Caught in the Act Cyril Julie, Lorna Holtman, Charles R. Smith, 2019-12-11 The research reported in *Caught in the Act* draws together the insights gained from a continuous professional development initiative for high school mathematics teachers teaching in low socio economic status and socially challenged environments in South Africa. The chapters show the possibilities for enhancing achievement in school mathematics if a strength based approach is adopted to develop teaching with teachers and when their concerns are taken seriously. The book demonstrates that the ecological relevance fitness for the context in which teachers are teaching of the goods developed and distributed by initiatives should be a major consideration to offer hope for sustainable implementation to improve school mathematics education. The book is of interest to mathematics teachers, school leaders, mathematics curriculum advisors, policy makers and researchers. **The Most**

Important Year Suzanne Bouffard, 2017-09-05 An eye opening look inside pre K in America and what it will take to give all children the best start in school possible. At the heart of this groundbreaking book are two urgent questions: What do our young children need in the earliest years of school and how do we ensure that they all get it? Cutting edge research has proven that early childhood education is crucial for all children to gain the academic and emotional skills they need to succeed later in life. Children who attend quality pre K programs have a host of positive outcomes including better language literacy, problem solving and math skills down the line and they have a leg up on what appears to be the most essential skill to develop at age four: strong self control. But even with this overwhelming evidence, early childhood education is at a crossroads in America. We know that children can and do benefit, but we also know that too many of our littlest learners don't get that chance. Millions of parents can't find spots for their children or their preschoolers end up in poor quality programs. With engrossing storytelling, journalist Suzanne Bouffard takes us inside some of the country's best pre K classrooms to reveal the sometimes surprising ingredients that make them work and to understand why some programs are doing the opposite of what is best for children. It also chronicles the stories of families and teachers from many backgrounds as they struggle to give their children a good start in school. This book is a call to arms when we are at a crucial moment and perhaps on the verge of a missed opportunity. We now have the means and the will to have universal pre kindergarten, but we are also in grave danger of not getting it right. *Applied Public Relations* Kathy Brittain Richardson, Marcie Hinton, 2015-03-27 With its practical orientation and scope, *Applied Public Relations* is the ideal text for any public relations case studies or public relations management course that places an emphasis on stakeholder groups. Through the presentation of current cases covering a wide variety of industries, locations and settings, Kathy Richardson and Marcie Hinton examine how real organizations develop and maintain their relationships, offering valuable insights into business and organizational management practices. The book's organization of case studies allows instructors to use the text in several ways: instructors can focus on specific stakeholders by using the chapters presented; they can focus on particular issues such as labor relations

or crisis management by selecting cases from within several chapters or they can select cases that contrast campaigns with ongoing programs or managerial behaviors A focus on ethics and social responsibility underlies the book and students are challenged to assess the effectiveness of the practices outlined and understand the ethical implications of those choices This Third Edition features 25 new and current domestic and international case studies specifically chosen for their relevancy and relatability to students New Professional Insights commentaries where practitioners respond to a set of questions relating to their work Increased emphasis on ethics and social responsibility Fully enhanced companion website that is connected with the text including a test bank and PowerPoint presentations for instructors and chapter specific discussion questions and additional readings for students

From GCSEs to EBCs Great Britain. Parliament. House of Commons. Education Committee, 2013 The Government's plans for replacing GCSEs with new English Baccalaureate Certificates in some subjects is trying to do too much too fast Introducing several fundamental changes at the same time and to a tight timetable will jeopardise the quality

of the reforms and may threaten the stability of the wider exam system GCSEs need significant improvements in order to restore public confidence in the exam system but the Government still needs to make the case that the GCSE brand is so discredited that it is beyond repair MPs are also concerned about the impact of the changes on subjects outside the English Baccalaureate where students will be taking GCSEs for some time to come according to the Government's plans The report also questions how well the Government's proposals will serve lower attaining pupils who are often the most disadvantaged There is no evidence that the proposed changes will help to tackle under achievement or narrow the attainment gap between the richest and poorest students any more effectively than GCSEs The Government is also called upon to re think its plans for a Statement of Achievement specifically for lower attaining pupils MPs agree that changes are needed to the way in which exams are run but they raise serious concerns about franchising subjects to exam boards The report is critical of the Government's decision to abolish some GCSEs before publishing the outcomes of the National Curriculum Review and its proposed changes to the school accountability system MPs also note the wide ranging stakeholder opposition to many of the Government's proposals
