Population: Un Choix International Rafael M. Salas,2013-09-11 Population Un Choix International **The International Organization of Hunger** Peter Uvin,2022-09-09 First Published in 1993 this is part of the Graduate Institute of International Studies Geneva series This study which looks at whether scholars of international politics attempt to understand cooperative behavior in the light of the theories developed by the observers of both conflict and of cooperation This volume expands the short list of such works and does so with insight a wide range of scholarship and a willingness to test particular cases against existing theory The author has written a book which expands the knowledge of but also a thoughtful improvement of existing theoretical approaches Uvin's universe of enquiry excludes military power and its application It concentrates on the long term complex organization of cooperative transnational behavior and its rationale Its focusses on functional issues involving world hunger a haunting background and result and perhaps even one cause of the dreadful violence that characterizes our world even as the threat of catastrophic nuclear warfare has declined **Records**

of the General Conference of the United Nations Educational, Scientific and Cultural Organization Unesco. General Conference,1993 *The Wayfarer* Barnabé Anzuruni Msabah,2021-08-02 Scripture testifies to God's care for displaced peoples From Genesis to Revelation the Bible is a narrative filled with migrants with refugees and with wayfarers Even God himself is shown to be on the move a God who does not stay on one side of the border but crosses over to save his people In

The Wayfarer Dr Barnabé Anzuruni Msabah engages the global refugee crisis from an interdisciplinary perspective that encompasses both development studies and theological reflection Using specific examples from Central Eastern and Southern Africa Msabah provides an overview of the sociopolitical economic and environmental dynamics of forced migration while simultaneously exploring theological and cultural frameworks for understanding transformational community development He examines both the church's calling to provide sanctuary for displaced peoples and the role of refugees in contributing to the socioeconomic welfare of their host countries While the church's mandate is to act with justice and mercy towards the world's most vulnerable populations Msabah also reminds us that refugees are not passive recipients but powerful examples of courage resilience and hope who can in their turn transform our nations and our faith communities for the better *Population and Health in Developing Countries* Maryse Gaimard,2013-07-26 This book provides an overview of the health of developing nations in the early twenty first century The basic assumption is that the health of a population is not independent of broader demographic trends and does follow the health transition model The coverage is broad ranging from health transition in developing countries to the health of women to an analysis of morbidity Population health is an essential component of human and social development As both a means and an end of development health lies at the heart of underdevelopment and ranks first on the list of international priorities The WHO slogan Health for all in 2000 reflects the spirit of a more general movement in favor of health promotion throughout the world But the developing world is far from

reaching this aim The health of populations has improved in developing regions but there are still deep inequalities and serious problems remain especially in Sub Saharan Africa After reviewing the core concepts of population health the book examines health transition in developing countries a process that has resulted in a double burden of diseases A discussion of mortality in developing countries serves to highlight the high rates of child mortality in these regions The book devotes a full chapter to women s health and its chapter length analysis of morbidity highlights the double burden weighing down developing populations and concludes with an analysis of health systems in developing countries *A New Perspective on Human Mobility in the South* Rudolf Anich,Jonathan Crush,Susanne Melde,John O. Ocho,2014-07-22 This book offers innovative insights on South South human mobility It features a collection of papers that highlight often overlooked mobility patterns among and within regions in the global South as well as address critical realities faced by South South migrants This publication thoroughly investigates key issues of the migration debate spanning from the terminological and contextual meaning of migration and development It also critically examines some of the key features that human mobility in the global South is characterized by including the prevalence of intra regional and labor mobility the role of diasporas communities in developing countries South South remittances patterns the influence of environmental factors on the decision to migrate and the rising number of child migrants By carefully moving the lens from the frequently examined South North and North South movements to human mobility within the Southern regions of the world this book questions the traditional conception of the migration paradigm It offers knowledge and insights that will help to expand the debate as well as stimulate further research on this important topic and hopefully promote future activities aimed at the protection of migrants and their families living in the South As a result it is an ideal resource for migration scholars policy makers and development practitioners **Société Des Nations, Rétrospective** United Nations Library (Geneva, Switzerland),1983 No detailed description available for The League of Nations in retrospect La Soci t des Nations r trospective Sustainable Cities Mélanie Robertson,2012 4 Healthy sustainable and culturally appropriate living and working environments Domestic pig production in Malika Senegal5 Housing for the urban poor through informal providers Dhaka Bangladesh 6 Socio spatial tensions and interactions An ethnography of the condominium housing of Addis Ababa Ethiopia 7 Partnership modalities for the management of drinking water in poor urban neighbourhoods The example of Kinshasa Democratic Republic of Congo 8 Rethink reuse Improving collective action capacity regarding solid waste management and income generation in Koh Kred Thailand

