Passive and Active Measurement Arvind Krishnamurthy, Bernhard

Plattner, 2010-04-01 The 2010 edition of the Passive and Active Measurement Conference was the 11th of a series of successful events. Since 2000, the Passive and Active Measurement (PAM) conference has provided a forum for presenting and discussing innovative and early work in the area of Internet measurements. PAM has a tradition of being a workshop-like conference with lively discussion and active participation from all attendees. This event focuses on research and practical applications of network measurement and analysis techniques. This year's conference was held at ETH Zurich, Switzerland. PAM 2010 attracted 79 submissions. Each paper was carefully reviewed by at least three members of the Technical Program Committee. The reviewing process led to the acceptance of 23 papers. The papers were arranged in nine sessions covering the following areas: routing, transport, protocols, mobile devices, topology, measurement, infrastructure, characterizing network usage, analysis techniques, traffic analysis, and the Web. We are very grateful to Endace Ltd, New Zealand; Cisco Systems Inc, USA; armasuisse, Switzerland; and the COST Action TMA, whose sponsoring allowed us to keep registration costs low and to offer several travel grants to PhD students. We are also grateful to ETH Zurich for sponsoring PAM as a host.
