Gibson-Graham, Jenny Cameron, Stephen Healy, 2013-05-01 In the wake of economic crisis on a global scale more and more people are reconsidering their role in the economy and wondering what they can do to make it work better for humanity and the planet In this innovative book J K Gibson Graham Jenny Cameron and Stephen Healy contribute complex understandings of economics in practical terms what can we do right now in our own communities to make a difference Full of exercises thinking tools and inspiring examples from around the world Take Back the Economy shows how people can implement small scale changes in their own lives to create ethical economies There is no manifesto here no one prescribed model rather readers are encouraged and taught how to take back the economy in ways appropriate for their own communities and context using what they already have at hand Take Back the Economy dismantles the idea that the economy is separate from us and best comprehended by experts Instead the authors demonstrate that the economy is the outcome of the decisions and efforts we make every day The economy is thus reframed as a space of ethical action something we can shape and alter according to what is best for the well being of people and the planet The book explores what people are already doing to build ethical economies presenting these deeds as mutual concerns What is necessary for survival and what do we do with the surplus produced beyond what will fulfill basic needs What do we consume and how do we preserve and replenish the commons those resources that can be shared to maintain all And finally how can we invest in a future worth living in Suitable for activists and students alike Take Back the Economy will be of interest to anyone seeking a more just sustainable and equitable world      **Environmental Publics** Sally Eden, 2016-12-08 How do ordinary people think about the environment as they go about their daily lives Does thinking about the environment make them do things differently This book is the first to explore the idea of environmental publics that is the ways in which ordinary people engage with environmental issues across different practical contexts of work play and home Emphasising the practices of environmental engagement Environmental Publics examines how people consume the environment learn about it campaign for its protection and enjoy it through their leisure time But the book avoids relying on idealisations of consumers or citizens or theoretical constructs about behavioural

norms that have traditionally dominated research in this field. Instead, this book differentiates environmental publics not by who they are but by what they are doing in their daily practices. It also analyses specifically the geographies of those practices: how what people do affects the environment but in different ways across time and space and at different scales; aspects of practices that are neglected in the literature. With an interdisciplinary perspective, this book will be of interest to students and scholars in geography, sociology, science and technology studies, political science and anthropology. It is written in an accessible and readable style so as to be useful for preliminary and more advanced courses in environmental management, perception and policy as well as in studies of modern society, consumption and environmentalism.

**From the Margins to the Centre** Justin O'Connor, 2017-07-05 The title of this book, *From the Margins to the Centre*, refers to three related themes that have run closely together in the debates on the city in the 1980s and 1990s. Firstly, a process of restructuring in which activities previously deemed peripheral to the productive city have now moved centre stage; that is, a concern with culture, consumption and image. Secondly, the notion of gentrification whereby a reversal of the movement out of the city centre by the affluent classes results in a re-centralisation of previously marginal areas of the city centre. Thirdly, a process whereby previously marginal groups and their activities have been made central to the city and have made the city centre central to themselves. Each of the chapters in this volume derives from recently conducted research grounded in an attempt to examine some of the issues posed in what can be described as postmodernist theorising on the nature of the contemporary city. A strong current of such thought has placed the multiple uses of city spaces at the centre of its claims for the construction and deconstruction of identities. The proliferation and fragmentation of patterns of cultural production and consumption, it is claimed, makes the city a complex field of conflicting activities whose juxtaposition undermines traditional cultural hierarchies. Across this field, identity becomes fluid in a way that uncouples its connection with the fixed categories of class, gender and ethnicity. While such positions point to a dominant role for culture in contemporary society, there has been little discussion or investigation of the social practices whereby this is effected. This book attempts an investigation of such practices. Implicit in the very conception of the book and running through each of the contributions is the view that contemporary popular culture is crucial to the understanding of the transformations to which we refer and that the investigation of this popular culture needs.
