Essential Readings In Comparative Politics 4th Edition:

The HISOFE Dictionary of Midnight Politics Fossungu, Peter Ateh-Afac, 2014-12-01 Building on Fossungu's earlier works and essentially providing Africa with original critical and multi level analyses of the trio of globalization democracy and national determination this book theorizes that African states have to unite in order to have any impact in the global economy Using the failure of the Cameroon Goodwill Association of Montreal CGAM as a case study the book urges Africans to make hard choices and avoid politickerization and midnight politics in favour of fossungupalogy that is the science of straightforwardness necessitating the fearless looking at truth straight in the eye The questions of the book are many but do all boil down to whether or not Africans fear the truth and do not therefore do politics It is amazing that Africans in the West live in societies where fierce political competitors do embrace each other after one has defeated the other but they are incapable of looking their so called friends in the eye and saying for example Man I think you've totally gotten it wrong this time Such comportment defines politickerization or negative competition While attempting some possible responses to the numerous queries it raises this book basically proffers the science of Four Eyesism as a discipline that all African schools need to institute and make a compulsory subject if the vandalized continent would have to be awakened to its realities This book is rich in Fossungu's dazzling capacity to invent define and use a multitude of new terminological constructs informed by African experiences

Simon, Joseph Romance, 2013-02-15 So often political science is introduced to students as a segmented field The Challenge of Politics instead enables students to see how the subfields converge around a set of crucial questions can we as citizens and students articulate and defend a view of the good political life and its guiding political values Can we develop a science of politics to help us understand significant political phenomena the empirical realities of

politics Can we bring a high level of political prudence or wisdom to bear on judgments about politics and public issues Can citizens and students creatively address the future of politics Riemer Simon and Romance aim to harmonize the valuable lessons of classic and contemporary theory as well as to reconcile politics to scientific and empirical study The book gives students an avenue to explore the impact of philosophy and ideology to recognize major forms of government to evaluate empirical findings and to understand how policy issues directly affect people's lives Throughout the authors look at political dynamics of American comparative and international affairs While continuing to pursue its distinctive normative approach and showing politics to be a potentially humanizing enterprise this new edition of Challenge has been revised and updated for major world events like the global financial crisis recent elections in the U S and elsewhere important policy decisions like the recent Supreme Court ruling in the U S on healthcare and the aftermath of the Arab Spring Based on reviewer feedback it has also been substantially streamlined throughout

Africans and Negative Competition in Canadian Factories Ateh-Afac Fossungu, 2015-02-02 According to Fossungu

we need healthy competition for progress Competition that is not geared toward progress is negative competition No competition or the absence of self help is negative competition With factories competing healthily consumers have a variety of quality goods and services from which to choose The entire community benefits when people in any grouping are competing positively thus making the rules of competition graphical The central focus of this book is the extent to which Canadian regulations apply without discrimination to all of Canada and to everyone individuals and corporations alike A swift answer is affirmative But is that really it The book is also about voluntary slavery which is worse than forced enslavement Drawing on Ignorance Theory the book argues that the worst thing that can happen to anyone is to be ignorant of ones ignorance He who does not know what he does not know will never know Voluntary African slaves generally employ One Has No Choice On na pas le choix to cloak their having chosen not to secure their rights Fossungu demonstrates why he considers this an escapist way of shying away from doing the normal thing thus giving the dictator or oppressor reason to dictate and oppress with impunity This is Fossungu at his provocative and controversial best *Direito e Justiça: Estudos em Homenagem ao Ministro Sérgio Kukina* CLAYTON DE ALBUQUERQUE MARANHÃO, CAROLINE AMADORI CAVET, 2025-04-22 O livro *Direito e Justiça: Estudos em Homenagem ao Ministro Sérgio Kukina* uma coletânea de artigos jurídicos coordenada por Clayton de Albuquerque Maranhão e Caroline Amadori Cavet A obra reúne contribuições de ministros desembargadores procuradores advogados e acadêmicos que destacam a trajetória e o impacto da judicatura do homenageado na evolução do direito brasileiro *The Rise of Comparative Policing* Jacques de Maillard, Sebastian Roché, 2021-08-26 This book argues that policing should be studied in a truly comparative manner as a way of identifying more accurately the diverse features of police organisations and the trends which affect contemporary policing Studying policing comparatively is also a way to develop more sophisticated theories on the relations between police state and society aiming at higher degree of generalization In particular broadening the empirical basis often limited to Western countries favours the formulation of more encompassing theories The comparative analysis then is used to refine meso or macro theories on various aspects of policing The book covers the challenges of comparative research in diverse areas of policing studies with innovative tools and approaches to allow for the development of that subfield of policing It is a significant new contribution to policing studies and will be a great resource for academics researchers and advanced students of Public Policy Sociology Political Science and Law The chapters in this book were originally published in *Policing and Society* **Mobilizing Regions, Mobilizing Europe** Sebastian M. Buettner, 2013-10-23 Regional development strategies are becoming more similar all around Europe even though regional differences are more pronounced than ever and many European regions have become more autonomous actors This thesis of a peculiar standardized diversification of sub national space in the modern European Union is the point of departure of this book Based upon the analytical premises of Stanford School Sociological Institutionalism Sebastian M Buettner studies regional mobilization in contemporary Europe from a new and innovative perspective He

highlights the importance of scientific expertise and global scientific models in contemporary regional development practice and exemplifies their significance with the example of region building in Poland in the course of EU integration This new wave of regional mobilization is not just conceived as an effect of local national or European politics but as an expression of a larger conceptual shift in governing society and space This well researched and clearly argued book not only provides fresh insights into region building and regionalization in contemporary European space but also contributes to the new sociology of Europeanization It will be an illuminating read for scholars and students in Sociology European and EU studies International Relations Cultural Studies Geography Regional Science Polish Studies and related subject areas *Women's Empowerment for Sustainability in Africa* Robert Dibia, 2019-01-17 This book uses an open explorative approach to deal with the different aspects of gender discrimination and gender empowerment policies as well as their impact on economic development and capacity building in several African countries It uses primary and secondary data to present the argument that without the full input of women sustainable development will not be achieved in many African countries This book is the first text written by knowledgeable gender issue experts that understand the culture of and lived and conducted research in Africa It provides many examples of the relationships between gender and economic development around the African continent highlighting different processes and practices As such the contributors here illustrate the impact of weak gender policies and the ability to adequately develop female capacity building that could lead to wide spread sustainable economic growth in Africa They also explore a wide range of new dimensions and variables that are commonly ignored by other text books on gender equality The book will help graduate undergraduate students and other readers to understand women's policies in the past present and future by analysing and illustrating cultural political and socio historical contexts which have shaped women's role in the economic and sustainable development of Africa

Corruption and Transformation in a Developing Economy Chima B. Ukwuije, 2019-07-01 This is a contemporary book for everyone but it is more relevant to those who wish to know why we say corruption is an enemy to the society how it starts what propels it and what the society suffers as a result of corruption It is not an over expectation for the workers to look up to their manager and the citizens to look up to the elected politicians for welfare projects because according to the book the primary responsibility of democratic governments especially in developing economies is the protection of lives and properties of her citizens providing welfare schemes and creating an enabling ground for her citizens to strive for their self development Corruption has rubbed us of all these The citizens entrusted their collective will in the hands of the elected politicians believing that they will make the society a better place to live but in return we have a society tightly dotted with terrorists and politically motivated attacks on the innocent citizens The country became difficult for an average man to survive in leading to irregular migration even to less developing economies where at least they can be sure of security
