Maeda,2012-12-06 After two decades data processing has finally and probably forever found its niche among civil engineering and construction CEC professionals through word processors digitizing tables management software and increasingly via drawing software and computer aided design CAD recently robots have even started invading work sites What are the main trends of CAD and robotics in the field of architecture and civil engineer ring What type of R D effort do university and industrial laboratories undertake to devise the professional software that will be on the market in the next three to five years These are the issues which will be addressed during this symposium To this effect we have planned concurrently an equipment and software show as well as a twofold conference

Robotic is just starting in the field of civil engineering and construction A pioneer the Civil Engineering Departement of Carnegie Mellon University in the United States organized the first two international symposia in 1984 and 1985 in Pittsburgh This is the third meeting on the subject this year however we have also included CAD It constitutes the first large international symposium where CAD experts specialists in architecture and CEC robotics will meet From this standpoint it should be an ideal forum for exchanging views and expe riences on a wide range of topics and we hope it will give rise to novel applications and new syntheses This symposium is intended for scientists teachers students and also for manufacturers and all CEC professionals **Federal Register** ,1985
