Edexcel GCSE Geography B

Paper 2 - UK Geographical Issues - Fieldwork - Work Booklet

Figure 1

(i) Suggest an enquiry question or hypothesis that the students might have proposed for their investigation.

(10)

How ~~are~~ effective is coastal management in protecting the coastline from erosion?

The first part of this response is unclear although there is a basic idea of 'trouble to drive there', which could be developed to make the point clear and garner a second mark for the point. The second part of this response is explicit about the rocks and the subsequent risks involved, 3 marks.

Do not leave things unexplained by using vague terms such as 'difficult' or 'trouble' – why might it be 'difficult'?

Figure 2

(ii) Suggest two problems that the students' choice of locations may have caused for their collection.

(10)

A. One of the problems with finding both beach locations is that location A is a lot more built up than location B, meaning there may be more ~~obstacles~~ ^{buildings} in the way.

B. Location B seems to be ~~more~~ ^{quite} difficult to get to as there is a rocky coastline which looks dangerous. Like A, it is a bit easier to get to as it is more of a cliff.

There is obviously great familiarity with OS maps and several points are made, although some of them especially clearly. The answer is rather spelt by the parenthetical references to notes when, certainly in some cases, pupils probably intended to say just the words many candidates, the distinction between site and location is not made clear in them.

(iii) Explain how the use of Ordnance Survey (OS) maps might have helped the students choose their two beach locations and the three sites on each of those beaches to carry out the profiles.

(10)

OS maps allow you to see the profile into land and to show you the contour in a broken down line, so you can get a small beach gradient and inland high gradient. It also shows you the coast of any river, if there is one or is a town. It tells you the the contour the beach gradient. The OS map also shows you the side the river side the beach location. It is also if you draw the the contour the gradient using lines. It can also see location that teacher knows deeper to find you are able to put a beach which has a high beach gradient to the ocean.
