justice programs examines ethical dilemmas pertaining to the administration of criminal justice and professional activities in the field Comprehensive coverage is achieved through focus on law enforcement legal practice sentencing corrections research crime control policy and philosophical issues The contributions in this book examine ethical dilemmas pertaining to the administration of criminal justice and professional activities in the field *The Ethics of Plea Bargaining* Richard L. Lippke, 2011 The practice of plea bargaining plays a hugely significant role in the adjudication of criminal charges and has provoked intense debate about its legitimacy This book offers the first full length philosophical analysis of the ethics of plea bargaining It develops a sustained argument for restrained forms of the practice and against the free wheeling versions that predominate in the United States In countries that have endorsed plea bargains such as the United States upwards of ninety percent of criminal defendants plead guilty rather than go to trial Yet trials which grant a presumption of innocence to defendants and place a substantial burden of proof on the state to establish guilt are widely regarded as the most appropriate mechanisms for fairly and accurately assigning criminal sanctions How is it that many countries have abandoned the formal rules and rigorous standards of public trials in favor of informal and veiled negotiations between state officials and criminal defendants concerning the punishment to which the latter will be subjected More importantly how persuasive are the myriad justifications that have been provided for plea bargaining These are the questions addressed in this book Examining the legal processes by which individuals are moved through the criminal justice system the fairness of those processes and the ways in which they reproduce social inequality this book offers an ethical argument for restrained forms of plea bargaining It also provides a comparison between the different plea bargaining regimes that exist within the US where it is well established England and Wales where the practice is coming under considerable critique and the European Union where debate continues on whether it coheres with inquisitorial legal regimes It suggests that rewards for admitting guilt are distinguished from penalties for exercising the right to trial and argues for modest fixed sentence reductions for defendants who admit their guilt These suggestions for reform include discouraging the current practice of deliberate over charging by prosecutors and charge bargaining and require judges to scrutinize more closely the evidence against those accused of crimes before any guilty pleas are entered by them Arguing that the negotiation of charges and sentences should remain the exception not the rule it nevertheless puts forward a normative defense for the reform and retention of the plea bargaining system

Research Handbook of Comparative Criminal Justice Nelken, David, Hamilton, Claire, 2022-09-15 With contributions from leading experts in the field this timely Research Handbook reconsiders the theories assumptions values and methods of comparative criminal justice in light of the challenges and opportunities posed by globalisation deglobalisation and transnationalisation *Lawyers' Ethics* Allan Gerson, 2017-09-29 Frequently the ethical attorney finds himself in a position where he can no longer reconcile conflicting responsibilities he owes to his clients with those he owes to society and himself Faced with the dilemma of choice among countervailing and competing obligations he has little training and precedence to

guide him. If he is over forty the overwhelming probability is that he never took a course on legal ethics. If he looks for a general up to date text to provide insight he will look in vain. Nor is there a developed body of case law from which to glean an appropriate course of action. This vacuum of authoritative formulations of responsible behavior is a matter of concern not only to the legal profession but to all sectors of American society. Lawyers shape the mores and thoughts of all of us. Their will is exerted not only in modifying our national institutions but ultimately our individual personal sense of values. This volume serves two important purposes: it provides the interested professional and lay reader with an appreciation of the spectrum of the ethical dilemmas confronting the legal profession and it provides a sense of balance about the competing considerations present in each of these dilemmas. At a time when the legal profession is under attack both from within and without, this book represents some of the best critical thinking by lawyers about their role and responsibilities in American society.

Histories Written by International Criminal Courts and Tribunals Aldo Zammit Borda, 2020-12-18. This book argues for a more moderate approach to history writing in international criminal adjudication by articulating the elements of a responsible history normative framework. The question of whether international criminal courts and tribunals (ICTs) ought to write historical narratives has gained renewed relevance in the context of the recent turn to history in international criminal law: the growing attention to the historical legacies of the ad hoc Tribunals and the minimal attention paid to historical context in the first judgment of the International Criminal Court. The starting point for this discussion is that in cases of mass atrocities prosecutors and judges are inevitably understood to be engaged in writing history and influencing collective memory, whether or not they so intend. Therefore, while writing history is an inescapable feature of ICTs, there is still today a significant lack of consensus over the proper place of this function. Since Hannah Arendt articulated her doctrine of strict legality in response to the prosecutor's expansive didactic approach in *Eichmann*, the legal debate on the subject has been largely polarised between restrictive and expansive approaches to history writing in mass atrocity trials. What has been noticeably missing from this debate is the middle ground. The contribution this book seeks to make is precisely to articulate a framework that occupies that ground. The book asks what are the lenses through which judges of ICTs interpret historical events, what kind of histories do ICTs write and what kinds of histories should ICTs produce. Its arguments for a more moderate approach to history writing are based on three distinct but interrelated grounds: 1. Truth and Justice, 2. Right to Truth, and 3. Legal Epistemology. Different target audiences may benefit from this book. Court officials and legal practitioners may find the normative framework developed herein useful in addressing the tensions between the competing objectives of ICTs and in particular in assessing the value of the history writing function. Lawyers, historians and other academics may also find the analysis of the strengths, constraints and blind spots of the historical narratives written by ICTs interesting. This issue is particularly timely in view of current debates on the legacies of ICTs. Aldo Zammit Borda is Director of the Centre for Access to Justice and Inclusion at Anglia Ruskin University, Cambridge, UK.

Theorizing Legal Punishment Richard L.

Lippke,2024-02-06 This book systematically defends an account of the institution of legal punishment that draws on both retributive and crime prevention thinking The work argues that legal punishment censures convicted offenders and thus morally communicates with them any victims and the broader community while also serving to reduce future crime The expressive or retributive element is assigned the lead role in this mixed account because it better captures the notion that members of society are to be held morally accountable for their failures to abide by defensible criminal prohibitions of various kinds Despite this it is conceded that the reduction of crime plays a vital role in justifying the institution of legal punishment and the book contains extended discussion of how and why this is so Beyond its explication of the aims of legal punishment and their respective roles within a mixed theory the study devotes separate chapters to sentencing criminal procedure and the imposition of fees and collateral legal consequences on individuals who have been convicted of crimes and fully served their sentences In these ways the work moves beyond discussion of the abstract aims of legal punishment to details of the institution s internal structure and operations The many historical deficiencies and failures of the institution are duly noted and the challenges they pose for punishment theorizing are examined The book closes with discussion of the limited success of punishment institutions in apprehending convicting and punishing those who violate the law including many who do so in serious ways Alternatives to reliance on legal punishment institutions are briefly examined In the end retention of such institutions is urged although it is suggested that we ought to have modest expectations about their ultimate success The work will be of interest to those working in the areas of Legal Philosophy and Criminology