Report to the United Nations Unesco, 1970 **Aging Process of Population** Edward Rosset, 2017-05-03 Aging Process of Population investigates and analyzes the phenomenon of population aging The text aims to provide a quantitative and qualitative analyses of structural transformations caused by the aging population on modern societies in various parts of the world The book is organized into four parts The first part deals with problems in methodologies such as methods to measure demographic old age hypothetical and perspective computation tools and deficient methodological uniformity of source materials The second part discusses the beginning of old age analysis of life tables and the method of computing the normal length of life Population structure by age in different time periods dynamics of the changes in the age composition of populations in seven select countries and the problem of dependency of non-productive elements on the population of productive age are examined in Part III The last part provides the effect of fertility reduction of mortality migration and war in the determination of the age structure of populations Demographers sociologists statisticians economists politicians market researchers ecologists and students will find the book invaluable *In Search of an Economic Quantum In the World Economy*. Aline de Valdomond, 2013-08-07 Considering the World Gross Domestic Product WGDP as a representation of all

the production by humankind is it possible to define a smallest common quantitative measure an economic quantum at an individual level whose aggregate will lead to the word GDP Is this economic quantum the GDP by an individual produced using his sole physical forces of some 180 kWh year Or is this economic quantum the GDP of an ancient Roman or Greek democratic citizen with his 100 slaves with 15 000 kWh year In any case the average individual today in Europe uses 47 000 kWh per year which is much higher than expected if each citizen had only 100 virtual slaves at his disposal Written by a non specialist a scientific economy student this essay is a kind of visit through the arcanes of modern finance It reviews elements of economic theories applies a historical perspective reviews the link between population economy and ecology and the question of the ecological balance discovers systemic economic wars see why the current institutional and legal setting is inadequate then derive a few practical aphorisms and a speculative model of a world organisation

Demography:

Analysis and Synthesis, Four Volume Set Graziella Caselli,Jacques Vallin,Guillaume Wunsch,2006-01-03 This four volume collection of over 140 original chapters covers virtually everything of interest to demographers sociologists and others Over 100 authors present population subjects in ways that provoke thinking and lead to the creation of new perspectives not just facts and equations to be memorized The articles follow a theory methods applications approach and so offer a kind of one stop shop that is well suited for students and professors who need non technical summaries such as political scientists public affairs specialists and others Unlike shorter handbooks Demography Analysis and Synthesis offers a long overdue thorough treatment of the field Choosing the analytical method that fits the data and the situation requires insights that the authors and editors of Demography Analysis and Synthesis have explored and developed This extended examination of demographic tools not only seeks to explain the analytical tools themselves but also the relationships between general population dynamics and their natural economic social political and cultural environments Limiting themselves to human populations only the authors and editors cover subjects that range from the core building blocks of population change fertility mortality and migration to the consequences of demographic changes in the biological and health fields population theories and doctrines observation systems and the teaching of demography The international perspectives brought to these subjects is vital for those who want an unbiased rounded overview of these complex multifaceted subjects Topics to be covered Population Dynamics and the Relationship Between Population Growth and Structure The Determinants of Fertility The Determinants of Mortality The Determinants of Migration Historical and Geographical Determinants of Population The Effects of Population on Health Economics Culture and the Environment Population Policies Data Collection Methods and Teaching about Population Studies All chapters share a common format Each chapter features several cross references to other chapters Tables charts and other non text features are widespread Each chapter contains at least 30 bibliographic citations

Demographic Dynamics and Development Yves Charbit,2022-02-17 One of the major challenges facing the world today is the interaction between demographic change and development Demographic Dynamics and Development reviews the

dominant demographic theory demographic transition and then presents a thorough investigation covering aging fertility contraception nuptiality mortality and migration which are all aspects that drive these changes Each chapter combines the latest empirical data with theoretical reflections on the implications for development This book thus offers an overview of worldwide demographic data studied with a view towards development In doing so it provides researchers and specialists with clear information through in depth case studies focusing on a country a region or a particularly important scientific sub theme
