section of this report Key results highlighted in AEO2012 include continued modest growth in demand for energy over the next 25 years and increased domestic crude oil and natural gas production largely driven by rising production from tight oil and shale resources As a result U S reliance on imported oil is reduced domestic production of natural gas exceeds consumption allowing for net exports a growing share of U S electric power generation is met with natural gas and renewables and energy related carbon dioxide emissions remain below their 2005 level from 2010 to 2035 even in the absence of new Federal policies designed to mitigate greenhouse gas GHG emissions Executive Summary p 2

Green Australia Steve Lancaster,2012 Green Australia A snapshot examines the ways in which Australians are attempting to reduce their ecological footprint both at home and at work In 2009 the CO2 Energy Emissions Index found that Australia had overtaken the USA to become the largest per capita emitter of greenhouse gases in the world a legacy of dependence on coal fired power stations the widespread adoption of conventional farming techniques heavy reliance on vehicles powered by fossil fuel dirty industrial practices and a growing mountain of waste Yet in recent years there has been a growing awareness that climate change is beginning to bite the recent drought and devastating floods suggesting that more extreme weather patterns are likely unless significant steps are taken to combat global warming Using case studies and up to date research this book demonstrates that although much more needs to be done if Australia is to secure a carbon neutral future some Green shoots are beginning to emerge

Annual Energy Outlook ,1995 **Greenhouse Gas Control Technologies** CAJ Paulson,2001-04-23 The control of greenhouse gas emissions continues to be a major global problem It is inter disciplinary both in substance and approach and covers technical political and economic issues involving governments industry and the scientific community These proceedings contain 220 papers presented at the 5th International Conference on Greenhouse Gas Control Technologies GHGT 5 held in August 2000 at Cairns Queensland Australia The papers cover the capture of carbon dioxide geological storage of carbon dioxide ocean storage of carbon dioxide storage of carbon dioxide with enhanced hydrocarbon recovery utilisation of carbon dioxide other greenhouse gases fuel cells alternative energy carriers energy efficiency life cycle assessments and energy modelling economics international and national policy trading and accounting policy social and community issues and reducing emission from industry and power generation
