guide and a summation of the year in science fiction this annual compilation has become the definitive must read anthology for all science fiction fans and readers interested in breaking into the genre **AI Narratives** Stephen Cave, Kanta Dihal, Sarah Dillon, 2020 This book is the first to examine the history of imaginative thinking about intelligent machines featuring contributions from leading humanities and social science scholars who detail the narratives about artificial intelligence AI that in turn offer a crucial epistemic site for exploring contemporary debates about these powerful Evil Geniuses Kurt Andersen, 2020-08-11 NEW YORK TIMES BESTSELLER When did America give up on fairness The author of Fantasyland tells the epic history of how America decided that big business gets whatever it wants only the rich get richer and nothing should ever change and charts a way back to the future Essential absorbing a graceful authoritative guide a radicalized moderate s moderate case for radical change The New York Times Book Review During the twentieth century America managed to make its economic and social systems both more and more fair and more and more prosperous A huge secure and contented middle class emerged All boats rose together But then the New Deal gave way to the Raw Deal Beginning in the early 1970s by means of a long war conceived of and executed by a confederacy of big business CEOs the superrich and right wing zealots the rules and norms that made the American middle class possible were undermined and dismantled The clock was turned back on a century of economic progress making greed good workers powerless and the market all powerful while weaponizing nostalgia lifting up an oligarchy that served only its own interests and leaving the huge majority of Americans with dwindling economic prospects and hope Why and how did America take such a wrong turn In this deeply researched and brilliantly woven cultural economic and political chronicle Kurt Andersen offers a fresh provocative and eye opening history of America's undoing naming names showing receipts and unsparingly assigning blame to the radical right in economics and the law the high priests of high finance a complacent and complicit Establishment and liberal useful idiots among whom he includes himself Only a writer with Andersen's crackling energy deep insight and ability to connect disparate dots and see complex systems with clarity could make such a book both intellectually formidable and vastly entertaining And only a writer of Andersen's vision could reckon with our current high stakes inflection point and show the way out of this man made disaster The Year's Top Short SF Novels 5 Cory Doctorow, Ken Liu, John P. Murphy, Jay O'Connell, William Preston, Alastair Reynolds, 2015-12-09 Short novels are movie length narratives that may well be the perfect length for science fiction stories This unabridged collection presents the best of the best short science fiction novels published in 2014 by current and emerging masters of this vibrant form of story telling In The Man Who Sold the Moon by Cory Doctorow hardware geeks and Burning Man fanatics band together to overcome challenges such as crowdfunding a space mission falling in love battling cancer and perfecting an open source engineering marvel in order to put a 3D printing robot that creates ceramic building panels from sand on the moon The Man Who Sold the Moon won the 2015 Theodore Sturgeon Memorial Award for best short science fiction In The Regular by Ken Liu a cybernetically enhanced

private investigator keeps her emotions in check with a piece of hardware called The Regulator while she searches for the murderer of a prostitute whom she suspects is a serial killer Claudius Rex by John P Murphy is a sci fi whodunit comedy that pays tongue in cheek homage to Rex Stout and Isaac Asimov A humble PI partners with an arrogant AI to solve the murder of the AI s creator Ai In Of All Possible Worlds by Jay O Connell an old timeline wizard coaxes a younger man to become his apprentice in an attempt to edit Earth's history so that the planet will escape the ravages of the Long Night and ensure that our timeline is the best of all possible worlds In Each in His Prison Thinking of the Key by William Preston the U S government brings a telepathic interrogator who is a veteran of the American war in Irag to a secret complex in Texas to get a handle on an enigmatic prisoner known as The Old Man A test of wills ensues between the two in this homage to Doc Savage Finally in The Last Log of the Lachrimosa by Alastair Reynolds set in the Revelation Space universe a crew investigates a cave on a volcanic planet in the hopes of salvaging valuable abandoned tech only to discover that the cave is defended by a horrific psychological weapon Nature Futures 2 Colin Sullivan, Henry Gee, 2014-09-09 One hundred writers including Neal Asher Elizabeth Bear Gregory Benford Tobias Buckell Brenda Cooper Kathryn Cramer David Langford Tanith Lee Ken Liu Nick Mamatas Norman Spinrad Ian Stewart Rachel Swirsky Adrian Tchaikovsky and Ian Watson offer their take on what the future will look like in Nature Futures 2 an anthology of sci fi short stories from the award winning Futures column in the science journal Nature Keeping Up with Emerging Technologies Nicole Hennig, 2017-06-21 The acceleration of technological change demands that today s information professionals and educators not only be constantly acquiring new knowledge and skills but also that they cultivate the ability to make sound judgments on which technologies to embrace Today's librarians and information specialists know it's imperative that they keep up with new technologies But not all technologies are equally important either within the library setting or to library patrons So how does one decide which ones to pursue and integrate into services In the uphill battle to stay current with new and emerging technologies deciding which ones to pursue and integrate into services is a major challenge A secondary problem is simply finding the time to consider the question Readers of Keeping Up with Emerging Technologies will learn all of the best practices and skills to keep up with new technologies and to analyze the ability of specific technologies to meet recognized user needs all in this single source You ll learn the best ways to gather information about new technologies and user needs to evaluate and analyze information to curate technology information for others to set up experiments and evaluate the results and to present your findings to persuade decision makers Written by the former head of user experience at MIT's library system this guidebook serves information professionals educators education technology specialists and anyone with emerging technology or innovation in their job titles It will also be useful for library administrators and those who manage these positions as well as for students seeking a technology oriented or curriculum design career path in libraries Transhumanism Andrew Pilsch, 2017-08-15 Transhumanism posits that humanity is on the verge of rapid evolutionary change as a result of emerging

