kind of wave mechanical or electromagnetic has a certain energy Mechanical waves can be produced only in media which possess elasticity and inertia Mechanics is the study of the motion of matter and the forces required to cause its motion Mechanics is based on the concepts of time space force energy and matter The knowledge of mechanics is needed for the study of all branches of physics chemistry biology and engineering The consideration of all aspects of mechanics would be too large a task for us Instead in this course we shall study only the classical mechanics of non polar continua We shall concern ourselves with the basic principles common to fluids and solids The mechanics are a physical science since it deals with the study of physical phenomena However some associate mechanics with mathematics while many consider it as an engineering subject Both these views are justified in part Mechanics is the foundation of most engineering sciences and is an indispensable prerequisite to their study This book aim to provide the necessary foundation in wave mechanics which prepare the students for an intensive study of advanced topics at a later stage much of wave mechanics requires a good knowledge of mathematics
