Labour Beyond Cosatu Andries Bezuidenhout,Malehoko Tshoamedi,Christine Bischoff,2017-07-01 Labour Beyond Cosatu is the fourth volume in the series Taking Democracy Seriously a ground breaking textured and nuanced study on workers and democracy which was established in the 1990s The series looks at members of

trade unions affiliated to the Congress of South African Trade Unions Cosatu and provides a rich database of trade union members and research conducted over the past twenty years It is one of the very few such resources available to researchers anywhere in the world Labour Beyond Cosatu paints a complex picture The 12 chapters of the volume explore various rebellions and conflicts in the trade union sector starting with the National Union of Mineworkers NUM and rivalries between Cosatu affiliates Unpacking the conflicts between state sector and private sector workers contributors look at the impact of generational and educational shifts seen by some commentators as proof that Cosatu is now middle class The book also raises the issue of gender in the unions by usefully locating the controversy around charges levelled at Zwelinzima Vavi in 2013 in the larger context of serious problems in the gender politics within parts of Cosatu Refuting the image of a union federation solidly committed to the ANC Labour Beyond Cosatu presents evidence of a sharp decline in support for the ANC within Cosatu and growing scepticism towards the Alliance It shows that attempts to understand the labour movement in South Africa in the future will need to include research of smaller independent unions and social movements The volume's contributors make a major contribution to key debates on labour and democracy providing new material that can potentially shift the discussion in important ways This book will be of great value to students and researchers in Industrial Sociology Political Studies Industrial Psychology and Economics and Management

Leadership Approaches to Negotiate Challenges in a Changing Education Landscape Leentjie van Jaarsveld, Kobus Mentz, Charl C. Wolhuter, 2020-12-31 The argumentative point of departure of this scholarly book is the common conviction of specialists in the field of education in

South Africa that the national education system is not at a satisfactory level in both the academic and the public discourse. Such allegations are made and frequently stronger adjectives than non-satisfactory are used. Results of international test series in which South Africa has participated such as the 2015 TIMSS tests confirm the negative verdicts found in the public and scholarly discourse. This book aims to argue that although the lack of performance could be attributed to a multiplicity of factors, one factor that can make a difference in the achievement levels obtained by learners in schools is leadership. The book demonstrates that a particular problem of both the scholarly and the public discourse on education in South Africa is an overtone of defeatism or resignation, blaming all ills in the education system and educational institutions on historical legacies and/or contextual factors such as socio-economic deprivation in the catchment areas of schools or poor resources and infrastructure. This collected work was inspired by a recently published spate of articles on top performing schools, including top performing schools in rural communities in which it was demonstrated that good leadership can overcome such contextual and other challenges. The book unpacks the issue of leadership in South African schools from a variety of perspectives, thus contributing to the development of the scholarly discourse on Educational Leadership in South Africa. The target audience of the book is scholars of Educational Leadership. The research reported in the chapters draws on a wide range of methodologies including empirical survey research, questionnaires and interviews, critical literature surveys and the comparative method.

Online around the World Laura M. Steckman, Marilyn J. Andrews, 2017-05-24. Covering more than 80 countries around the world, this book provides a compelling contemporary snapshot of how people in other countries are using the Internet, social media and mobile apps. How do people in other countries use the social media platform Facebook differently than Americans do? What topics are discussed on the largest online forum, one in Indonesia with more than seven million registered users? Why does Mongolia rate in the top ten countries worldwide for peak Internet speeds? Readers of *Online around the World: A Geographic Encyclopedia of the Internet, Social Media and Mobile Apps* will discover the answers to these questions and learn about people's Internet and social media preferences on six continents outside of the online community of users within the United States. The book begins with an overview of the Internet, social media platforms and mobile apps that chronologically examines the development of technological innovations that have made the Internet what it is today. The country-specific entries that follow the overview provide demographic information and describe specific events influenced by online communications, allowing readers to better appreciate the incredible power of online interactions across otherwise unconnected individuals and the realities and peculiarities of how people communicate in today's fast-paced, globalized and high technology environment. This encyclopedia presents social media and the Internet in new light, identifying how the use of language and the specific application of human culture impacts emerging technologies and communications, dramatically affecting everything from politics to social activism, education and censorship.

Fees Must Fall Susan Booyesen, 2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt FeesMustFall the student revolt that began in October 2015 was an uprising against lack of access to and financial exclusion from higher education in South Africa More broadly it radically questioned the socio political dispensation resulting from the 1994 social pact between big business the ruling elite and the liberation movement The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of

the international left Yet its objectives are more complex than those of earlier struggles The student movement has challenged the hierarchical top down leadership system of university management and it s double speak of professing to act in workers and students interests yet entrenching a regressive system for control and governance University managements while on one level amenable to change have also co opted students into their ranks to create co responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution This book maps the contours of student discontent a year after the start of the FeesMustFall revolt Student voices dissect colonialism improper compromises by the founders of democratic South Africa feminism worker rights and meaningful education In depth assessments by prominent scholars reflect on the complexities of student activism its impact on national and university governance and offer provocative analyses of the power of the revolt
