Cultural Understanding of Soils Nikola Patzel, Sabine

Grunwald, Eric C. Brevik, Christian Feller, 2023-09-22 Cultural understandings of soil are diverse and often ambiguous

Cultural framing of soils is common worldwide and is highly consequential. The implications of what place the earth has in people's world view and everyday life can be in line with or in conflict with natural conditions with scientific views or with agricultural practices. The main assumption underlying this work is that soil is inescapably perceived in a cultural context by any human. This gives emergence to different significant webs of meaning influenced by religious spiritual or secular myths and by a wide range of beliefs values and ideas that people hold in all societies. These patterns and their dynamics inform the human soil relationship and how soils are cared for protected or degraded. Therefore there is need to deal inter culturally with different sources and types of knowledge and experience regarding soil a need to cultivate soil awareness and situationally appropriate care through inter and intra cultural dialogues and learning. This project focuses on the human and intangible dimensions of soil. To serve this aim the International Union of Soil Sciences IUSS founded a working group on Cultural Patterns of Soil Understanding that has resulted in this book which presents studies from almost all continents written by soil scientists and experts from other disciplines. A major objective of this project is to promote intercultural literacy that gives readers the opportunity to appreciate soil across disciplinary and cultural boundaries in an increasingly globalized world.

Conceptual Economics: The Liaising Role In Politics And Social Sciences Kui-wai Li, 2021-01-18

Given that there is no shortage of economic theories while economic problems are growing periodically Conceptual Economics boldly attempts to initiate a new approach by employing conceptual and intuitive tools to examine the intra relationship between microeconomics and macroeconomics as well as the inter relationship between economic analysis and other social science studies especially the relationship with political science. The few intuitive ideas include the separation between ex ante situations and ex post outcomes the difference between endowment differences and unequal outcomes and the role of economics as a vehicle in the delivery of numerous social and political activities. The discussion extends to cover an analysis on human values and concludes with a recommendation on the functionality of civic capitalism. With intuition and analytical reasoning within economics and with other social sciences Conceptual Economics can become a new branch in economic study where scholars analysts and intellectuals could think outside the box by liaising a wider economic perspective and or amalgamating non economic aspects into their analysis. This shall provide a new dimension to solving human economic problems and possibly area of intellectuality.
