Florida Assessment Guide Big Idea Benchmark Assessment:

From Mandate to Achievement Elaine Makas, 2009-09-14 This engaging book will guide your journey through the morass of curriculum alignment development and assessment. Our school struggled through missteps in curriculum alignment and implementing common assessments without the benefit of Makas' wisdom and experience. I highly recommend this book for teachers, administrators, and interested parents. Robert A. Martin, Leadership Consultant, Oakland Schools, Waterford, MI. Raise schoolwide performance with a systematic teacher-driven approach to curriculum development. Purposeful curriculum design is essential to attaining consistent academic improvement. Educators often find, however, that a viable curriculum based on mandated standards can be exceedingly challenging to create, implement, and sustain. In this book, curriculum consultant Elaine Makas provides a step-by-step guide to establishing the processes and documents necessary to build a stable, cohesive curriculum system that aligns to educational benchmarks. Based on the DAILY model (Data Alignment Instructional Pace Guides, Local Common Assessment, and Yearly Review), this system deconstructs the curriculum process into sequential steps that facilitate the development of instructional priorities, reveal students in need of intervention, and help ensure continuous process improvement. With numerous templates, samples, and reflective exercises, this book clearly demonstrates how to collect and analyze data, identify expectations, and recognize learning gaps. Develop curriculum maps that align with standards and grade-level subject goals. Pace instruction throughout the year according to specific objectives. Create assessments that predict standardized test performance. Conduct yearly improvement reviews and documentation revisions. An essential resource for all schools or districts, whether struggling or successful. *From Mandate to Achievement* enables K-12 principals, district administrators, curriculum facilitators, and teacher teams to establish a consistent and accurate curriculum process that increases academic achievement and drives continuous school improvement. [From STEM to STEAM](#) David A. Sousa, Thomas Pilecki, 2013-03-14 Research shows that activities associated with the arts can enhance creativity, problem solving, memory systems, motor coordination, and analytical skills. Best-selling author David A. Sousa and veteran arts educator Thomas J. Pilecki demonstrate how arts education is integral to the development of the brain and to students' overall academic achievement. This book provides classroom-tested strategies and techniques for both integrating the arts in STEM instruction. Data from schools that have already integrated the arts into STEM subjects, plus anecdotes and student success stories. How to set up for organizing curriculum and instructional strategies to allow for the integration of STEM subjects and the arts. Strategies for getting the entire staff and community involved in STEAM initiatives. [Fairness and Validation in Language Assessment](#) Antony John Kunnan, 2000-10-12 Fairness of language tests and testing practices has been a concern among test developers and test users. The 19th annual Language Testing Research Colloquium held in 1997 in Florida brought this concern into focus. The papers in this volume offer an introduction to fairness and validation in the field of language assessment. **Foreign Language Education in America** Steven Berbeco, 2016-04-08 Foreign language
