1866 1925 was a quirky innovative and enigmatic composer whose impact has spread far

beyond the musical world As an artist active in several spheres from cabaret to religion from calligraphy to poetry and playwriting and collaborator with some of the leading avant garde figures of the day including Cocteau Picasso Diaghilev and Ren Clair he was one of few genuinely cross disciplinary composers His artistic activity during a tumultuous time in the Parisian art world situates him in an especially exciting period and his friendships with Debussy Stravinsky and others place him at the centre of French musical life He was a unique figure whose art is immediately recognisable whatever the medium he employed Erik Satie Music Art and Literature explores many aspects of Satie s creativity to give a full picture of this most multifaceted of composers The focus is on Satie s philosophy and psychology revealed through his music Satie s interest in and participation in artistic media other than music and Satie s collaborations with other artists This book is therefore essential reading for anyone interested in the French musical and cultural scene of the late nineteenth and early twentieth century

Notes on Participatory Art Gustaf Almenberg,2010-12-02 We are living in the Age of Participation Social media are exploding customer cooperation is sought in product development and customer content is even built into media But where is the art reflecting our times Where are the artists making this kind of art Who were their predecessors In this book the author traces the roots of Participatory Art from Duchamp Mondrian and Moholy Nagy via less well known artists like Lygia Clark and Charlotte Posenenske as well as via better known artists like Joseph Beuys andyvind Fahlstrm to contemporary artists showing an interest in participation like Olafur Eliasson and Antony Gormley Participation is the most important thing that has happened in art Gormley said in 2009 What then is Participatory Art After around 40 years of practice the author tries to distill the essential principles in 10 suggestions for a Manifesto Most central is its focus on the unfolding creative moment itself and on the creativity of the spectator

The Figure of the Shaman in Contemporary British Poetry Shamsad Mortuza,2014-08-11 This genealogical study focuses on the work of five contemporary British poets in order to locate them in a counter cultural tradition that is informed by strategic responses to state terrorism It identifies some historical moments of ruptures such as the persecution of the Celtic druids by the Romans the killing of the Welsh bards by Edward I the appropriation of bardic materials by Romantic poets writing in a post French Revolution era and the beatnik response to a post World War bipolar world in order to contextualise and discuss the poets of British Poetry Revival writing under Thatcherism Drawing on Mircea Eliade s notion of shamanism as archaic techniques of ecstasy these poets have transformed Eliade s version of the shaman s elective trauma and enacted a critical rejection of totalitarian tools of the state and society Categorised as the Technicians of the Sacred and the Technicians of the Body these shamanic poets include Iain Sinclair Jeremy Prynne Brian Catling Barry MacSweeney and Maggie O Sullivan Their poetic strategy is not a New Age fad it rather investigates and inventories the hidden energies of past and present to wrest spirituality away from the confines of religion and politics while embodying it in textual praxis
