Literacy and Learning in the Content Areas Sharon Kane, 2017-07-05 The 3rd Edition of Literacy Learning in the Content Areas helps readers build the knowledge, motivation, tools, and confidence they need as they integrate literacy into their middle and high school content area classrooms. Its unique approach to teaching content area literacy actively engages preservice and practicing teachers in reading and writing and the very activities that they will use to teach literacy to their own students in middle and high school classrooms. Rather than passively learning about strategies for incorporating content area literacy activities, readers get hands-on experience in such techniques as mapping, webbing, anticipation guides, booktalks, class websites, and journal writing and reflection. Readers also learn how to integrate children's and young adult literature, primary sources, biographies, essays, poetry, and online content communities and websites into their classrooms. Each chapter offers concrete teaching examples and practical suggestions to help make literacy relevant to students' content area learning. Author Sharon Kane demonstrates how relevant reading, writing, speaking, listening, and visual learning activities can improve learning in content area subjects and at the same time help readers meet national content knowledge standards and benchmarks.

Côte d'Ivoire Caught in Cross Fire and Africa in Dire Straits This book is a thorough analysis of the postelectoral crisis in Côte d'Ivoire in 2011 that led to an unprecedented and horrid manslaughter with the bombing of the country's infrastructures by French and UN troops who were sent to monitor the election. The helpers ended up destroying our country. Readers will discover the following: The international conspiracy that was planned by the West against Côte d'Ivoire against President Laurent Gbagbo, incumbent and Africa in general, rather than an election as many still think. It is the war over our oil and resources. This was nothing but the recolonization of Africa with Côte d'Ivoire as a base of experimentation.

Academic Conversations Jeff Zwiers, Marie Crawford, 2011. Where would we be without conversation? Throughout history, conversations have allowed us to see different perspectives, build ideas, and solve problems. Conversations, particularly those referred to in this book as academic conversations, push students to think and learn in lasting ways. Academic conversations are back-and-forth dialogues in which students focus on a topic and explore it by building, challenging, and negotiating relevant ideas. Unfortunately, academic conversations are rare in many classrooms. Talk is often dominated by the teacher and a few students or it does not advance beyond short responses to the teacher's questions. Even certain teaching approaches and curriculum programs neglect to train students how to maintain a focused, respectful, and thoughtful conversation. To address these challenges, authors Jeff Zwiers and Marie Crawford have identified five core communication skills to help students hold productive academic conversations across content areas. These skills include elaborating and clarifying, supporting ideas with evidence, building on and/or challenging ideas, paraphrasing, and synthesizing. This book shows teachers how to weave the cultivation of academic conversation skills and conversations into current teaching approaches. More specifically, it describes how to use conversations to build the following: Academic vocabulary and grammar; Critical thinking skills such as persuasion, interpretation, consideration of multiple perspectives, evaluation, and application; Literacy skills such as questioning, predicting, connecting to prior knowledge, and summarizing; Complex and abstract essential understandings in content areas such as adaptation, human nature, bias, conservation of mass, energy, gravity, irony, democracy, greed, and more. An academic classroom environment brimming with respect for others' ideas, equity of voice, engagement, and mutual support. The ideas in this book stem from many hours of classroom practice, research, and video analysis across grade levels and content areas. Readers will find numerous practical activities for working on each conversation skill, crafting conversation-worthy tasks, and using conversations to teach and assess. Academic Conversations offers an in-depth approach to helping students develop into the future parents, teachers, and leaders who will collaborate to build a better world.
