Natural Resource Damages Kevin M. Ward, John W. Duffield, 1992 *The House That Jack Built* James Colman, 2016-09-01 This is the story of how an ordinary bloke from the bush became the key figure in a movement that would change the shape of our cities and bring about lasting political and legal reform This is the story of the house that Jack Munday built Without the green bans movement of the 1970s Sydney and many other cities would look very different Pulling together an unlikely alliance of environmentalists and union players earned Jack Munday a reputation as both the best known unionist and best known conservationist in Australia Under his leadership the movement fought against the slash and burn philosophy that almost saw The Rocks fitted out with high rise buildings a highway through the centre of Glebe and total development of Centennial Park In this long awaited book James Colman reflects on Jack's remarkable life and his ongoing legacy Munday overturned the bulldozer mentality of the 1960s and 1970s and helped to persuade Australians everywhere to cherish and protect the heritage of special buildings places and sites **Contingent Valuation** J.A. Hausman, 2012-12-02 The papers in this volume present a quite critical assessment of contingent valuation CV CV is a survey method that attempts to estimate individual values for economic goods by asking people hypothetical questions about their willingness to pay for such goods In economics CV has previously been studied almost solely by economists specializing in environmental economics This book however reports research which is mainly from economists with specialities in economic theory econometrics and public finance rather than from the more narrowly focused research of environmental economists In
