

# HESI RN HEALTH ASSESSMENT

## MOLE CHANGE

Recent changes in the color and size of a mole are possible signs of cancer that should be evaluated by a health care provider as soon as possible.

## ABDOMEN EXAM PREPARATION

Prior to an abdominal examination, the client should be empty of their bladder because a full bladder makes the exam uncomfortable and can interfere with assessment and finding.

## STEATORRHEA

- Steatorrhea is fatty stool that is smelly and pale.
- Observation of the stool is the only way to confirm the presence of steatorrhea.

## DESCRIPTIVE TERMINOLOGY

The nurse should describe the pain as occurring in Epigastric region of the abdomen.

## SKIN SENSATION - ASSESS

- A monofilament is used to assess changes in peripheral sensation.
- An abnormal finding, such as lack of feeling in the feet when a monofilament is used to stroke the skin surface, indicate loss of peripheral sensation.
