- System Information:** A table listing various system parameters such as Model, Serial Number, System Type, Image System Module, System ID, IP Address, Access Level, Software Installation Date, Camera Details, Network Camera, Standard Time, Time Synchronization, Data Acquisition System, and Power Distribution Unit.
- System Health Information:** A table providing details about the imaging performance, including Imaging Performance, Imaging Colorimetric error rate, EXF Errors, Imaging Balance, Total Open / Off Line Seconds, Missing Shutter Measurements, Temperature (Detector, CCM, Customer, Chassis), and Chassis Ambient Temperature.
- Current System Status:** A section showing the current date and time, application software version, next patrol time, and if updates are required.

A warning message at the bottom states: "An unregistered X-Ray tube has been installed on the system. UV Metro cameras cannot verify that the system performance will continue to meet the intent. Additional warnings will be posted to the operator about an unregistered tube during service timing. Doing this means by doing Post Calibration, we're in the clear again."
