Integrative Ophthalmology Ningli Wang, 2019-09-05 With the development of nature science and industrial technology more and more patients are benefitting from the rapid progress in ophthalmology as the use of new medicine and delicate surgical therapy has ensured them the chance to restore their sight However some problems have come up during its development of which the most serious one is the limitation of the ophthalmology Eyes are not isolated organs they are connected to our body and thus the general status of our body will affect the eyes function Therefore it is of great importance that the ophthalmologists see the big picture while dealing with the clinical problems Based on the above observations we put forward the concept of Integrative Ophthalmology and describe the ophthalmology related medical situations that are prone to be neglected in clinical practice in a bid to increase the awareness of doctors from all fields that a holistic view should be adopted in clinical practice and it is the patients that we are treating rather than the disease There are 9 parts in the book containing the concept of integrative ophthalmology intraocular and intracranial pressure gradient related diseases and the relationship between the different general status and eye disorders We do believe that the integrative ophthalmology is the key to the development of ophthalmology and hope readers can benefit from this book

Reshaping Graduate Education Through Innovation and Experiential Learning Jenkins, Toby S., 2020-10-16 Discussions

on the importance and impact of pedagogical practice on students as whole persons are often concentrated on the P 12 or undergraduate learning experience In higher education many institutions do an outstanding job of complicating the undergraduate classroom to include civic engagement community based learning education abroad social action and project based learning But what about the graduate classroom While there are indeed numerous graduate programs that push students to interact with strong meaningful difficult and sometimes harsh facts scholarship and ideologies the instructional methods have largely remained stagnant New methods of constructing deep and meaningful learning in graduate education is essential for the transformation and continued evolution of graduate school instruction Reshaping Graduate Education Through Innovation and Experiential Learning is a crucial reference book that offers practice based reflections on efforts to infuse creativity social action engaged learning or other creative interventions into the graduate classroom The book includes personal narratives that are grounded in pedagogical perspectives from graduate school instructors who share their experiences with innovative and transformative teaching practices The goal of the book is to encourage graduate school professors to engage social justice education as something to be experienced and practiced in their courses and not just as a concept to be studied As such the book covers topics such as self directed learning counseling and community mapping It is ideal for graduate level instructors in the field of education and other related social science areas as well as junior faculty as they establish a teaching practice or veteran faculty seeking creative transformation