technologies and increased global consciousness However this insight is dismissed as a naive and controversial reframing of posthumanist thought having also been vilified as the most dangerous idea in the world by Francis Fukuyama In this book Andrew Pilsch counters these critiques arguing instead that transhumanism s utopian rhetoric actively imagines radical new futures for the species and its habitat Pilsch situates contemporary transhumanism within the longer history of a rhetorical mode he calls evolutionary futurism that unifies diverse texts philosophies and theories of science and technology that anticipate a radical explosion in humanity s cognitive physical and cultural potentialities By conceptualizing transhumanism as a rhetoric as opposed to an obscure group of fringe figures he explores the intersection of three major paradigms shaping contemporary Western intellectual life cybernetics evolutionary biology and spiritualism In analyzing this collision his work traces the belief in a digital evolutionary and collective future through a broad range of texts written by theologians and mystics biologists and computer scientists political philosophers and economic thinkers conceptual artists and Golden Age science fiction writers Unearthing the long history of evolutionary futurism Pilsch concludes allows us to more clearly see the novel contributions that transhumanism offers for escaping our current geopolitical bind by inspiring radical utopian thought

Dis-Orienting Planets Isiah Lavender III,2017-04-07 Contributions by Suparno Banerjee Cait Coker Jeshua Enriquez Joan Gordon Veronica Hollinger Malisa Kurtz Stephanie Li Bradford Lyau Uppinder Mehan Graham J Murphy Barvon Tensor Posadas Amy J Ransom Robin Anne Reid Haerin Shin Stephen Hong Sohn Takayuki Tatsumi and Timothy J Yamamura Isiah Lavender III's Dis Orienting Planets amplifies critical issues surrounding the racial and ethnic dimensions of science fiction This edited volume explores depictions of Asia and Asians in science fiction literature film and fandom with particular regard to China Japan India and Korea Dis Orienting Planets highlights so called yellow and brown peoples from the constellation of a historically white genre The collection launches into political representations of Asian identity in science fiction s imagination from fear of the Yellow Peril and its racist stereotypes to techno Orientalism and the remains of a postcolonial heritage Thus the essays by contributors such as Takayuki Tatsumi Veronica Hollinger Uppinder Mehan and Stephen Hong Sohn reconfigure the very study of race in science fiction A follow up to Lavender's Black and Brown Planets this collection expands the racial politics governing the renewed visibility of Asia in science fiction One of the few on this subject the volume probes Gary Shteyngart s novel Super Sad True Love Story the acclaimed film Cloud Atlas and Guillermo del Toro s monster film Pacific Rim among others Dis Orienting Planets embarks on a wide ranging assessment of Asian representations in science fiction upon the determination that our visions of the future must include all people of color When Mothers Dream Brenda Cooper, 2025-08-12 Award winning writer Brenda Cooper celebrates the strength of the female in many guises mother daughter engineer biologist and more From a young dreamer who fights to protect the endangered Southern Resident Killer Whales to two older women whose grandchildren are being raised by AIs to a future scientist who tries to keep the world safe from bioengineered creatures When Mothers Dream explores the edges of what can be possible if we

