Organizational Behavior 4 John B. Miner, 2015-03-26 This unique work bridges the gap between theory and practice in organizational behavior. It provides a practical guide to real life applications of the 35 most significant theories in the field. The author describes each theory and then analyzes its usefulness and importance to the successful practice of management. His analysis covers key managerial topics such as goal setting, training and development, assessment, job enrichment, influence processes, decision making, group processes, organizational development, organizational structuring, and effective organizational operation.

Organisational Behaviour Christine Cross, Ronan Carbery, 2022-01-13 This lively and comprehensive introduction to organisational behaviour demonstrates how research into human behaviour can be applied in the workplace. It assumes no prior work experience, instead asking students to draw on everyday occurrences and complete a range of engaging activities to deepen their understanding of key topics such as personality, perception, and motivation. With a focus on helping students to develop key skills useful to future employers, it offers a wealth of real world examples, coverage of contemporary issues, and an international approach. Key features: A global approach to OB with OB in Practice case studies and OB in the News boxes in every chapter providing examples from the UK, Ireland, the USA, Kenya, China, Europe, and Asia. A strong emphasis on career development with a skills development section and corresponding Building Your Employability Skills feature which helps prepare students for employment. Coverage of contemporary topics such as diversity, healthy workplaces, the metoo movement, and Covid 19. Free access to Bloomsbury Pub Organisational Behaviour featuring interactive simulations, quizzes, and bespoke video interviews with a range of business professionals, as well as a testbank, teaching notes, and teaching slides for lecturers. New to this edition: New chapters on Managing Healthy Workplaces, Managing Diversity, and Organizational Socialisation. Exciting new interactive simulations which put students in the shoes of a manager making difficult decisions. <https://www.bloomsburyonlineresources.com/organisational-behaviour/2-learning-resources/simulations>. New Ethical Behaviour in the Workplace feature that invites students to discuss how they would respond to ethical dilemmas. New Impact of Technology on Behaviour feature which explores topical issues such as AI and computer mediated communication to uncover how technology is impacting behaviour in the workplace.

Encyclopedia of the Sciences of Learning Norbert M. Seel, 2011-10-05 Over the past century, educational psychologists and researchers have posited many theories to explain how individuals learn, i.e. how they acquire, organize, and deploy knowledge and skills. The 20th century can be considered the century of psychology on learning and related fields of interest such as motivation, cognition, metacognition, etc., and it is fascinating to see the various mainstreams of learning remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology. Beyond folk psychology and its naïve theories of learning, psychological learning theories can be grouped into some basic categories such

as behaviorist learning theories connectionist learning theories cognitive learning theories constructivist learning theories and social learning theories Learning theories are not limited to psychology and related fields of interest but rather we can find the topic of learning in various disciplines such as philosophy and epistemology education information science biology and as a result of the emergence of computer technologies especially also in the field of computer sciences and artificial intelligence As a consequence machine learning struck a chord in the 1980s and became an important field of the learning sciences in general As the learning sciences became more specialized and complex the various fields of interest were widely spread and separated from each other as a consequence even presently there is no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on which researchers rely The Encyclopedia of the Sciences of Learning provides an up to date broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields including relevant areas of instruction pedagogy cognitive sciences and especially machine learning and knowledge engineering This modern compendium will be an indispensable source of information for scientists educators engineers and technical staff active in all fields of learning More specifically the Encyclopedia provides fast access to the most relevant theoretical terms provides up to date broad and authoritative coverage of the most important theories within the various fields of the learning sciences and adjacent sciences and communication technologies supplies clear and precise explanations of the theoretical terms cross references to related entries and up to date references to important research and publications The Encyclopedia also contains biographical entries of individuals who have substantially contributed to the sciences of learning the entries are written by a distinguished panel of researchers in the various fields of the learning sciences

Women and Inequality in the 21st Century Brittany Slatton, Carla Brailey, 2019-05-17 Recent books have drawn attention to an unfinished gender revolution and the reversal of gender progress However this literature primarily focuses on gender inequality in the family and its effect on women's career and family choices While an important topic these works are critiqued for being particularly attentive to the concerns of middle class heterosexual White women and ignoring or erasing the issues and experiences of the vast majority of women throughout the United States and other countries Women and Inequality in the 21st Century is an edited collection that addresses this dearth in the current literature This book examines the continued inequities navigated by women occupying marginalized social positions within a nexus of power relations It addresses the experiences of immigrant women of color aging women normative gender constraints faced by lesbian and gender non conforming individuals assigned the female gender at birth religious constraints on women's sexual expression and religious and ethnic barriers impeding access to equality for women across the globe Contributors to this collection reflect varying fields of inquiry including sociology psychology theology history and anthropology Their works employ empirical research methods hermeneutic analysis and narrative to capture the unique gender experiences and negotiations of diverse 21st century women
