borders of the European Union's immediate neighbouring countries. This book is the first full length study of the neighbours of the EU's neighbours, a concept originally introduced by the European Commission with reference to Saharan Africa, the Middle East and Central Asia. These regions in the EU's broader neighbourhood are often perceived as an arc of crisis from which manifold challenges emanate for Europe. This timely book takes stock of the state of the EU's cooperation with the neighbours of its neighbours and explores how the concept might help promote security, stability and prosperity beyond the countries which are formally part of the European Neighbourhood Policy. How can the EU create bridges between these regions? What instruments does the EU have at its disposal and how can it link them in order to respond to the challenges and overcome the current fragmentation? One of the conclusions is the suggestion to consider a pragmatic EU Strategy for the Neighbours of its Neighbours which addresses the needs of the broader EU neighbourhood in a more systematic and consistent manner and helps transform in the long run the arc of crisis into another ring of friends.

**Democracy, Federalism, the European Revolution, and Global Governance** Andrea Bosco, 2020-06-10. The European Union is facing today the greatest crisis since its creation. Brexit could mean not only the reversal of its steady enlargement from 6 to 28 member states but also the beginning of an inexorable decline leading to its disintegration. However, few today seem to recollect that it was precisely the British who were the first to promulgate the political culture which inspired the European Union's construction: democracy and federalism, and the first who tried to realise in June 1940 a European federation on the basis of an Anglo-French union. This volume traces the fundamental stages of the European unification process, placing it in relation to the wider process of world economic and political integration. In particular, it analyses the historical significance of the European Revolution, which is identified in the overcoming of the nation state, namely the modern political formula which institutionalised the political division of mankind and the birth of the first truly international state. The universal historical significance of the European Revolution lies in its exportability, as for the other great European revolutions, and therefore its potential as progressively extensible to all the states of the planet. Europe was indeed the first region of the world where the barriers between national states fell and a post-national political identity emerged complementary to national political identities. It is in fact in the context of the European Union that democracy beyond the borders of the nation state has first been realized, constituting a guiding principle for global governance.

**How Think Tanks Shape Social Development Policies** James G. McGann, Anna Viden, Jillian Rafferty, 2014-07-07. Across the globe, there are more than four thousand policy institutes or think tanks that research or advocate for economic and social development. Yet the relationship between these organizations and the policies

their influence is not well understood. *How Think Tanks Shape Social Development Policies* examines case studies drawn from a range of political and economic systems worldwide to provide a detailed understanding of how think tanks can have an impact on issues such as education policy, infrastructure, environment and sustainable development, economic reform, poverty alleviation, agricultural and land development and social policy. Each chapter provides an overview of the approaches and organizational structures of specific think tanks as well as the political, economic and social opportunities and the challenges of the environments in which they operate. The contributors study the stages of innovative think tank aided strategies implemented in highly industrialized world powers like the United States and Russia, emerging countries such as China, India, Brazil and South Korea, and developing nations that include Ethiopia, Kenya and Tanzania. Accompanied by an extensive introduction to contextualize the history and theory of policy institutes, this comprehensive comparison of policy success stories will be instructive and transferable to other think tanks around the globe. **EU External Relations Law and Policy in the Post-Lisbon Era** Paul James Cardwell, 2011-11-17. This is a collection of works which considers the many different facets of the EU's increasingly important engagement with the world beyond its borders. The Treaty of Lisbon marked a change in the powers and competences endowed on the EU; the contributions to this collection consider both the direct and indirect impact of the Treaty on the contemporary state of EU external relations. The authors are drawn from legal, political science and international relations disciplines and consider innovations or changes brought about by the Treaty itself, the European External Action Service, the roles of the High Representative and President, the collapse of the pillar structure and new competences such as those for foreign investment. Other chapters cover developments which reflect the latest incremental changes upon which the post-Lisbon Treaty arrangements have some bearing, including the COREU network, the transatlantic and neighbourhood relations and the external dimension of internal security. Useful for academics working in the field of EU external relations, law and foreign policy as well as the EU law, politics, European studies, market more generally.