celebrate the strength of women The collection mixes new and previously published speculative work The bouquet of science fiction fantasy and poetry is tied together with a thread of hope and a colored with a touch of anger It includes the voices of whales It is a book for our times When Mothers Dream is about fighting for our future Women can save us all Narrative and Fictionality Brian Richardson, 2021-06-24 This book brings together several major essays on foundational topics of narrative studies and the theory of fictionality by one of the preeminent figures of postclassical narrative theory It reexamines and reconceives the role of the author the status of implied authors the model for unnatural narrative theory the nature of narrative and the ideological implications of narrative forms It also explores the status of historical characters in fictional texts the paradoxes of realism the presence of multiple implied readers the role of actual readers and the question of fictionality In addition an appendix offers a useful approach for teaching narrative theory. The book includes analyses of works by Conrad Joyce Woolf Nabokov Beckett Jeanette Winterson Deborah Eisenberg and others Throughout it argues for a more expansive conception of narrative theory and keen attention to the nature and difference of fiction This provocative book makes crucial interventions in ongoing critical debates about narrative theory literary theory and the theory of fictionality and is essential reading for all students of narrative **Playing Utopia** Benjamin Beil, Gundolf S. Freyermuth, Hanns Christian Schmidt, 2019-11-07 Media narratives inform our ideas of the future and Games are currently making a significant contribution to this medial reservoir On the one hand Games demonstrate a particular propensity for fantastic and futuristic scenarios On the other hand they often serve as an experimental field for the latest media technologies However while dystopias are part of the standard gaming repertoire Games feature utopias much less frequently Why This anthology examines playful utopias from two perspectives It investigates utopias in digital Games as well as utopias of the digital game that is the role of ludic elements in scenarios of the future Innovation, Between Science and Science Fiction Thomas Michaud, 2017-06-29 Fantasy and science fiction are both involved in the process of innovation in techno scientific societies Long regarded as a hindrance to rationality and to science science fiction has become the object of praise in recent decades Innovative organizations use science fiction to stimulate the creativity of their teams and more and more entrepreneurs are using its influence to develop innovation Scientific practice relies in part on an imaginary dimension The mapping of the technical imagination of science fiction has become an important strategic issue as has its patentability The conquest of space the construction of cyberspace and virtual reality biotechnologies and nanotechnologies are all at the center of futuristic fictions that participate in scientific speeches and discoveries The Nature of Tomorrow Michael Rawson, 2021-11-16 An examination of how Western visions of endless future growth have contributed to the global environmental crisis For centuries the West has produced stories about the future in which humans use advanced science and technology to transform the earth Michael Rawson uses a wide range of works that include Francis Bacon s New Atlantis the science fiction novels of Jules Verne and even the speculations of think tanks like the RAND Corporation to reveal the

environmental paradox at the heart of these narratives the single minded expectation of unlimited growth on a finite planet Rawson shows how these stories which have long pervaded Western dreams about the future have helped to enable an unprecedentedly abundant and technology driven lifestyle for some while bringing the threat of environmental disaster to all Adapting to ecological realities he argues hinges on the ability to create new visions of tomorrow that decouple growth from the idea of progress Geography of Time, Place, Movement and Networks, Volume 1 Stanley D. Brunn, 2024-05-23 This book describes the journey concept relating to cultural and social history of Western and non Western worlds By including time journeys negotiated by women racial minorities artists and scholars from the humanities and social natural and physical scientists the book explores time space journeys in personal professional and cultural life and place experiences The sixteen chapters in this book offer new insights into time place worlds in different contexts including history culture astronomy and science fiction The concept is one where science and art worlds intersect in the emerging worlds of the unknown With contributors from different disciplines and countries expanding our understanding of this concept this volume provides a valuable source for disciplinary and interdisciplinary classes and seminars exploring these scholarly frontiers the Plow and the Skyline Ernest J. Yanarella, 2022-03-01 The apocalyptic pastoral and urban traditions have fundamentally shaped Western history and influenced American religion culture and politics This book argues that these traditions have not only been decisive in giving form and substance to classic and modern American literature but have been appropriated by contemporary science fiction As a loosely connected set of cultural narratives the Cross the Plow and the Skyline have through the medium of science fiction and fantasy provided a bold vista on the future grounded in an emergent ecological imagination In the expanded second edition of the original 2001 publication the author argues that a significant shift has taken place in contemporary Anglo American science fiction and fantasy SF F from twentieth century SF F critically analyzed in the first edition's critical inquiry Avantgarde works in twenty first century speculative fiction extensively examined in representative works in interludes separating the slightly revised original chapters have become darker in their visions of the possible future more focused on slowness over breakneck speed more amenable to gender racial and global diversity in authorship plot and subgenre creation less attached to anchor concepts like the city wilderness and the domesticated landscape in plot development more prone to dystopian and critical dystopian tropes simultaneously more open toward but critical of Young Adult fiction and more supportive of the breakdown of borders and antagonisms between science fiction and fantasy and SF F and literary fiction Ensconced in the cultural social and political zeitgeist of the New Millennium's first two decades these features of twenty first century science fiction and fantasy may yet settle into and inform emergent and pluralistic varieties of ecological politics spreading across the globe and confronting the Earth's social and environmental crises of our times and coming decades
