Students of Color and the Achievement Gap Richard R. Valencia, 2015-03-05 *Students of Color and the Achievement Gap* is a comprehensive landmark analysis of an incontrovertible racialized reality in U S K 12 public education the relentless achievement gap between low socioeconomic students of color and their economically advantaged White counterparts Award winning author and scholar Richard Valencia provides an authoritative and systemic treatment of the achievement gap focusing on Black and Latino Latina students He examines the societal and educational factors that help to create and maintain the achievement gap by drawing from critical race theory an asset based perspective and a systemic inequality approach By showing how racialized opportunity structures in society and schools ultimately result in racialized patterns of academic achievement in schools Valencia shows how the various indicators of the achievement gap are actually symptoms of the societal and school quality gaps Following each of these concerns Valencia provides a number of reform suggestions that can lead to systemic transformations of K 12 education *Students of Color and the Achievement Gap* makes a persuasive and well documented case that school success for students of color and the empowerment of their parents can only be fully understood and realized when contextualized within broader political economic and cultural frameworks

Enterprise and Economic Development in Africa Dina M. Nziku, John J. Struthers, 2021-06-11 Presenting a topical analysis of the challenges and achievements of enterprise *Enterprise and Economic Development in Africa* examines contributions to economic

development on the continent as well as exploring implications for policy dimensions *The Politics and Governance of Basic Education* Brian Levy, Robert Cameron, Ursula Hoadley, Vinothan Naidoo, 2018-09-05 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. All over the world economic inclusion has risen to the top of the development discourse. A well performing education system is central to achieving inclusive development but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased but quality remains low with weaknesses in governance comprising an important part of the explanation. *The Politics and Governance of Basic Education* explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making process combining practical steps to achieve incremental gains to re-orient the system towards learning.

Proceedings of the 6th International Conference on Electrical Engineering and Information Technologies for Rail Transportation (EITRT) 2023 Jianwei Yang, Dechen Yao, Limin Jia, Yong Qin, Zhigang Liu, Lijun Diao, 2024-01-08 This book reflects the latest research trends, methods and experimental results in the field of electrical and information technologies for rail transportation, which covers abundant state-of-the-art research theories and ideas. As a vital field of research that is highly relevant to current developments in a number of technological domains, the subjects it covered include intelligent computing, information processing, communication technology, automatic control, etc. The objective of the proceedings is to provide a major interdisciplinary forum for researchers, engineers, academicians and industrial professionals to present the most innovative research and development in the field of rail transportation, electrical and information technologies. Engineers and researchers in academia, industry and government will also explore an insightful view of the solutions that combine ideas from multiple disciplines in this field. The volumes serve as an excellent reference work for researchers and graduate students working on rail transportation and electrical and information technologies.

Increasing Productivity and Efficiency in Online Teaching Dickenson, Patricia, 2016-05-19 Distance learning has become very popular in recent years, making evident some of the problems inherent to online classes as they are today. High attrition rates driven in part by student isolation and low satisfaction have plagued online courses. For an online class to succeed, it must be built upon engaging media and meaningful interaction. *Increasing Productivity and Efficiency in Online Teaching* provides a reference for educators in virtual classrooms and enumerates strategies to foster instructor engagement and support. Because co-construction of information opposed to rote memorization of disseminated facts engages students and develops critical thinking skills, online education must shift to reflect this. Drawing from learning theory, this publication focuses on the

ways educators can shape their online classes to best suit their students and leave them with knowledge and course satisfaction This book is recommended for researchers developers students of education administrators and online educators in all subject areas **Achieving sustainable cultivation of potatoes Volume 2** Dr Stuart Wale,2018-09-10

Nalule,2021-08-26 This book analyses the nexus between land access and the extractive industries in Africa specifically highlighting the gaps in energy land and mining laws and the practical solutions needed to settle the increasing number of land disputes in resource rich areas Access to land is essential for the successful operation of energy and mining projects However there are often social environmental and economic issues associated with acquiring land for these projects Socially many people are relocated economically local communities are not given adequate compensation environmentally pollution negatively impacts on the agricultural and fishing industries relied on by over 80% of the local communities Against this stark background and drawing from the author s fieldwork research this book addresses the important question of whether the different land tenure systems coupled with administration and registration procedures are adequate to address the increasing land disputes in oil and mineral rich African countries The Decline in Educational Standards James D.

Williams,2019-04-15 The Decline in Educational Standards From a Public Good to a Quasi Monopoly is about the commodification of education and the factors that have changed education from a public good into a commodity over the last 50 years When we look at today s education we see that academic standards in public education have been declining for decades even as education funding has reached nearly a trillion dollars per year to fund such failed programs as No Child Left Behind and Common Core Simultaneously tuition and fees at public universities have increased nearly 2000 percent over the last 30 years and student loan debt is now a staggering 1.5 trillion Quite simply education has become big business This book examines the various issues associated with the commodification of education especially neoliberalism and privatized Keynesianism what they are how they developed and how they have affected education and public policy It argues that neoliberalism and the related socioeconomic shift to debt based consumerism are at the center of commodification leading to a significant decline in the exchange value of a college degree It also argues that we cannot understand the changes in our public and higher education systems without examining the historical social economic and political factors that have essentially created an education system that is significantly different from what it was in the not so distant past **Burt and**
