Sustainable Economic Development Arsenio Balisacan,Ujjayant Chakravorty,Majah-Leah Ravago,2014-09-20 Sustainable Economic Development Resources Environment and Institutions presents 25 articles that lay the foundations of sustainable development in a way that facilitates effective policy design The editors mix broad thematic papers with focused micro papers balancing theories with policy designs The book begins with two sections on sustainable development principles and practice and on specific settings where sustainable development is practiced Two more sections illuminate institutions governance and political economy Additional sections cover sustainable development and agriculture and risk and economic security including disaster management This rich source of information should appeal to any institution involved in development work and to development practitioners grappling with an array of difficult on the ground developmental challenges Analyzes policies that move markets and resource use patterns towards achieving sustainability Articles are kaleidoscopic in scope and creativity Authors embody extraordinary diversity and qualifications

South African Schooling: The Enigma of Inequality Nic Spaull,Jonathan D. Jansen,2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation

justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Violence, Inequality and Transformation: Apartheid Survivors on South Africa's Ongoing Transition Jasmina Brankovic, Brian Mphahlele, Sindiswa Nunu, Agnes Ngxukuma, Nompumelelo Njana, Yanelisa Sishuba, 2020-01-29 Despite its lauded political transition in 1994 South Africa continues to have among the highest levels of violence and inequality in the world Organised survivors of apartheid violations have long maintained that we cannot adequately address violence in the country let alone achieve full democracy without addressing inequality This book is built around extensive quotes from members of Khulumani Support Group the apartheid survivors social movement and young people growing up in Khulumani families It shows how these survivors who bridge the past and the present through their activism understand and respond to socioeconomic drivers of violence Pointing to the continuities between apartheid oppression and post apartheid marginalisation in everyday life the narratives detail ways in which the democratic dispensation has strengthened barriers to social transformation and helped enable violence They also present strategies for effecting change through collaboration dialogue and mutual training and through partnerships with diverse stakeholders that build on local level knowledge and community based initiatives The lens of violence offers new and manageable ways to think about reducing inequality while the lens of inequality shows that violence is a complex web of causes pathways and effects that requires a big picture approach to unravel The survivors narratives suggest innovative strategies for promoting a just transition through people driven transformation that go well beyond the constraints of South Africa's transitional justice practice to date A result of participatory research conducted in collaboration with and by Khulumani members this book will be of interest to activists students researchers and policy makers working on issues of transitional justice inequality and violence

Baloch,Ephrem Habyarimana,Gyuhwa Chung,2021-09-15

Landraces possess a very large genetic base in population structure and are dynamic populations of cultivated plants with historical origin distinct identity and without any formal crop improvement They are often genetically diverse locally adapted and associated with traditional farming systems Resistance genes to biotic and abiotic stress factors which are especially diversified in landraces are of great interest to plant breeders faced with global climate challenge In addition gene pools made of different landraces grown in different ecological conditions can be used for wheat breeding to enhance quality yield and other desirable agricultural parameters An estimated 75% of the genetic diversity of crop plants was lost in the last century due to the replacement of high yielding modern varieties There is thus an urgent need to preserve existing species not only for posterity but also as a means to secure food supply for a rising world population In this book we provide an overview of wheat landraces with special attention to genetic diversities conservation and utilization **Sustainable**

The Global Testing Culture William C. Smith,2016-01-04 The past thirty years have seen a rapid expansion of testing exposing students worldwide to tests that are now more than ever standardized and linked to high stakes outcomes The use of testing as a policy tool has been legitimized within international educational development to measure education quality in the vast majority of countries worldwide The embedded nature and normative power of high stakes standardized testing

across national contexts can be understood as a global testing culture. The global testing culture permeates all aspects of education from financing to parental involvement to teacher and student beliefs and practices. The reinforcing nature of the global testing culture leads to an environment where testing becomes synonymous with accountability which becomes synonymous with education quality. Underlying the global testing culture is a set of values identified from the increasing literature on world culture. These include education as a human right, academic intelligence, faith in science, decentralization, and neoliberalism. Each of these values highlights different aspects of the dialogue in support of high stakes standardized testing. The wide approval of these values and their ability to legitimate various aspects of high stakes testing reinforces the taken-for-granted notion that such tests are effective and appropriate education practices. However, a large body of literature emphasizes the negative unintended consequences: teaching to the test, reshaping the testing pool, the inequitable distribution of school resources and teachers' attention, and reconstructing the role of the student, teacher, and parent commonly found when standardized census-based tests are combined with high stakes outcomes for educators or students. This book problematizes this culture by providing critical perspectives that challenge the assumptions of the culture and describe how the culture manifests in national contexts. The volume makes it clear that testing per se is not the problem. Instead, it is how tests are administered, used, or misused and linked to accountability that provide the global testing culture with its powerful ability to shape schools and society and lead to its unintended undesirable consequences.

Water Resources

Management Vijay P Singh, Shalini Yadav, Ram Narayan Yadava, 2017-11-27. This book contains two parts. The first part deals with some aspects of irrigation encompassing farm irrigation systems, landscape gardening, energy assessment for drip irrigation, and micro sprinklers. The second part is on water resources planning and management. It discusses water crisis, challenges in river health management, water supply systems, salt water intrusion, lake management, water supply demand assessment, integrated water resources management, among other topics. The book will be of interest to researchers and practitioners in the field of water resources, hydrology, environmental resources, agricultural engineering, watershed management, earth sciences, as well as those engaged in natural resources planning and management. Graduate students and those wishing to conduct further research in water and environment and their development and management may find the book to be of value.

Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17. Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice. Focussing its discussion within the context of mathematics education, it argues that while research-generated insights can have beneficial effects on learning and teaching, the question of how these effects are to be generated and sustained is far from evident. The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice. In the first part of the book, four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom. In the second part, each of these teams

makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research
